Only the best prepared are chosen to start the highly competitive multimillion-dollar training programs that transform aspiring candidates into U.S. military aviators. This fully updated edition of Barron's Military Flight Aptitude Tests provides would-be aviators in all five U.S. armed services with the competitive edge they will need to score their best and maximize their chances of being selected! This book is an effective, full-spectrum resource for officer candidates, ROTC cadets from all services, and current military members. Six full-length practice tests (two per service) with answers and explanations for every question get readers ready for the Air Force Officer Qualifying Test (AFOQT), the Selection Instrument for Flight Training (SIFT), and the Navy/Marine Corps/Coast Guard Aviation Selection Test Battery (ASTB-E). Test overviews and detailed review sections give potential pilots the boost they need to rise to the top of the selection list, and most of the review subjects apply to all three tests. Successful aviation applicants strongly recommend working through every valuable review section, and the other services' tests are great for extra practice to reinforce your learning. Written by a veteran, joint qualified military officer and instructor, this book's review sections cover language skills, reading comprehension, math knowledge, arithmetic reasoning, mechanical comprehension, aviation and nautical technical information, science, and specific mental skills such as block counting, finding hidden figures, and spatial apperception. The author also coaches readers on effective study techniques, provides expanded information resources, and gives pilot candidates a thorough preview of how each test is structured and conducted.

This e-book brings together 13 chapters written by aviation English researchers and practitioners settled in six different countries, representing institutions and universities from around the globe. This e-book is an offshoot of the 8th GEIA Seminar, that counts on the collaboration of GEIA and ICAEA researchers, as well as guest speakers. It brings together thirteen chapters focused on aviation language description, teaching, and assessment, written by practitioners from several institutions around the globe. One of our guests and a keynote speaker, Prof. Eric Friginal, added the excellent contribution of his graduate students from Georgia State University, in the USA, and kindly wrote the Preface. Regarding its content, this e-book has been divided into three parts, according to GEIA's areas of research: language description and analysis; aeronautical English teaching; and assessment practices. The studies collected in this e-book offer us enriching and enlightening discussions that support and promote a better understanding of some key features underlying aviation English language, teaching and assessment practices. We are very pleased to make part of this work. It goes without saying the importance of this e-book for the aviation English field and community. This international publication, besides collecting the studies and work experiences of renowned researches, has also contributed to strengthen the enriching partnership between GEIA members and other researchers. The fact of having been published as an e-book will certainly benefit its circulation and the spreading awareness of aviation English challenges, updates and findings. One of our goals is to spread the news, by making this ESP e-book free for download by as many people and institutions as possible worldwide. Those who place great weight on aeronautical English teaching and assessment practices are aware of the interwoven relation among operational issues, communication and safety. That's why we believe the discussions and analysis carried out throughout this book are so relevant and should reach international communities and organizations in all parts of the globe. Enjoy your reading! Patrícia Tosqui-Lucks Juliana de Castro Santana

This volume addresses the implications that academic interdisciplinarity in the field of English for Academic Purposes (EAP) and English for Specific Purposes (ESP) has for research and pedagogy with a global reach. The Editors present a coherent, research-supported analysis of the influence of interdisciplinary research and methods on the way academics collaborate on courses, develop their careers and teach students. The hitherto prevalence of disciplinary silo-like approaches to academic and scientific issues is increasingly ceding ground to an interdisciplinary synergy of different methodological and epistemological traditions. In the context of ongoing trends towards interdisciplinarity in degree programmes and the increasing popularity of such degree programmes with students (e.g., bioinformatics, computational linguistics, psycholinguistics, neuropolitics, evolutionary finance, global studies, and security studies), academics and programme administrators need awareness of the skills needed to operate in interdisciplinary contexts. Studies in this edited volume examine interdisciplinary communication practices, and identify how academic writing, teaching, language proficiency assessment and degree programmes are responding to changes in the broader social, institutional and political contexts of academia. As authors in the volume demonstrate, the discursive features, literacy practices and instructional modes, and the student experience of these emerging interdisciplines deserve systematic exploration. This insightful volume sheds light on contexts across the globe and will be used by students studying EAP and ESP pedagogy or practice; academics in the fields of applied linguistics and higher education, as well as higher education faculty and administrators interested in interdisciplinarity in degree programmes.

The Federal Aviation Administration (FAA) has published the Private Pilot - Airplane Airman Certification Standards (ACS) document to communicate the aeronautical knowledge, risk management, and flight proficiency standards for the private pilot certification in the airplane category, single-engine land and sea; and multiengine land and sea classes. This ACS incorporates and supersedes the previous Private Pilot Practical Test Standards for Airplane, FAA-S-8081-14. The FAA views the ACS as the foundation of its transition to a more integrated and systematic approach to airman certification. The ACS is part of the safety management system (SMS) framework that the FAA uses to mitigate risks associated with airman certification training and testing. Specifically, the ACS, associated guidance, and test question components of the airman certification system are constructed around the four functional components of an SMS: Safety Policy that defines and describes aeronautical knowledge, flight proficiency, and risk management as integrated components of the airman certification system; Safety Risk Management processes through which internal and external stakeholders identify and evaluate regulatory changes, safety recommendations and other factors that require modification of airman testing and training materials; Safety Assurance processes to ensure the prompt and appropriate incorporation of changes arising from new regulations and safety recommendations; and Safety Promotion in the form of ongoing

engagement with both external stakeholders (e.g., the aviation training industry) and FAA policy divisions. The FAA has developed this ACS and its associated guidance in collaboration with a diverse group of aviation training experts. The goal is to drive a systematic approach to all components of the airman certification system, including knowledge test question development and conduct of the practical test. The FAA acknowledges and appreciates the many hours that these aviation experts have contributed toward this goal. This level of collaboration, a hallmark of a robust safety culture, strengthens and enhances aviation safety at every level of the airman certification system.

**** WINNER OF ILTA/SAGE Best Book Award 2020 **** *Assessing English for Professional Purposes* provides a state-of-the-art account of the various kinds of language assessments used to determine people's abilities to function linguistically in the workplace. At a time when professional expertise is increasingly mobile and diverse, with highly trained professionals migrating across national boundaries to apply their skills in English-speaking settings, this book offers a renewed agenda for inquiry into language assessments for professional purposes (LAPP). Many of these experts work in high-risk environments where communication breakdowns can have serious consequences. This risk has been identified by governments and professional bodies, who implement language tests for gate-keeping purposes. Through a sociological lens of risk and responsibility, this book: provides a detailed overview of both foundational and recent literature in the field; offers conceptual tools for specific purpose assessment, including a socially oriented theory of construct; develops theory and practice in key areas, such as needs analysis, test development, validation and policy; significantly broadens the scope of the assessment of English for professional purposes to include a range of assessment practices for both professionals and laypeople in professional settings. *Assessing English for Professional Purposes* is key reading for researchers, graduate students and practitioners working in the area of English for Specific Purposes assessment.
