The Maya calendar started on August 11, 3114 BCE (corresponding date in the proleptic Gregorian calendar) and will end on December 21 2012. Will it be Armageddon or just another day? The believers are making survival preparations and turning to religious leaders for guidance and solace. Follow National Geographic through the maze of doomsday prophets, cult leaders, and international and historic end times teachings to understand the science behind the Maya calendar and the phenomenon of Armageddon predictions. Scientists and historians know that end-of-days thinking has occurred throughout time around the world. Norse mythology predicted the world would be submerged in water; ancient Greeks believed that Zeus's defeat by his son would be the grand finale. In A.D. 79, Romans thought Mount Vesuvius's eruption in Pompeii was the start of the apocalypse. Jewish, Christian, and Islamic texts all include some writing about end times. The year 1666—feared by many Christians—proved itself to be the year of the Beast when the Great Fire of London visited God's wrath (as widely believed) on the British. Hailey's Comet drove Europeans and Americans into apocalyptic fits in 1910. Individual charismatic figures have led thousands in unfulfilled Armageddon watches. For example, in 1843, spiritual leader William Miller's doomsday

prediction failed (The Great Disappointment), but led followers to establish the Seventh Day Adventists. The Jehovah's Witnesses awaited the world's end in 1914. Preacher Jim Jones led hundreds of cult members to commit suicide in Ghana in the 1970s. Pat Robertson was certain Jesus was returning for the Rapture in the 1980s. The leader of the cult Heaven's Gate convinced 39 followers to commit suicide to escape imminent destruction in 1997. And there's no sign of a slow down. In fact, the Internet has spawned a plethora of doomsday cult leaders, from Y2K hysterics to the most recent religious figure Harold Camping, whose rapture predictions of 2011 left his followers earth-bound. National Geographic debunks the myth and illuminates the fascinating realities of the Maya calendar, the 2012 phenomenon, and Armageddon prophecies through the ages.

 Bestselling author Barbara Hand Clow shows how the Mayan Calendar is a bridge to galactic wisdom that fosters personal growth and human evolution • Unearths the meaning behind the calendar, its message for modern civilization, and what will happen when the calendar ends • Reveals how time acceleration is a manifestation of the acceleration of consciousness • By the

author of *The Pleiadian Agenda* The Mayan Code is a deep exploration of how, as we approach the end of the Mayan Calendar, time and consciousness are accelerating, giving us a new understanding of the universe. Using Carl Johan Calleman's research, as well as the ideas of other Mayan Calendar scholars, Barbara Hand Clow examines 16.4 billion years of evolution to decode the creative patterns of Earth--the World Mind. These great patterns culminate in 2011, and then during 2012 major astrological influences will inspire us to attain oneness and enlightenment. The Mayan Code shows how the time cycles of the Calendar match important periods in the evolutionary data banks of Earth and the Milky Way Galaxy. These stages of evolution are converging during the final stage of the Calendar, the period between 1999 and 2011. War and territoriality, resource management and separation from nature, are all part of daily events we must process during these few short years: evidence of the tightening spiral of time that we experience as time speeding up. Barbara Hand Clow counsels that our own personal healing is the most important factor as we prepare to make this critical leap in human evolution--now referred to as the awakening of the World Mind.

These four discourses in 2012 are just that, formal conversations. They are related to the Mayan Calendar's end of a very important time group. There have been many books, websites, and organizations formed around the Mayan Calendar and the Mayans themselves. The contemporary groups of indigenous people of Central America who are generally considered to be decedents of the ancient Mayans are the constant study of individuals and organizations ranging from serious academics to interloping practitioners of Mayan life and Mayan spirituality. These discourses are a very different vision of the Mayan Calendar's end of time. Professor bell suggests a unique action that 2012 presents to you. Eschewing the usual apocalyptic predictions, the discourses offer a genuine gift from America's indigenous visionaries.

A contemporary and practical guide to Mayan astrological techniques • Discusses the logic and meaning of the 20 day-signs of the Mayan calendar • Explains the many cycles of Mayan astrology, such as the 9-day cycle of the Night Lords and the 13-day trecena • Contains extensive tables of Mayan astrological data, allowing readers to cast their own Mayan horoscopes How to Practice Mayan Astrology presents a contemporary guide to one of the most sophisticated astrological systems ever developed. Like other ancient peoples, the Maya looked to the cycles of the planets as markers of time and designators of order. The predictable cycles they observed became codified in the Mayan calendar and astrological system as a way of organizing the seeming chaos of human life. Mayan astrology is based on 20 named days that are cycled 13 times to create a 260-day calendar, the Tzolkin. The authors explain the symbolism, logic, and meaning of the 20 day-signs; how these signs reflect 260 possible personality types; and how they can be used for divination. They also explain the important role of the Four Directions and the planet Venus in

one's personality matrix and life issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.

The Book of Revelation tells of angels who fall from their heavenly estates. The Mayan calendar foretells the fall to some two hundred thousand years ago. The discord that followed sent repercussions to earth, arriving about nine thousand years ago when the first generation of the human race Israel emerged. By 4500 BC, an Agenda of a Snake from the fallen angels began to breed the biblical lines of Cain and Seth. Soon, the third generation emerged, and the conditions man calls good and evil began proliferating on the earth. Man's spirit commenced through the spirit of the angel Michael, but today it remains trapped within the human mind. Six thousand years ago, the angels Michael, Ra, Viracocha, and Ra Agenda came to earth to free man's spirit by attempting to prevent the creation of the human race. Unsuccessful, they left earth, bequeathing the Mayan calendar, which contains information about the five Ages, to the Mayan people. The Ra Agenda reemerged by 1948 as the mysterious UFO that defied the laws of reality. They have come to secretly assist mankind through the approaching shift in human consciousness scheduled to occur in the fifth Mayan Age of Aquarius in the year 2040.

Reveals the Mayan calendar to be a spiritual device that describes the evolution of human consciousness from ancient times into the future • Shows the connection between cosmic evolution and actual human history • Provides a new science of time that explains why time not only seems to be speeding up in the modern world but is actually getting faster • Explains how the end of the Mayan calendar is not the end of the world, but a path toward enlightenment The prophetic Mayan calendar is not keyed to the movement of planetary bodies. Instead, it functions as a metaphysical map of the evolution of consciousness and records how spiritual time flows--providing a new science of time. The calendar is associated with nine creation cycles, which represent nine levels of consciousness or Underworlds on the Mayan cosmic pyramid. Through empirical research Calleman shows how this pyramidal structure of the development of consciousness can explain things as disparate as the common origin of world religions and the modern complaint that time seems to be moving faster. Time, in fact, is speeding up as we transition from the materialist Planetary Underworld of time that governs us today to a new and higher frequency of consciousness--the Galactic Underworld--in preparation for the final Universal level of conscious enlightenment. Calleman reveals how the Mayan calendar is a spiritual device that enables a greater understanding of the nature of conscious evolution throughout human history and the concrete steps we can take to align ourselves with this growth toward enlightenment.
