In Mordin On Time, Nick Mordin sets out
his method for answering the most
fundamental question facing punters in
any race, namely: which is the fastest
horse? He was timing the sections of races
with a stop watch, estimating wind
strength and direction, adjusting for
movements of running rails, using

projected times and calculating average
times years before the best-selling
American books on speed rating were
published. This new edition incorporates
much new material, including standard
times for all Irish racecourses (plus the
major French ones). Mordin On Time
enables the reader to construct their own
speed ratings wherever they live.

Clinical Skills for Healthcare Assistants is
an accessible, easy to read guide,
outlining the fundamental and core skills
integral to clinical practice. Divided into
three sections, the first looks at
fundamental skills applicable to all staff,

such as accountability, communication and record keeping. Section two explores core clinical skills for example respiratory care, pulse, blood glucose management, catheter care, and fluid balance. Section three outlines complex clinical skills that require more in-depth training and may be restricted to specialist areas of practice, such as medication, and intravenous cannulation. Each chapter follows the same easy to use structure, starting with the aims and objectives of the chapter, followed by the explanation of why the skill is performed, relevant anatomy and physiology, related aspects and terminology, how to perform the skill and common problems. Aimed primarily at healthcare assistants, this will also be a useful resource for newly qualified practitioners and students in health and social care.

This interdisciplinary collection of critical articles seeks to reassess the concept of hybridity and its relevance to post-colonial theory and literature. The challenging articles written by internationally acclaimed scholars discuss the usefulness of the term in relation to such questions as

citizenship, whiteness studies and transnational identity politics. In addition to developing theories of hybridity, the articles in this volume deal with the role of hybridity in a variety of literary and cultural phenomena in geographical settings ranging from the Pacific to native North America. The collection pays particular attention to questions of hybridity, migrancy and diaspora.

West is a high school senior who has everything going for him until an accident leaves him paralyzed. Strapped down in his hospital bed, slipping in and out of consciousness, West is terrified and alone. Until he meets Olivia. She's the girl next door-sort of. A patient in the room next to his, only Olivia can tell what West is thinking, and only Olivia seems to know that the terrible dreams he's been having are not just a result of his medication. Yet as West comes to rely on Olivia-to love her, even-certain questions pull at him: Why has Olivia been in the hospital for so long? And what does it mean that she is at the center of his nightmares? But the biggest question of all comes when West begins to recover and learns that the

mysterious girl he's fallen in love with has a secret he could never have seen coming. *Under Mr. Nolan's Bed (Original)* Aesculus Press Ltd

Religious Education is now identified as a shortage subject as a growing number of pupils in schools opt for it. The growing emphasis on children's moral and spiritual education, the DfEE's hunt for new teachers, OFSTED's calls for improvement and reinforced links with philosophy have pushed the subject into the spotlight.

Based on research and partnership with schools this book examines and explains :

- * the role of Religious Education in the curriculum
- * the role of spirituality in children's lives
- * better teaching practice, giving practical examples.

BE RICH AND HAPPY. City Lights Books

It's not all "fun and games." A growing body of research suggests that recreation activities can be powerful development contexts when they are properly framed and intentionally designed. This volume highlights much of that research, and the articles that follow provide ample evidence that well-framed recreation activities and contexts can provide a range of positive developmental outcomes. Editors

Lawrence R. Allen and Robert J. Barcelona draw on their own work in human and youth development and have assembled contributing authors who explore the important of meaningful recreation and leisure experiences in the lives of youth and the value of recreation from a developmental perspective. Chapters focus on the developmental potential of specific recreation contexts and settings and provide research and evidence-based strategies outlining the activities that best promote positive youth development. Finally, the volume demonstrates how recreation is being used to strengthen individual and community assets and its role as a contributor in addressing pressing social issues. This is the 130th volume of *New Directions for Youth Development*, the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions. The result is a unique resource presenting thoughtful, multi-faceted approaches to helping our youth develop into responsible, stable, well-rounded citizens.

One hundred of the most evocative modern poems on joy, selected by an award-winning contemporary poet "Bursting with energy and surprising locutions. . . . Even the most familiar poets seem somehow new within the context of Joy."--David Skeel, *Wall Street Journal*
 "Wiman takes readers through the ostensible ordinariness of life and reveals the extraordinary."--Adrianna Smith, *The Atlantic*
 Christian Wiman, a poet known for his meditations on mortality, has long been fascinated by joy and by its relative absence in modern literature. Why is joy so resistant to language? How has it become so suspect in our times? Manipulated by advertisers, religious leaders, and politicians, joy can seem disquieting, even offensive. How does one speak of joy amid such ubiquitous injustice and suffering in the world? In this revelatory anthology, Wiman takes readers on a profound and surprising

journey through some of the most underexplored terrain in contemporary life. Rather than define joy for readers, he wants them to experience it. Ranging from Emily Dickinson to Mahmoud Darwish and from Sylvia Plath to Wendell Berry, he brings together diverse and provocative works as a kind of counter to the old, modernist maxim "light writes white"--no agony, no art. His rich selections awaken us to the essential role joy plays in human life.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages

and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant. Damnation Marked Simon and Schuster Since the 1950s there has been a persistent shortage of sci-tech librarians, and as more librarians retire or change

positions, the prospect looms that the profession will only depopulate further. Tackling this difficult challenge, *Recruiting, Training, and Retention of Science and Technology Librarians* gathers together into one source the perspectives of top library administrators and managers as well as front-line librarians who present the latest research and practical strategies to find, train, and keep those valuable specialized professionals. This book explores in depth timely issues and presents creative perspectives and innovative solutions to this persistent problem in subject-specialized libraries. As the baby-boom generation of science and technology librarians begins to retire, training and keeping sci-tech librarians will become even more crucial. *Recruiting, Training, and Retention of Science and Technology Librarians* discusses the "replacement gap" problem in libraries, including who should be recruited, how they should be trained, and how to retain them once hired. Several authors address the field's long-standing specialist vs. generalist debate, bringing new data and experience-driven perspectives to this challenging issue. Topics in *Recruiting,*

Training, and Retention of Science and Technology Librarians include: updating the cultural image of librarians to make the profession more appealing a comprehensive literature review how to cultivate candidates who are dedicated to service and love research and learning practical approaches to improve the visibility and attractiveness of science librarianship the skills and support needed to become a successful science librarian an innovative program to recruit undergraduates an in-depth survey of practicing science and technology librarians the challenges of science librarianship in Africa library and information science educators as recruiters for sci-tech librarians creative strategies to recruit and retain librarians adapting aspects of first-year student retention programs as a model for library retention programs how professional competencies can be used for recruitment, training, and retention and more *Recruiting, Training, and Retention of Science and Technology Librarians* is a timely, important resource for college and university administrators, and public, special, academic, and government

The rhetoric of social justice is commonplace but increasingly it means little more than a tag line or a punctuation point. Reconstructing Social Justice presents a new framework for social justice that will change the way people think about social justice and change the way people implement social justice. This book carves out an intellectual and practical space for social justice that is distinct from political, legal, and economic spheres. While emphasizing a distinct domain for social justice, the author then makes sense of its healing role in terms of the polity, economy, technology, and religion. Drawing from a rich supply of classroom experiences, her research on mosque controversies after September 11, 2001, and then the global examples of truth and reconciliation commissions, Frederking invites the reader to think

about the relevance of social justice from the micro to the macro level. Rather than a set of policy outcomes or ideological positions, social justice is a process of social accountability that demands honest and transparent engagement. While disagreement is likely and controversy inevitable, this social justice process reaffirms our connectedness and moves us forward as a collective.
