The pain of deceit was fresh, but love and desire overruled everything else. Now, Aria and Aiden face their greatest challenge yet. Aria Cason's life took an unexpected turn when she reconnected with Aiden Raine, the man who awakened a pure and undeniable love she'd thought was lost forever. Aria's love for him burns deep, yet he still pushes for more--the total surrender of her heart. When a painful memory becomes her guiding light, she questions if a happily ever after really exists for a girl who never wanted one. After stepping away from his birthright, Aiden's need to protect his new family becomes his top priority. Fragile bonds are soon stretched to the breaking point as his need for vengeance threatens to destroy the very thing he's come to value most. When his unyielding determination starts to push Aria away, he presents her with a challenge that will test them both. Will the searing passion that reunited this couple keep them

together, or will it burn them to ash? Ties will be broken. Lies will become the truth. Aria and Aiden's heart-wrenching story continues in the fifth book of The Untouched Series, Only His Touch, Part Two.

Find Out Anything From Anyone, Anytime by James O. Pyle and Maryann Karinch (Summary) J.M. Walker

An ex-hacker, a sexy college professor, stolen top secret hardware, a cover-up, a kidnapping, a government conspiracy, hacked defense computers, FBI, CIA, NSA, Armageddon. An excerpt from the actual deposition transcripts: "Let the record reflect that this deposition commenced at 9:15 am on December the 3rd, 2004 at the FBI offices in Atlanta, Georgia. Present for this recording are Special Agent Alvin Dirk, the Honorable Judge Ramiro Vasquez, and the witness, Robert O. Blain. This deposition is merely a recording of the events which transpired at Norwood University and is not now nor ever will be part of any trial or prosecution. Go

ahead." "My name is Bobby Blain. Most people seem to think it all started when Dr. Jennings hired me, and all the computers started getting hacked. It was easy for people to think that, because I have a history and got myself in some trouble when I was younger. I hacked some computers and almost got the president impeached, but it really started before that, when I still worked for Dr. Karlyn." "Dr. Karlyn gave me a chance to redeem myself by allowing me to work on his computer for him. Then one day, this scientist I had never seen before comes and gives Dr. Karlyn a device. I was never told what he wanted, but I think he wanted Dr. Karlyn to help him reverse engineer it. I was only asked to build an interface to attach it to the computer. Dr. Karlyn did the rest. I think he figured out how to turn it on, but when he did, strange things started to happen." "We didn't know it then, but it turns out the device was stolen from a government facility. I don't know where they got it, that is more classified than this deposition. I can tell you with absolute certainty that they didn't make it themselves. I'd like to tell you more, but I don't think I'm allowed." "Anyway, someone at the university needed to get Dr. Karlyn out of the way and falsely accused him of inappropriate conduct with a student. He could have fought it, the dean believed him, but he decides to leave the school anyway. Before he goes, he gives his computer to Professor Jennings and he gives me a letter of recommendation, so after I help deliver and setup the computer, she agrees to hire me." "The first night it is up and running, at least two attempts are made to hack into the computer. I forgot to mention that even before I deliver the computer, this guy tries to break in and steal something from it, but I was there

and he didn't get anything." "I can't divulge any secrets about Professor Jennings' project here, but my part is to prove that her process would work if she were given enough computer resources, so I re-write her process to work across a network and run on thousands of computers." "That's when things got really crazy. Someone keeps trying to hack into our computer; someone hacks the entire school and the phone company. Professor Jennings' secretary is kidnapped. The FBI gets involved, but they're chasing the wrong people for reasons only they can tell you." "Then someone plants a virus on our computer and the next thing we know, it's spread all over the internet, including some very sensitive government computers. Meanwhile, our project continues to gain speed and surpass anyone's expectations." "When the FBI come in and learn that the device that was given to Dr. Karlyn is actually some super cool futuristic computer that is able to grow and build more circuits for itself, they want to disconnect the computer and confiscate it." "That's when computers all over the world go out of control. The pentagon and all the armed forces are helpless. Air traffic is grounded. All the computer problems are traced back to the professor's computer. The FBI want it dismantled more than ever, but the academics involved want to get the device to relinquish control over the world before they do." "And, well, I guess that's all I'm allowed to say, thank you."

Here are two more stories about earths future. One is in the near future and the other as far in the future as Earth can get. The Boson Experiment was the brainchild of Abby McGovern, who was trying to create an artificial black hole. Her world was turned upside down when she met someone who was her direct opposite, a ghost hunter. The two never imagined that they would both eventually be chasing the same thing. In *Earths End*, the Earth is about to be swallowed up by the now-expanding sun. Only three religions still survived, and science was one of them. The two religions, Christianity and Islam, accepted that this was the end of the human race and readied themselves to meet their makers. Science instead proposed leaving Earth and traveling to a distant planet as the last hope for humanity. Just how will they survive the journey for so many years? Will the human race live long enough to reach this new world?
