Modern Jewish
philosophy
emerged in
the
seventeenth
century, with
the impact of
the new
science and
modern
philosophy on
thinkers who
were
reflecting
upon the
nature of
Judaism and

Jewish life. This collection of essays examines the work of several of the most important of these figures, from the seventeenth to the late-twentieth centuries, and addresses themes central to the tradition of modern Jewish philosophy: language and revelation, autonomy and authority, the problem of evil, messianism, the influence of Kant, and feminism. Included are essays on Spinoza, Mendelssohn, Cohen, Buber, Rosenzweig, Fackenheim, Soloveitchik, Strauss, and Levinas. Other thinkers discussed include Maimon, Benjamin, Derrida, Scholem, and Arendt. The sixteen original essays are written by a world-renowned group of scholars especially for this volume and give a broad and rich picture of the tradition of modern Jewish philosophy over a period of four centuries.

An accessible, comprehensive, and high quality companion to legal philosophy written by a stellar cast of international contributors.

Heidegger Cambridge University Press

Heidegger is perhaps the most influential, yet least readily understood, philosopher of the last

century. Mark A. Wrathall unpacks Heidegger's dense prose and guides the reader through Heidegger's early concern with the nature of human existence and his later preoccupation with the threat that technology poses to our ability to live worthwhile lives. Wrathall pays particular attention to Heidegger's revolutionary analysis of human existence as inextricably

shaped by a shared world. This leads to an exploration of his views on the banality of public life and the possibility of authentic anticipation of death as a response to that banality. Wrathall reviews Heidegger's scandalous involvement with National Socialism, situating it in the context of his views about the movement of world history. He also explains Heidegger's important accounts of truth, art and

language. Extracts are taken from Heidegger's magnum opus, *Being and Time*, as well as a variety of his best-known essays and lectures. **Being and Time** Wm. B. Eerdmans Publishing In *Modernism, Narrative and Humanism*, Paul Sheehan attempts to redefine modernist narrative for the twenty-first century. For Sheehan modernism presents a major form of critique of the fundamental

presumptions of humanism. By pairing key modernist writers with philosophical critics of the humanist tradition, he shows how modernists sought to discover humanism's inhuman potential. He examines the development of narrative during the modernist period and sets it against, among others, the nineteenth-century philosophical writings of Schopenhauer, Darwin and Nietzsche.

Focusing on the major novels and poetics of Conrad, Lawrence, Woolf and Beckett, Sheehan investigates these writers' mistrust of humanist orthodoxy and their consequent transformations and disfigurations of narrative order. He reveals the crucial link between the modernist novel's narrative concerns and its philosophical orientation in a book that

will be of compelling interest to scholars of modernism and literary theory. The Cambridge Companion to Simone de Beauvoir Cambridge University Press Exploring the full range of Husserl's work, these essays reveal just how systematic his philosophy is. An underlying theme is resistance to the idea, current in much intellectual history, of a radical break

between "modern" and "postmodern" philosophy, with Husserl as the last of the great Cartesians. The Cambridge Companion to Nietzsche Cambridge University Press

The significance of Friedrich Nietzsche for twentieth century culture is now no longer a matter of dispute. He was quite simply one of the most influential of modern thinkers. The opening essay

of this 1996 Companion provides a chronologically organised introduction to and summary of Nietzsche's published works, while also providing an overview of their basic themes and concerns. It is followed by three essays on the appropriation and misappropriation of his writings, and a group of essays exploring the nature of Nietzsche's philosophy and its relation to the modern and

post-modern world. The final contributions consider Nietzsche's influence on the twentieth century in Europe, the USA, and Asia. New readers and non-specialists will find this the most convenient, accessible guide to Nietzsche currently available. Advanced students and specialists will find a conspectus of recent developments in the interpretation of Nietzsche.

aesthetics, as well as his work on history, commitment, and progress; a final section considers Sartre's relationship to structuralism and deconstruction. Providing a balanced view of Sartre's philosophy and situating it in relation to contemporary trends in Continental philosophy, the volume shows that many of the topics associated with Lacan, Foucault, Levi-Strauss, and Derrida are to

be found in the work of Sartre, in some cases as early as 1936. A special feature of the volume is the treatment of the recently published and hitherto little studied posthumous works.

Heidegger's Being and Time: Critical Essays provides a variety of recent studies of Heidegger's most important work. Twelve prominent scholars, representing diverse nationalities, generations, and interpretive approaches deal with general methodological and ontological questions,

particular issues in Heidegger's text, and the relation between Being and Time and Heidegger's later thought. All of the essays presented in this volume were never before available in an English-language anthology. Two of the essays have never before been published in any language (Dreyfus and Guignon); three of the essays have never been published in

English before (Grondin, Kisiel, and Thomä), and two of the essays provide previews of works in progress by major scholars (Dreyfus and Kisiel).

The Cambridge Companion to Hermeneutics Cambridge University Press

The Essence

of Truth must count as one of Heidegger's most important works, for nowhere else does he give a comparably thorough explanation of what is arguably the most fundamental and abiding theme of his entire philosophy, namely the difference between truth as the "unhiddenness of beings" and truth as the "correctness of propositions". For Heidegger, it is by

neglecting the former primordial concept of truth in favor of the latter derivative concept that Western philosophy, beginning already with Plato, took off on its "metaphysical" course towards the bankruptcy of the present day. This first ever translation into English consists of a lecture course delivered by Heidegger at the University of Freiburg in 1931-32. Part One of the course

provides a detailed analysis of Plato's allegory of the cave in the Republic, while Part Two gives a detailed exegesis and interpretation of a central section of Plato's Theaetetus, and is essential for the full understanding of his later well-known essay Plato's Doctrine of Truth. As always with Heidegger's writings on the Greeks, the point of his interpretative

method is to bring to light the original meaning of philosophical concepts, especially to free up these concepts to their intrinsic power.
