"Surprisingly readable and studded with nuggets of insight."

—The Daily Yomiuri "This insightful, well-written, fascinating book offers new understandings, not only of Japan, but also of

American culture. It is essential for those in anthropology, psychology, sociology, and psychiatry who are interested in culture, as well as those in law and the business community who deal with Japan." —Paul Ekman, Ph.D., Director, Human Interaction Laboratory, Langley Porter Institute, University of California, San Francisco "[A] thoughtful cross-cultural study of development...His work can only enhance the still evolving psychoanalytic theory of preoedipal development as it is being derived mostly from psychoanalytic research on child-parent interaction in American families." —Calvin F. Settlage, M.D. "Johnson's ambitious and exhaustive synthesis of anthropological and psychological treatments of dependency raises interesting questions. . . Johnson alerts the reader to issues of universalism and relativity and leads us to ask, 'What would psychoanalysis be like, if it had originated in Japan?'" —Merry I. White, Edwin O. Reischauer Institute of Japanese Studies, Harvard University ". . . Johnson's erudite and critical re-examination of human dependence succeeds to re-profile dependence meaningfully and revives our interest in this major aspect of human experience. Indeed, much food for thought for both psychoanalysts and anthropologists." —Henri Parens, M.D., Philadelphia Psychoanalytic Institute Western ideologies traditionally emphasize the concepts of individualism, privacy, freedom, and independence, while the prevailing ethos relegates dependency to a disparaged status. In Japanese society, the divergence from these western ideals can be found in the concept of amae (perhaps best translated as indulgent dependency) which is part of the Japanese social fiber and pervades their experience. For the Western reader, the concept of amae is somewhat alien and unfamiliar, but in order to understand the Japanese fully, it is essential to acquire a familiarity with the intensity that accompanies interdependent affiliations within their culture. To place amae in the proper context, Johnson critically examines the western attitudes toward dependency from the perspectives of psychoanalysis, psychiatry, developmental psychology, and anthropology. Johnson traces the development of the concept and uses of the term dependency in academic and developmental psychology in the West, including its recent eclipse by more operationally useful terms attachment and interdependency. This timely books makes use of the work of Japanese psychiatrist Takeo Doi, whose book *The Anatomy of Dependence* introduced the concept of amae to the West. Johnson goes on to illuminate the collective manner in which Japanese think and behave which is central to their socialization and educational practices, especially as seen in the stunning success of Japanese trading practices during the past twenty years. A major emphasis is placed upon the positive aspects of amae, which are compared and contrasted with attitudes toward

dependency seen among other nationalities, cultures, and groups in both Western and Asian societies. Complete with a glossary of Japanese terms, Dependency and Japanese Socialization provides a comprehensive investigation into Japanese behavior.

An Illustrated Guide to Grammar and Structure Courier Corporation

This book investigates the lexico-grammatical complementarity in language in its construal of person as a semantic system. Given the vast and wide spectrum of resources for expressing distinctions in the assignment of person roles in language, this book presents person-related system networks covering a rich range of semantic features. It also studies the system of person in relation to other major semantic systems instead of regarding it as one isolated component of language parallel to gender, number, case, etc. Systemic features of person are in turn realized by lexico-grammar, whose components, lexis and grammar form a relationship of complementarity in the process of transforming human experience into meaning. Person-related

meaning can be either realized by lexical means, i.e. entity, process, quality, or grammatical means, i.e. pronouns, clitics, affixes, zero forms. Besides, such meaning is also found to be realized at some indeterminate areas along the lexis-grammar continuum. A special feature of this book is that it observes the lexicalization and grammaticalization of person based on evidence from a variety of languages. Readers will be presented a comprehensive look into the meaning of person and will be encouraged to reflect on its realization in their own languages.

Dictionary of Italian Slang and Colloquial Expressions Tuttle Publishing

"[Harvey] may have created a new literary genre: science travel writing . . . travelogue, autobiography, history, and even fantasy romp alongside the biology" (Quill & Quire). When biologist Brian Harvey saw a thousand fish blundering into a Brazilian dam, he asked the obvious: What's going to happen to them? The End of the River is the story of his long search for an answer. Harvey takes readers from a fisheries patrol boat on the Fraser River to the great Tsukiji fish market in Japan, with stops in the Philippines, Thailand, and assorted South American countries. Finally, in the arid outback of northeast Brazil, against a backdrop of a multi-billion-dollar river project nobody seems to want, he finds a small-scale answer to his simple question. In recounting his journey, he populates his story with characters both real and imagined, human and otherwise—a six-foot endangered catfish; a Canadian professor with a weakness for Thai bar girls; a chain-smoking Brazilian with a passion for her river; a drug-addled stick-up artist. The End of the River is about fishermen, fish farmers, and fish cops; there are scientists and shysters as well as a few Colombian narcotraficantes and some very drunk, very hairy Brazilian men in thongs. From the founder of the World Fisheries Trust, Harvey introduces a new kind of writing about the environment, as far off the beaten track as you can get in a Land Rover driven by a female Colombian biologist whose favorite expression is "No hay via!"—meaning, "no road!" "[A] freewheeling and vividly written essay on the mysteries and

longings of what it is to be human in a world of cynicism and loss—and more significantly, what it is to be hopeful, to persevere, in the search for redemption and beauty . . . A brilliant and instructive book . . . recalls the travel writing of one of Harvey's heroes, Sir Richard Burton." —The Globe and Mail (Toronto)
