Needham's Visual Complex Analysis will show you the field of complex analysis in a way you almost certainly have not seen before. Drawing on historical Review of Visual Complex Analysis, by Tristan Needham I find that because of Needham's mainly visual approach it is a good idea always to look for simple ways to solve the exercises. That's what he is looking for in my opinion. Looking at $|z - c| = R$ made me think of circles because I know that c and R are often used as centre and radius of circles, and also this equation reads to me as: Visual Complex Analysis: Visual Complex Analysis Needham - Visual Complex Analysis Whittaker and Watson - A Course in
