Over the past few years the hospitality industry has become a lot more sustainable than it used to be. However, the industry's contribution to the sustainable development of our societies is still significantly smaller than it could be. This book specifically addresses the links between operations, tactics and strategy from a sustainable development perspective and moves beyond describing what is to reflect on what could be or even what should be, thus providing students with a concise guide for improving sustainability concepts and businesses in the hospitality industry. Each chapter uses specific cases and examples to reflect on different ways in which sustainability principles can be used for revisiting the host-guest relationship and improving the industry's business processes and models. In doing so, the book provides current and future professionals with guidelines, inspiration and a call for action to take sustainability within the hospitality industry to the next level, based on inclusiveness, equality and a sustainable relationship with our natural environment.

The decisions a corporation makes affect more than just its stakeholders and can have wide social, environmental, and economic consequences. This facilitates a business environment built around the practical regulations and transparency necessary to ensure ethical and responsible business practice. Corporate Social Responsibility: Concepts, Methodologies, Tools, and Applications is a vital reference source on the ways in which corporate entities can implement responsible strategies and create synergistic value for both businesses and society. Highlighting a range of topics such as company culture,

organizational diversity, and human resource management, this multi-volume book is ideally designed for business executives, managers, business professionals, human resources managers, academicians, and researchers interested in the latest advances in organizational development.

Environmental management is essential to the successful operation of the hospitality businesses. This book simplifies the complex issue of environmental management for both students of hospitality and industry practitioners (such as hotel managers and restaurateurs). The study explains how global environmental problems affect the hospitality industry and vice versa. It also outlines the processes that should be followed in environmental management, and the specific environmental management practices of hospitality businesses in the areas of waste management, energy and water conservation. The book provides practical illustrations, review questions, and lists of keywords and concepts in each chapter. It provides a global perspective on the study of environmental management in the hospitality industry by drawing on success stories and previous research on the topic from across the globe.

It is now widely agreed that the climate is changing, global resources are diminishing and biodiversity is suffering. Developing countries – many of them considered by the World Tourism Organization to be 'Top Emerging Tourism Destinations' (UNWTO, 2009) – are already suffering the full frontal effect of environmental degradation. The challenge for developing countries is a triple-edged sword, how can economic prosperity be achieved without the perpetual depletion of nature's reserves, the destruction of rural habitat and the dislocation of traditional societies? Many emerging nations are looking increasingly to the tourism industry as the motor for economic development, with hospitality businesses at the forefront. This book uses twenty-five case studies to demonstrate how it is possible to create income and stimulate regional socio-economic development by using sustainable hospitality and tourism attractions. These case studies focus on issues such as the protection of indigenous cultures as a source of touristic curiosity; the preservation of the environment and the protection of endangered species – such as the plight of turtles in Sri Lanka or butterflies in Costa Rica to encourage tourism. Some cases cover government supported projects, for example, the green parks venture and regional tourism development in the Philippines, an archaeological park initiative in Honduras and the diversity of nature tourism in St. Vincent. Sustainable Hospitality and Tourism as Motors for Development is designed to give students, academics and practitioners a guide for best practices of sustainable hospitality operations in developing countries. Based on case studies, it provides a road map of how to achieve the goals of sustainability giving benchmark examples. The book not only taps into a contemporary business subject, but aims to provide readers with a better understanding of how sustainable theories can be put into practice in hospitality and tourism industries in developing countries.

"... an important intervention in the conversation around social and ecological sustainability that draws on both micromarketing and macromarketing scholarship to help the reader understand the challenges with illustrations from insightful cases both from emerging and developed economies. This compilation should be essential reading for the discerning student of sustainable consumption and production." -- Professor Pierre McDonagh, Associate Editor, *Journal of Macromarketing* (USA); Professor of Critical Marketing & Society, University of Bath, UK Experts in the field of economics, management science, and particularly in the marketing domain have always been interested in and acknowledged the importance of sustaining profitable businesses while incorporating societal and environmental concerns; however, the level of existing literature and availability of teaching cases reflect a dearth of real case studies, especially those focused on marketing for social good. This book of actual case studies will address that need. In addition, this book is important and timely in providing a case book for instructors (those in both industry and academia) to help them in teaching and training the next generation of leaders through corporate training and universities. Currently, marketing for social good is increasingly becoming a part of most curriculums under the umbrella of different titles, such as social marketing, green marketing, and sustainability marketing. The relevance of these studies is increasing across the globe. This book is composed of long and short real cases with varying complexity in different sectors. This case book will also cover some review articles for an overview of the recent developments in the study area. With these case studies, collections of questions, teaching materials, and real-life marketing scenarios, this book offers a unique source of knowledge to marketing professionals, students, and educators across the world. The main objective of this case book is to understand the applicability of marketing science (marketing for social good context, such as social marketing and sustainability marketing) in internet marketing related to e-buying behavior and e-WOM. In addition, it illustrates the various types of existing marketing practices that are relevant from both theoretical and practical points of view in this electronic era, as well as discussing other non-electronic marketing practices and focusing on consumer buying behavior. As a result, marketing managers can treat their customers according to their desired value. This book particularly explores the possibilities and advantages created by social marketing and sustainability marketing through the presentation of thorough review articles and case studies. This case book helps corporate training centers and universities with compact teaching reference materials in their relevant courses.

Strategies for Promoting Sustainable Hospitality and Tourism Services Sustainability in the Hospitality Industry 2nd Ed Principles of Sustainable Operations

The hospitality sector is facing increasing competition and complexity over recent decades in its development towards a global industry. The strategic response to this is still that hospitality companies try to grow outside their traditional territories and domestic markets, while the expansion patterns and M&A activities of international hotel and restaurant chains reflect this phenomenon. Yet, interestingly, the strategies, concepts, and methods of internationalization as well as the managerial and organizational challenges and impacts of globalizing the hospitality business are under-researched in this industry. While the mainstream research on international management offers an abundance of information and knowledge on topics, players, trends, concepts, frameworks, or methodologies, its ability to produce viable insights for the

hospitality industry is limited, as the mainstream research is taking place outside of the service sector. Specific research directions and related cases like the international dimensions of strategy, organization, marketing, sales, staffing, control, culture, and others to the hospitality industry are rarely identifiable so far. The core rationale of this book is therefore to present newest insights from research and industry in the field of international hospitality, drawing together recent scientific knowledge and state-of-the-art expertise to suggest directions for future work. It is designed to raise awareness on the international factors influencing the strategy and performance of hospitality organizations, while analyzing and discussing the present and future challenges for hospitality firms going or being international. This book will provide a comprehensive overview and deeper understanding of trends and issues to researchers, practitioners, and students by showing how to master current and future challenges when entering and competing in the global hospitality industry.

Experiences are an important part of our lives and increasingly represent a crucial topic to address for businesses and professionals. This book focuses on designing, staging and managing experiences within the context of the events, tourism and hospitality industries. It also illustrates current and future developments in these industries and wider society, with an emphasis on sustainable development. The book offers an innovative approach for successfully creating experiences for (potential) customers that is based on combining insights and methods from the world of design and the social sciences. Moreover, it shows how the experience economy and sustainable development both reinforce one another and create challenges that businesses and professionals can address through this approach. Critical thinking questions, practical examples and international case studies are integrated throughout the text. Combining a design science and a social sciences perspective in one inclusive hands-on approach to designing, staging and managing experiences, this is essential reading for all students of Events, Tourism and Hospitality Management, but also related fields.

A Casebook for Reaching Your Socially Responsible Consumers through Marketing Science World Tourism Organization Publications

There is increasing public and academic interest in local and sustainable foods and food tourism. These interests have been reflected in such diverse elements as the growth of farmers markets, green restaurants, food miles, carbon and sustainability labelling, concerns over food supply and security, Slow Food, Fair Trade, and a desire to buy and 'eat locally'. Food related hospitality and tourism is integral to this process because of the way in which it simultaneously acts to globalise and localise food consumption and create new foodways and commodity chains. This book therefore aims to provide an integrated understanding of the contemporary interest in food and food tourism through the use of an international collection of illustrative case study chapters as well as the provision of a novel integrative framework for the book, a sustainable culinary system. This is the first volume to examine the concept of sustainable culinary systems, particularly with specific reference to tourism and hospitality. Divided into two parts, firstly the notion of the local is explored, reflecting the increased interest in the championing of local food production and consumption. Secondly treatment of sustainability in food and food tourism and hospitality in settings that reach beyond the local in a business and socio-economic sense is reviewed. The book therefore, reflects much of the contemporary public interest in the conscious or ethical consumption and production food, as well as revealing the inherent tensions between local and broader goals in both defining and achieving sustainable culinary systems and the environmental, social and economic implications of food production and consumption. This book provides the reader with an integrated approach to understanding the subject of how culinary systems may be made more sustainable and will be valuable reading to all those interested in sustainable food and food tourism.

Sustainability in the Hospitality Industry Routledge

This handbook analyzes the main issues in the field of hospitality marketing by focusing on past, present and future challenges and trends from a multidisciplinary global perspective. The book uniquely combines both theoretical and practical approaches in debating some of the most important marketing issues faced by the hospitality industry. Parts I and II define and examine the main hospitality marketing concepts and methodologies. Part III offers a comprehensive review of the development of hospitality marketing over the years. The remaining parts (IV-IX) address key cutting-edge marketing issues such as innovation in hospitality, sustainability, social media, peer-to-peer applications, Web 3.0 etc. in a wide variety of hospitality settings. In addition, this book provides a platform for debate and critical evaluation that enables the reader to learn from the industry's past mistakes as well as future opportunities. The handbook is international in its constitution as it attempts to examine marketing issues, challenges and trends globally, drawing on the knowledge of experts from around the world. Because of the nature of hospitality, which often makes it inseparable from other industries such as tourism, events, sports and even retail, the book has a multidisciplinary approach that will appeal to these disciplines as well as others including management, human resources, technology, consumer behavior and anthropology.
