Jaguar Cars Veloce Publishing Ltd
 This pocket-sized, illustrated guide covers every significant make and model of car sold in Europe and North America during the 2006-2007 model

year, from giants like Ford and VW to small-scale manufacturers such as Morgan and Noble. Each model is pictured in color, with a data table providing vital statistics to enable comparisons between models. Providing full details for over 700 cars and stretching to 400 pages, this is a must-have reference source and a useful "spotter's guide" for all car enthusiasts.

The Power Report Macmillan

This book tells the fascinating, and sometimes frustrating, story of the journey from the iconic Jaguar E-type to its successor, the F-type. With nearly 300 photographs, it documents the evolution of the F-type from the Pininfarina XJ Spider through Jaguar's own XJ41/42, XX and XK180. It reviews the whole range of F-type convertible and coupe models and discusses the wild Project 7 and the latest turbo-charged four-cylinder cars. The special vehicles produced for Team Sky and Bloodhound SSC are included along with a useful chapter on buying an F-type. Finally, the book considers the F-type's future in a changing automotive world.

This reference book is a complete guide to the trends and leading companies in the engineering, research, design, innovation and development business fields: those firms that are dominant in engineering-based design and development, as well leaders in technology-based research and development. We have included companies that are making significant investments in research and development via as many disciplines as possible, whether that research is being funded by internal investment, by fees received from clients or by fees collected from government agencies. In this carefully-researched volume, you'll get all of the data you need on the American Engineering & Research Industry, including: engineering market analysis, complete industry basics, trends, research trends, patents, intellectual property, funding, research and development data, growth companies, investments, emerging technologies, CAD, CAE, CAM, and more. The book also contains major statistical tables covering everything from total U.S. R&D expenditures to the total number of scientists working in various disciplines, to amount of U.S. government grants for research. In addition, you'll get expertly written profiles of nearly 400 top Engineering and Research firms - the largest, most successful corporations in all facets of Engineering and Research, all cross-indexed by location, size and type of business. These corporate profiles include contact names, addresses, Internet addresses, fax numbers, toll-free numbers, plus growth and hiring plans, finances, research, marketing, technology, acquisitions and much more. This book will put the entire Engineering and Research industry in your hands. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.
