Models for Optimum Decision Making W. W. Norton & Company

Offers fifty different strategies and models for making better choices and decisions, including explanations and guidance for applying such models as the Rubber Band Model, the Personal Performance Model, and the Pareto Principle.

Decision Making Essentials You Always Wanted to Know CRC Press

In the current fast-paced and constantly changing business environment, it is more important than ever for organizations to be agile, monitor business performance, and meet with increasingly stringent compliance requirements. Written by pioneering consultants and bestselling authors with track records of international success, *The Decision Model: A*

Decision Analysis for Management Judgment W. W. Norton & Company

What would be your ideal job if money didn't matter? How far would you go for a promotion? When did you last stand up for what you believe in?

What are you afraid of? In this unique handbook to life and work, there are no right or wrong answers: only honest ones. Because before you can build a career or find happiness, you must first know yourself. From the professional to the personal, the everyday to the existential, the wide-ranging questions in this book will help to illuminate your life, your motivations, your ambitions and your values, and will help you find your own fulfilling path. You can use the book alone, like a journal, or with a colleague, partner or friend. Either way, through these pertinent and enjoyable questions you will find answers to everything that really matters.

Why Nations Fail IGI Global

Decision making or making judgments is an essential function in the ordinary life of any individual. Decisions can often be made easily, but sometimes, it can be difficult due to conflict, uncertainty, or ambiguity of the variables required to make the decision. As human beings, we constantly have to decide between different activities such as occupational, recreational, political, economic, etc. These decisions can be transcendental or inconsequential. *Analyzing the Role of Cognitive Biases in the Decision-Making Process* presents comprehensive research focusing on cognitive shortcuts in the decision-making process. While highlighting topics including jumping to conclusion bias, personality traits, and theoretical models, this book is ideally designed for mental health professionals, psychologists, sociologists, managers, academicians, researchers, and upper-level students seeking current research on cognitive biases that affect individual decision making in daily life.

Mental Models Systems Thinking Press

We make decisions throughout the day and in our lifespan we make thousands of decisions. Most of the decisions are routine barring few ones which have profound impact on our life. Gaining competence in decision making is highly desirable for personal and professional prosperity. The objective of writing this book is to provide an opportunity to gain the mastery in decision making. Decision making is both science and an art. When we talk of science we will systematically understand what constitutes to be a decision, how we have evolved as decision makers, how we deviate from rationality under the influence of cognitive biases, how we get emotional manipulated. We will learn these with the help of behavioral sciences - neurosciences, social science, neuroeconomics, cognitive psychology and group dynamics. Decision making is an art because we interpret the decisions subjectively. We have to learn and master this art of decision making so as to be an able, rational and ethical decision maker at individual levels, in groups and at organization level. In this highly engaging book, the author details decision making process, explains how to shield from cognitive biases, external manipulations and temptations, describes various tools and techniques required for decision making and throws light on drafting our own ethical code. The concepts are explained in details alongwith case studies and real life examples. It is an essential read for all individuals.

Risk Management, Strategic Thinking and Leadership in the Financial Services Industry Springer

The secret to making the right call in an increasingly complex world The decisions we make every day – frequently automatic and incredibly fast – impact every area of our lives. The Little Black Book of Decision Making delves into the cognition behind decision making, guiding you through the different ways your mind approaches various scenarios. You'll learn to notice that decision making is a matter of balance between your rational side and your intuition – the trick is in honing your intuition to steer you down the right path. Pure reasoning cannot provide all of the answers, and relying solely on intuition could prove catastrophic in business. There must be a balance between the two, and the proportions may change with each situation. This book helps you quickly pinpoint the right mix of logic and 'gut feeling,' and use it to find the best possible solution. Balance logic and intuition in your decision making approach Avoid traps set by the mind's inherent bias Understand the cognitive process of decision making Sharpen your professional judgement in any situation Decision making is the primary difference between organisations that lead and those that struggle. The Little Black Book of Decision Making helps you uncover errors in thinking before they become errors in judgement.

The Test Book Harper Collins

Decision Analysis for Management Judgment is unique in its breadth of coverage of decision analysis methods. It covers both the psychological problems that are associated with unaided managerial decision making and the decision analysis methods designed to overcome them. It is presented and explained in a clear, straightforward manner without using mathematical notation. This latest edition has been fully revised and updated and includes a number of changes to reflect the latest developments in the field.

The Decision Model McGraw Hill Professional

Through a blend of compelling exercises, illustrations, and stories, the bestselling author of Thinking in Bets will train you to combat your own biases, address your weaknesses, and help you become a better and more confident decision-maker. What do you do when you're faced with a big decision? If you're like most people, you probably make a pro and con list, spend a lot of time obsessing about decisions that didn't work out, get caught in analysis paralysis, endlessly seek other people's opinions to find just that little bit of extra information that might make you sure, and finally go with your gut. What if there was a better way to make quality decisions so you can think clearly, feel more confident, second-guess yourself less, and ultimately be more decisive and be more productive? Making good decisions doesn't have to be a series of endless guesswork. Rather, it's a teachable skill that anyone can sharpen. In How to Decide, bestselling author Annie Duke and former professional poker player lays out a series of tools anyone can use to make better decisions. You'll learn:

- To identify and dismantle hidden biases.
- To extract the highest quality feedback from those whose advice you seek.
- To more accurately identify the influence of luck in the outcome of your decisions.
- When to decide fast, when to decide slow, and when to decide in advance.
- To make decisions that more effectively help you to realize your goals and live your values.

Through interactive exercises and engaging thought experiments, this book helps you analyze key decisions you've made in the past and troubleshoot those you're making in the future. Whether you're picking investments, evaluating a job offer, or trying to figure out your romantic life, How to Decide is the key to happier outcomes and fewer regrets.

The Decision Book: 50 Models for Strategic Thinking Ablex Publishing Corporation

This book presents a broad overview of risk management in the banking industry, with a special focus on strategic thinking and decision-making. It reveals the broader context behind decision models and approaches to risk management in the financial industry, linking the regulatory landscape for capital management and risk to strategic thinking, together with behavioral and cultural assessments.

The Decision Book Springer

This work examines all the fuzzy multicriteria methods recently developed, such as fuzzy AHP, fuzzy TOPSIS, interactive fuzzy multiobjective stochastic linear programming, fuzzy multiobjective dynamic programming, grey fuzzy multiobjective optimization, fuzzy multiobjective geometric programming, and more. Each of the 22 chapters includes practical applications along with new developments/results. This book may be used as a textbook in graduate operations research, industrial engineering, and economics courses. It will also be an excellent resource, providing new suggestions and directions for further research, for computer programmers, mathematicians, and scientists in a variety of disciplines where multicriteria decision making is needed.

The Decision Maker's Playbook Springer Science & Business Media

Argues that leaving decision making entirely to company leaders is a mistake and that giving decision-making power to people at all levels will energize a company and tap into its full potential.

Strategic Thinking for Leaders Pearson UK

The Decision Book Faber & Faber

Most of us face the same questions every day: What do I want? And how can I get it? How can I live more happily and work more efficiently? This updated edition of the international bestseller distills into a single volume the fifty best decision-making models used on MBA courses, and elsewhere, that will help you tackle these important questions – from the well known (the Eisenhower matrix for time management) to the less familiar but equally useful (the Swiss Cheese model). It will even show you how to remember everything you will have learned by the end of it. Stylish and compact, this little black book is a powerful asset. Whether you need to plot a presentation, assess someone's business idea or get to know yourself better, this unique guide will help you simplify any problem and take steps towards the right decision.

The Craft of Decision Modelling Pantheon

The gripping first installment in New York Times bestselling author Tahereh Mafi's Shatter Me series. One touch is all it takes. One touch, and Juliette Ferrars can leave a fully grown man gasping for air. One touch, and she can kill. No one knows why Juliette has such incredible power. It feels like a curse, a burden that one person alone could never bear. But The Reestablishment sees it as a gift, sees her as an opportunity. An opportunity for a deadly weapon. Juliette has never fought for herself before. But when she's reunited with the one person who ever cared about her, she finds a strength she never knew she had. And don't miss Defy Me, the shocking fifth book in the Shatter Me series!

The Secrets of Decision Making Harvard Business Press

Brilliant and engagingly written, Why Nations Fail answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas on the interplay between inclusive political and economic institutions? Why Nations Fail will change the way you look at—and understand—the world.

House of Leaves John Wiley & Sons

This volume offers a varied discussion of the two main areas of decision modelling: theory and practical application. It deals with the construction of models for decision-making and the scientific analysis or consequence of these decisions. Case studies are used to illustrate the text.

The Change Book Random House Canada

This book considers the problem of determining how many barrels of crude oil an oil-producing and exporting country should produce annually for export—along with several other important problems that decision-makers in the crude oil industry face—and discusses procedures for finding optimum solutions for them. It considers the important Objective Functions they need in making these critical decisions, and discusses procedures to find the best solutions. Outputs from the treatment units, in an oil refinery are only semi-finished products; these are blended into finished products like gasoline, diesel oil, etc., meeting various specifications that the marketplace demands. The book discusses models for solving these problems optimally with examples.

Shatter Me Crown Currency

How do you make your way in a fast-changing world? Why do we have less and less time? Why are some people unfaithful? Who governs the world? This book is about change - from the small and seemingly insignificant transitions in our day-to-day lives, to the big and almost incomprehensible shifts in human history. Because if we want to make change happen ourselves, we have to understand it first. Distilling expert wisdom and complex theories, the authors of the bestselling The Decision Book present fifty simple and effective models to help us make sense of our changing world. Everything is in a constant state of change, from the personal and political to economics and the environment. Whether you're buying a new car, deciding who to vote for, or making an investment, this little book offers surprisingly simple explanations of the biggest theories of transformation that will help you see the world anew - and radically challenge some of your preconceived ideas.
