Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems

-Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make *The Car Hacker's Handbook* your first stop.

Between 1997 and 2014, Tom Kristensen won the world's toughest motor race, the Le Mans 24 Hours, a record nine times and finished on the podium on five more occasions. Every time his car made it to the finish, in fact, he was in the top three. It is no wonder that this great sports car driver is known as 'Mr Le Mans' to motorsport fans around the world. Now retired from racing, Kristensen shares in this book his deepest personal reflections and insights from inside and outside the cockpit. He looks back on more than 30 years spent striving for perfection in racing and tells of the battles and setbacks that sometimes seemed impossible to overcome, including a terrible accident in 2007. Climbing the racing ladder, from karting into Formula 3 single-seaters, including championship titles in Germany (1991) and Japan (1993), then Formula 3000 and a Formula 1 testing role with Tyrrell. Winning as an underdog on his first visit to Le Mans, in 1997 driving an elderly Joest-run privateer Porsche in which he impressed all onlookers with a night-time charge to vanquish Porsche's factory-entered favourite. His second Le Mans victory came in 2000 on his maiden drive for Audi in the R8, a car that was to become all-conquering. Kristensen won the next five editions of Le Mans, four times with Audi and once with Bentley (in 2003), his last victory in this sequence taking him past Jacky Ickx's previous record at the Circuit de la Sarthe. His eighth win came in one of the all-time classic contests at Le Mans, in 2008, a rollercoaster of a race in which his ageing diesel-powered Audi was never expected to beat the fancied works Peugeots. One more victory with Audi in 2013 sealed his reputation as a true legend of Le Mans. His story includes exploits at other racetracks all over the world, none more prolific than Sebring, home of America's long-established classic endurance race that Kristensen won six times. Personal reflections together with contributions from notable observers -- including English journalists Gary Watkins and Charles Bradley -- complete a truly rounded portrait of the man and his achievements. Voted 'Sports Book of the Year' when originally published in Kristensen's native Denmark, this thoughtful memoir is now available in English.

A narrative like no other: a cultural history that explores how cars have both propelled and reflected the American experience— from the Model T to the Prius. From the assembly lines of Henry Ford to the open roads of Route 66, from the lore of Jack Kerouac to the sex appeal of the Hot Rod, America's history is a vehicular history—an idea brought brilliantly to life in this major work by Pulitzer Prize-winning journalist Paul Ingrassia. Ingrassia offers a wondrous epic in fifteen automobiles, including the Corvette, the Beetle, and the Chevy Corvair, as well as the personalities and tales behind them: Robert McNamara's unlikely role in Lee Iacocca's Mustang, John Z. DeLorean's Pontiac GTO, Henry Ford's Model T, as well as Honda's Accord, the BMW 3 Series, and the Jeep, among others. Through these cars and these characters, Ingrassia shows how the car has expressed the particularly American tension between the lure of freedom and the obligations of utility. He also takes us through the rise of American manufacturing, the suburbanization of the country, the birth of the hippie and the yuppie, the emancipation of women, and many more fateful episodes and eras, including the car's unintended consequences: trial lawyers, energy crises, and urban sprawl. Narrative history of the highest caliber, *Engines of Change* is an entirely edifying new way to look at the American story.

Enigmatic American Don Nichols, D-Day paratrooper, Army counter-intelligence officer and controversial entrepreneur, went on to create a racing marque that seems as cloaked as the man himself. Shadow was the only US-based team to win a Can-Am championship, and one of only three to score a victory in Formula 1. Yet history lavishly celebrates his nominal rivals Dan Gurney and Roger Penske, while Nichols has long remained, yes, a shadowy figure -- despite staying the difficult international course far longer, for 11 racing seasons, 1970 to 1980. But at last Pete Lyons, who was there in the day, lifts the veil from this secretive man and the innovative, extraordinary, magnificent racing cars and world-class team he created.
