Berman's Pediatric Decision Making uses  
an algorithmic, structured approach to

lead you to the right diagnosis and  
treatment every time. Drs. Lalit Baja,  
Simon Hambidge, Ann-Christine Nyquist,  
and Gwendolyn Kerby use evidence-  
based research and flow charts for each  
presenting complaint or specific disorder  
to provide quick access to the  
information you need for effective  
decision making. With updated drug  
tables and revised algorithms, this  
streamlined new edition makes it even  
easier for you to diagnose and manage  
common clinical problems from infancy  
through adolescence. Rapidly access

guidance on diagnosis and management from algorithms for each clinical disorder. Treat the full range of diseases and disorders with comprehensive coverage of diagnosis, assessment of severity, and clinical management. Choose the best treatment for each case thanks to indications for surgical interventions as well as expensive diagnostic procedures Stay current on recent developments and make effective decisions for movement disorders, physical abuse in children, sexual abuse in children, eating disorders, ADHD, and other hot topics. Find answers quickly and easily with a new table of contents organized into two sections—Presenting Complaints and Specific Disorders—that reduces the need to flip between chapters. Tap into the diverse

perspectives of expert authors from all over the country. Get only the information you need in the streamlined new edition with shorter, more user-friendly flow diagrams and fewer specialized chapters.
