This textbook proposes a theoretical approach to linguistics in relation to teaching English. Combining research with practical classroom strategies and activities, it aims to satisfy the needs of new and experienced TESOL practitioners, helping them to understand the features of the English language and how those features impact on students in the classroom. The author provides a toolkit of strategies and practical teaching ideas to inspire and support practitioners in the classroom, encouraging reflection through regular stop-and-think tasks, so that practitioners have the opportunity to deepen their understanding and relate it to their own experience and practice. This book will appeal to students and practitioners in the fields of applied linguistics, TESOL, EAL, English language and linguistics, EAP, and business English.

Second Language Learning and Language Teaching provides an introduction to the application of second language acquisition research to language teaching. Assuming no previous background in second language acquisition or language teaching methods, this text starts by introducing readers to the basic issues of second language acquisition research. It then examines how people learn particular aspects of the second language, such as grammar, vocabulary, pronunciation and the writing system, and at the strategies they adopt in their learning and the differences between individuals. Final chapters look at second language learning in a broader context – the goals of language teaching and how teaching methods relate to SLA research. This newly updated fifth edition builds on the comprehensive scope of earlier editions while also addressing more recent developments in the field, particularly multilingual approaches to language teaching.

Evidence-Based Second Language Pedagogy is a cutting-edge collection of empirical research conducted by top scholars focusing on instructed second language acquisition (ISLA) and offering a direct contribution to second language pedagogy by closing the gap between research and practice. Building on the conceptual, state-of-the-art chapters in The Routledge Handbook of Instructed Second Language Acquisition (2017), studies in this volume are organized according to the key components of ISLA: types of instruction, learning processes, learning outcomes, and learner and teacher psychology. The volume responds to pedagogical needs in different L2 teaching and learning settings by including a variety of theoretical frameworks (sociological, psychological, sociocultural, and cognitive), methodologies (qualitative and quantitative), target languages (English, Spanish, and Mandarin), modes of instruction (face-to-face and computer-mediated), targets of instruction (speaking, writing, listening, motivation, and professional development), and instructional settings (second language, foreign language, and heritage language). A novel synthesis of research in the rapidly growing field of ISLA that also covers effective research-based teaching strategies, Evidence-Based Second Language Pedagogy is the ideal resource for researchers, practitioners, and graduate students in SLA, applied linguistics, and TESOL.

What the book does extremely well is to describe the way things are in terms of the requirements of the Framework for Teaching English, the curriculum and the new specifications - and for this reason it is likely to be most useful to those contemplating English teaching in the maintained sector from outside - returnees, aspiring NQTs or those in the independent sector - Times Educational Supplement 'Instead of taking us yet again on a tour through the four modalities of English, this book's tri-partite structure takes a refreshingly different approach by offering thought-provoking argument grounded in classroom practicality' - Nick McGuinn, University of York Students' comments on Teaching Secondary English: 'The book is written in clear, digestible terms, offering many practical ideas for teaching the key skills and the wide range of material encountered in the English classroom. ... It is the kind of book which can be dipped into, which is particularly useful for people who spend most of their time planning lessons!' 'Teaching Secondary English is a must for student teachers and NQTs. It is a clear, comprehensive and practical guidebook dealing not solely with theory and pedagogy, but with the very real issues facing new teachers today' 'It is clear that Teaching Secondary English, unlike so many textbooks on the subject, is written by someone with recent classroom experience and this helps the reader to trust and respect the advice it purports. I certainly feel it is grounded in practicalities not "pie in the sky" theory that will not work in most 'real' classrooms!' This book enables English teachers to implement change and rise to new challenges, while remaining true to an ethically and socially just position which provides the rationale for their vocation. The author describes and evaluates recent changes to English teaching brought about by initiatives such as the Literacy Strategy, the new 'A' levels and the requirement to focus on spiritual, moral, social and cultural development. Examples of innovative teaching and learning strategies are provided throughout. The author helps teachers to foster keen readers, writers and communicators. He shows how they can enable their students to acquire skills and knowledge, as well as to recognize the value of aesthetic experience, emotional literacy and spiritual and moral response to literature in their own lives and in their communities. This book is essential reading for PGCE students as well as practising teachers and all those involved in English in education.

A Guide to Explaining Grammar for Teachers of English as a Second Or Foreign Language.

First of all the author wants to make it crystal clear that the present work is of a great benefit both for the English and Arab learners of the target language either Arabic or English. This edition of the book pinpoints previous researchers' findings regarding English and Arabic phonological, morphological and syntactic similarities and differences and how all these differences result in mistakes and errors by the Arab learners of English in their learning process. These mistakes or errors are unconsciously or involuntarily made by Arab learners of English due to the differences between the system and sub-systems of the two languages. The present attempt is the result of my realization as an English language teacher as to how a teacher can minimize students difficulties in learning of English and maximize their knowledge, skills and competency of English as a foreign or second language. This is the first edition. The work is pedagogically oriented and primarily intended to make teaching-learning of English as a foreign/second language a bit easy especially for the first-year university students of English language in the Arab world: (Gulf area such as KSA, UAE, Kuwait, and the Middle East Area, such as Jordan, Syria, Lebanon and so on). The focus is on phonetic and morpho-syntactic variations in Arabic and English languages. This area of research becomes more interesting through the assumptions - (i) information about the differences and similarities between Arabic and English language is to be supplied at an early stage since this facilitates the students learning task, (ii) the differences are to be presented in pedagogically suitable format, (iii) it is useful to separate and present phonetics, morphological and syntactic categories as they function in suitable contexts and not merely abstract notions, (iv) before students may tackle contrastive analysis, they should have basic knowledge of Arabic and English languages similarities and differences and (v) pre-modification and post-modification of lexical and syntactic structures are to be explained appropriately.

Over the last decade task-based approaches to language learning and teaching (TBLT) have become a global focus of increased levels of research. Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result. This book focuses on Asia, where this shift has been particularly in evidence. TBLT has often been implemented in top-down approaches to curriculum development, which presents a huge range of challenges at the cultural as well as the pedagogic level. Contemporary Task Based Language Teaching in Asia looks at the drivers, stakeholders and obstacles across the region. Some countries have adapted TBLT to deal with the local constraints, others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts. This collection is important to all involved in language development, from curriculum reform to materials development. It assists from programme evaluation to the setting of assessment standards. The chapters cover all aspects of language education across Asia, from primary to tertiary, private and public education, as well as innovations at local, regional and national levels.
