The extraordinary story of how Georgia State University tore up the rulebook for educating lower-income students "Georgia State . . . has been reimagined—amid a moral awakening and a raft of data-driven experimentation—as one of the South's more innovative engines of social mobility." —The New York Times

Won't Lose This Dream is the inspiring story of a public university that has blazed an extraordinary trail for lower-income and first-generation students in downtown Atlanta, the birthplace of the civil rights movement. Over the past decade Georgia State University has upended the conventional wisdom that large numbers of students are doomed to fail simply because of their economic background or the color of their skin. Instead, it has harnessed the power of big data to identify and remove the obstacles that previously stopped them from graduating and completely transformed their prospects. A student from a mediocre high school working two jobs to make ends meet is now no less likely to succeed than a child of wealth and privilege—an earth-shaking achievement that is reverberating across every college campus in the country. With unique access to the key players and drawing on his skills as an investigative reporter, Andrew Gumbel delivers a thrilling, blow-by-blow account of a long battle to determine whether universities exist for their students or vice versa. The story is told through the visionary leaders who overcame fierce resistance to tear up the rules of their own institution and through the many remarkable students whose resilience and determination, often against daunting odds, inspired the work at every stage. Their success shows how the promise of social advancement through talent and hard work, the essence of the American dream, can be rekindled even in an age of deep inequalities and divisive politics.

Mastering Academic Reading is meant to challenge advanced academically oriented students of English. The units and the readings within them are long. The comprehension and expansion exercises after them are demanding. The hoped-for outcome is that students trained using this textbook will be able to better

hold their own in university classes where the reading volume across disciplines and vocabulary demands are high. Almost every reading is taken, in minimally adapted form, from a book or academic / professional journal. Two introductory passages have been composed expressly for this book in order to provide narrowly focused background material. Beyond these pieces, readers are in the hands of "real-world" authors and their difficult, lexically diffuse, and allusion-filled creations. Journal articles and book excerpts predominate, but Mastering Academic Reading also offers a book review and a government pamphlet as well. Since one aspect of reading practice builds on others, the units are laid out in tiers, not in sections. Each unit has been organized into three tiers. In general, there is one reading per tier, although the first tier in Unit 3 contains two passages (both necessary to provide conceptual background for the other two tiers). Each reading is 3,500-5,000 words. The book focuses on the three primary goals of academic reading: reading to learn; reading to integrate, write, and critique texts; and reading for basic comprehension.

Master's Thesis from the year 2020 in the subject Education - Reading Instruction, grade: 6, University of Applied Sciences Northwestern Switzerland, language: English, abstract: In this thesis the influence an extensive reading programme has on the motivation and the attitude of secondary school students regarding reading in English is analysed. Based on the pre-existing theoretical research about extensive reading, two questionnaires were designed in order to measure changes in reading attitude and reading motivation of secondary school students. The sample consisted of 5 secondary school classes in Switzerland, and it included all three levels of secondary school (A, E & P). 81 Swiss secondary school students aged between 13 and 16 went through a six-week extensive reading programme while three other classes (one of each level) did not and functioned as a control group. Throughout the six weeks students read 20 minutes at the start of every lesson. They were able to choose graded readers from a mobile library which was installed in the classroom. They did not have to take any tests after reading. The only things they had to do is read in their own tempo, choose a book they like from the library and leave a feedback at the back end of the books they read in order to

inform the next reader of the same book. After six weeks of extensive reading, the changes in reading attitude and reading motivation were quantified through the second survey. All test groups except for the level P class (which is the highest level in the Swiss school system) showed a statistically significant increase in reading motivation. For the most part, the positive attitudinal changes towards reading in English were dramatic thanks to the characteristics of the extensive reading programme. This became evident because especially A and E secondary school students assessed their reading competence much more highly after the programme, and they had a lot more fun reading than they had expected before the programme.

The Challenges textbook series helps students become better readers through explicit teaching of reading skills and strategies that will break counter-productive habits, such as word-for-word translation. Vocabulary is a major focus of the series as well because good readers know a lot of words. Challenges 1 (the low-intermediate level) has eight units with two chapters in each. Each unit begins with an introduction to the topic—generally a one-page activity to activate students' interest and background knowledge. Each chapter consists of sections designed to support students' understanding of a reading passage. For example, the

Reading Skills section teaches one of three types: basic reading skills, dictionary skills, or sentence-level grammar skills. Vocabulary is also previewed, but students also practice word forms of the target vocabulary and learn common collocations and phrases. The book also includes timed/paced readings, which are important to developing reading fluency. Additional material to support the book is available online.

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. Since its publication in 2004, *Doing Honest Work in College* has become an integral part of academic integrity and first-year experience programs across the country. This helpful guide explains the principles of academic integrity in a clear, straightforward way and shows students how to apply them in all academic situations—from paper writing and independent research to study groups and lab work. Teachers can use this book to open a discussion with their students about these difficult issues. Students will find a trusted resource for citation help whether they are studying comparative literature or computer science. Every major reference style is represented. Most important of all, many universities that adopt this book report a reduction in cheating and plagiarism on campus. For this second edition, Charles Lipson has updated hundreds of examples and included many new media sources. There is now a full chapter on how to take good notes and use them properly in papers and assignments. This comprehensive examination of extensive reading shows how reading large quantities of books and other materials can provide students with essential practice in learning to read and help them develop a positive attitude towards reading, which is sometimes missed in second language classes. The authors first examine the cognitive and affective nature of reading and then offer a wealth of practical advice for implementing extensive reading with second language learners. Suggestions are provided for integrating extensive reading into the curriculum, establishing a library, selecting reading materials, and keeping records for purposes of evaluation. The text also describes a wide variety of classroom activities to supplement individualized silent reading. The information will be useful both for pre-service teachers and

for teachers and administrators who want to improve the teaching of reading in their second language programs.

In the United States, 1,200 community colleges enroll over ten million students each year—nearly half of the nation's undergraduates. Yet fewer than 40 percent of entrants complete an undergraduate degree within six years. This fact has put pressure on community colleges to improve academic outcomes for their students. *Redesigning America's Community Colleges* is a concise, evidence-based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions. It makes a compelling case that two-year colleges can substantially increase their rates of student success, if they are willing to rethink the ways in which they organize programs of

study, support services, and instruction. Community colleges were originally designed to expand college enrollments at low cost, not to maximize completion of high-quality programs of study. The result was a cafeteria-style model in which students pick courses from a bewildering array of choices, with little guidance. The authors urge administrators and faculty to reject this traditional model in favor of "guided pathways"—clearer, more educationally coherent programs of study that simplify students' choices without limiting their options and that enable them to complete credentials and advance to further education and the labor market more quickly and at less cost. Distilling a wealth of data amassed from the Community College Research Center (Teachers College, Columbia University), *Redesigning*

America's Community Colleges offers a fundamental redesign of the way two-year colleges operate, stressing the integration of services and instruction into more clearly structured programs of study that support every student's goals.
