Work This is a new release of the original 1943

edition. Encyclopedia of Knots Encyclopedia of Knots and Fancy Rope Work

Unlike many texts on the subject, this valuable, revised and expanded second edition of the popular instruction manual for novice rawhide workers assumes no prior knowledge or experience. In over 180 drawings and

photographs, the reader is shown every step of the process, beginning with a fresh cowhide, continuing through cutting strings and braiding, and ending with finished reatas, bosals, hobbles, or reins. Along the way, the author discusses the readily available tools and implements needed, which the beginner can make by following the included directions.

The chapters on braiding provide simple techniques for producing many basic patterns, which may then be modified or enlarged to yield endless variations. Users or collectors of braided rawhide will value the book for its system of specific things to look for when buying materials, how to care for them, and

how each item was produced in the past.

The ways of magic are revealed in nature . . . The secrets are written in meandering streams and drifting clouds, whispered by the roaring ocean and cooling breeze, echoed through caves and rocks and forests. When you draw a heart in the sand, call on the four winds for assistance, or ask the rain to wash away a bad habit, you are practicing earth magic. By working in harmony with nature, we can

transform ourselves, our lives, and our world. This tried-and-true guide offers more than one hundred spells, rites, and simple rituals you can perform using the powerful energy of the earth.

Scott Cunningham was a greatly respected teacher and one of the most influential members of the modern Craft movement. A practitioner of elemental magic for twenty years, he wrote more than fifty books, including the seminal *Wicca: A Guide for the Solitary Practitioner*.

**The Splicing Handbook, Third Edition** London :

Blackie and son  
The needlework called Tatting in England, Frivolité in French, and Frivolitäten in German, is a work which seems, from all accounts, to have been in favour several generations ago. Modern ingenuity has discovered some

ways of improving on the original plan of tatting, which was, indeed, rather a primitive sort of business as first practised. To Mrs. Mee, one of our most accomplished artistes in all matters connected with the work-table, belongs, we believe, the introduction of the plan of working from the reel instead of the shuttle. By this alteration the advantage of the shuttle being constantly kept filled with cotton was gained, and the necessity also obviated for frequently joining the thread; and to Mdlle. Riego, equally distinguished in all details appertaining to the employment of the needle, ladies are indebted for an

arrangement by which the same thread used in the making of the pattern is used for fastening the work.
