Some social theorists claim that trust is necessary for the smooth functioning of a democratic society. Yet many recent surveys suggest that trust is on the wane in the United States. Does this foreshadow trouble for the nation? In *Cooperation Without Trust?* Karen Cook, Russell Hardin,

and Margaret Levi argue that a society can function well in the absence of trust.

Though trust is a useful element in many kinds of relationships, they contend that mutually beneficial cooperative relationships can take place without it. *Cooperation Without Trust?* employs a wide range of examples illustrating how parties use mechanisms other than trust to secure cooperation. Concerns about one's reputation, for example, could keep a person in a small community from breaching agreements. State enforcement of contracts ensures that business partners need not trust one another in order to trade. Similarly, monitoring worker behavior permits an employer to vest great responsibility in an employee without necessarily trusting that person. Cook, Hardin, and Levi discuss other mechanisms for facilitating cooperation absent trust, such as the self-regulation of

professional societies, management compensation schemes, and social capital networks. In fact, the authors argue that a lack of trust—or even outright distrust—may in many circumstances be more beneficial in creating cooperation. Lack of trust motivates people to reduce risks and establish institutions that promote cooperation. A stout distrust of government prompted America's founding fathers to establish a system in which leaders are highly accountable to their constituents, and in which checks and balances keep the behavior of government officials in line with the public will. Such institutional mechanisms are generally more dependable in securing cooperation than simple faith in the trustworthiness of others. *Cooperation Without Trust?* suggests that trust may be a complement to governing institutions, not a substitute for them. Whether or not the decline in

trust documented by social surveys actually indicates an erosion of trust in everyday situations, this book argues that society is not in peril. Even if we were a less trusting society, that would not mean we are a less functional one. A Volume in the Russell Sage Foundation Series on Trust

Forty years ago Amartya Sen introduced to the world a novel approach to the idea of equality: the notion of 'basic capability' as 'a morally relevant dimension' and the claim that we should focus upon equality of basic capabilities ('a person being able to do certain basic things'). These ideas, as developed by Sen and Martha C. Nussbaum, have launched an academic armada now proceeding under the flag of the 'capability approach' (CA). While that flag has ventured far and wide and

engaged many areas of inquiry, this volume of essays is the first to explore how CA might shed light upon labour law. The capabilities approach can illuminate our understanding of labour law across three dimensions. Part I looks at the nature of the basic relationship between CA and labour law-do they share common ground or disagree about what is important? Can the CA provide a normative 'foundation' for labour law? Part II goes further by examining the relationship of the CA and other well-established perspectives on labour law, including economics, history, critical theory, restorative justice, and human rights. Part III examines the possible relevance of the CA to a range of specific labour law issues, such as freedom of association, age discrimination in the workplace, trade, employment policy, and sweatshop goods.

UCLA Employee Relations Update, 1989-1990

Skilled migration is rapidly rising as countries vie for the 'best and brightest' migrants to fill labour market shortages or to add to their stock of 'knowledge workers'. The 'knowledge economy', and the increasing value placed on human capital over physical capital, has led to what some describe as a 'war over skills'. Within this context, the way in which Australia seeks to attract skilled permanent and temporary migrants is put under the spotlight in this very timely publication. Are we open and flexible or defensive and protectionist? This book compares the policies of Australia with those of other nations. What makes this book unique is the input of lawyers, for the first time in Australia, in the discussion of issues. Their challenge to existing selection policies, taxation systems and recognition mechanisms provides a major new contribution to these topics.
