Meetings are a crucial part of all our lives, but too often they go nowhere and waste valuable time.

In *Six Thinking Hats*, Edward de Bono shows how meetings can be transformed to produce quick, decisive results every time. The Six Hats method is a devastatingly simple technique based on the brain's different modes of thinking. The intelligence, experience and information of everyone is harnessed to reach the right conclusions quickly. These principles fundamentally change the way you work and interact. They have been adopted by businesses and

governments around the world to end conflict and confusion in favour of harmony and productivity. [The Accidental Prime Minister](#) Yearling Books A key resource for the IGCSE Geography specification, written by leading and experienced Geography teachers and authors. This book has been carefully prepared to cover the full curriculum for the University of Cambridge International Examinations IGCSE course in Geography. In 1590 three hundred Scottish 'witches' were tried for plotting the murder of their King, James VI of Scotland (soon to be James I of England). James is known to have suffered from a morbid fear of violent death, and the trial heightened his

anxiety over this apparently treasonous 'un-Christian' sect, and stimulated him to study the whole subject of witchcraft.

'Daemonologie' is the result of this royal research, detailing his opinions on the topic in the form of a Socratic dialogue between the sceptic Philomathes and witch-averse Epistemon, who reveals many aspects of witch-craft. The book consists of three sections, on magic, on sorcery and witchcraft, and on spirits and ghosts, and ends with

a lurid account of the North Berwick witch trials, based on the evidence of Dr John Fian, the alleged head of the coven, whose 'confession' was obtained with the aid of thumbscrews, the Boot, and by the ripping out of his fingernails.
