Ethical Decision Making: Introduction to Cases and Concepts in Ethics Cambridge University Press

How do lawyers resolve ethical dilemmas in the everyday context of their practice? What are the issues that commonly arise, and how do lawyers determine the best ways to resolve them? Until recently, efforts to answer these questions have focused primarily on rules and legal doctrine rather than the real-life situations lawyers face in legal practice. The first book to present empirical research on ethical decision making in a variety of practice contexts, including corporate litigation, securities, immigration, and divorce law, Lawyers in

Practice fills a substantial gap in the existing literature. Following an introduction emphasizing the increasing importance of understanding context in the legal profession, contributions focus on ethical dilemmas ranging from relatively narrow ethical issues to broader problems of professionalism, including the prosecutor's obligation to disclose evidence, the management of conflicts of interest, and loyalty to clients and the court. Each chapter details the resolution of a dilemma from the practitioner's point of view that is, in turn, set within a particular community of practice. Timely and practical, this book should be required reading for law students as well as students and scholars of law and society.

Making Ethical Decisions Springer Science & Business Media

This text provides a unique collection of case studies across a wide range of organizations (higher education, K-12 education, military, state and local government administration, non-profit institutions, and agency management, etc.). These cases examine ethical decision-making and organizational and leadership behavioral concepts that are practiced in these organizations. The cases cover topics facing our workforce today and ask the reader to solve the dilemma. Through a discussion of these cases, students apply decision making and organizational and leadership strategies to analyze each case and therefore gain a better understanding of how to effectively lead and manage within their organizations. This text challenges students to think critically and analytically. Students are encouraged to reflect on options a practitioner could use to solve the problem. All of the cases end with an open scenario and a set of questions,

allowing students to offer a wide range of opinions and participate in reflective and robust discussions. The essential guide for ethical decision-making in the 21st century. It's not your imagination: we're living in a time of moral decline. Publicly, we're bombarded with reports of government leaders acting against the welfare of their constituents; companies prioritizing profits over health, safety, and our best interests; and technology posing risks to society with few or no repercussions for those responsible. Personally, we may be conflicted about how much privacy to afford our children on the internet; how to make informed choices about our purchases and the companies we buy from; or how to handle misconduct we witness at home and at work. How do we find a way forward? Today's ethical challenges are increasingly gray, often without a clear right or wrong solution, causing us to teeter on the edge of effective decision-making. With concentrated power structures, rapid advances in technology, and insufficient

regulation to protect citizens and consumers, ethics are harder to understand than ever. But in *The Power of Ethics*, Susan Liautaud shows how ethics can be used to create a sea change of positive decisions that can ripple outward to our families, communities, workplaces, and the wider world—offering unprecedented opportunity for good. Drawing on two decades as an ethics advisor guiding corporations and leaders, academic institutions, nonprofit organizations, and students in her Stanford University ethics courses, Susan Liautaud provides clarity to blurry ethical questions, walking you through a straightforward, four-step process for ethical decision-making you can use every day. Liautaud also explains the six forces driving virtually every ethical choice we face. Exploring some of today's most challenging ethics dilemmas and showing you how to develop a clear point of view, speak out with authority, make effective decisions, and contribute to a more ethical world for yourself and others, *The Power of Ethics* is the must-have ethics guide for the 21st century.

The *Journal of Business Ethics* was founded by Alex C. Michalos and Deborah C. Poff and published its first issue in March 1982. It is the most frequently cited business ethics journal in the world. The Journal has always offered a multi-disciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral virtue. Its authors and readers are primarily scholars and students in social sciences and philosophy, with special interests in the interaction of these disciplines with business or corporate

responsibility. Since the field of business ethics grew simultaneously with the growth of the Journal, a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development. In this anniversary volume, an overview of citation classics from the Journal is presented, the 33 most frequently cited articles are reproduced and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and/or distinguished papers, as well as those who served on the Editorial Board and/or are recognized as leaders in the field.

Ethical Decision Making for the 21st Century Counselor SAGE Publications, Incorporated

Many counselors learn about ethics in graduate school by applying formal, step-by-step ethical decision-making models that require counselors to be aware of their values and refrain from imposing personal values that might harm clients. However, in the real world, counselors often make split-second ethical decisions based upon personal values. *Values and Ethics in Counseling* illustrates the ways in which ethical decisions are values—but more than that, it guides counselors through the process of examining their own values and analyzing how these values impact ethical decision making. Each chapter presents ethical decision making as what it is: a very personal, values-laden process, one that is most effectively illustrated through the real-life stories of counselors at various stages of professional development—from interns to seasoned clinicians—who made value-based decisions. Each story is followed by commentary from the author as well

as analysis from the editors to contextualize the material and encourage reflection.

How to Make Good Choices in a Complicated World Springer Publishing Company

In commerce, many moral failures are due to narrow mindsets that preclude taking into account the moral

dimensions of a decision or action. In turn, sometimes these mindsets are caused by failing to question managerial decisions from a moral point of view, because of a perceived authority of management. In the 1960s, Stanley Milgram conducted controversial experiments to investigate just how far obedience to an authority figure could subvert his subjects' moral beliefs. In this thought-provoking work, the authors examine the prevalence of narrow mental models and the phenomenon of obedience to an authority to analyse and understand the challenges which business professionals encounter in making ethical decisions. Obstacles to Ethical Decision-Making proposes processes - including collaborative input and critique - by which individuals may reduce or overcome these challenges. It provides decision-makers at all levels in an organisation with the means to place ethical considerations at the heart of managerial decision-making.
