This book re-examines the Nixon administration's attitude and approach to the European integration project. The formulation of US policy towards European integration in the Nixon presidential years (1969-1974) was conditioned by the perceived relative decline of the United States, Western European emergence and competition, the feared Communist expansionism, and US national interests. Against that backdrop, the Nixon

administration saw the need to re-evaluate its policy on Western Europe and the integration process on this continent. Underpinning this study is the extensive use of newly-released archival materials from the Nixon Presidential Library and Museum, the Library of Congress, and the State Department. Furthermore, the work is based on the public papers in the American Presidency Project and the materials on the topic of European integration and unification in the Archive of European Integration. Finally, the study has extensively used newspaper archives as well as the declassified online documents, memoirs and diaries of former US officials. Mining these sources made it possible to shed new light on the complexity and dynamism of the Nixon administration's policy towards European integration.

The groundbreaking novel from the Pulitzer Prize-winning author of *American Pastoral* that originally propelled its author to literary stardom: told in a continuous monologue from patient to psychoanalyst, this masterpiece draws us into the turbulent mind of one lust-ridden young Jewish bachelor named Alexander Portnoy. "Deliciously funny...absurd and exuberant, wild and uproarious...a brilliantly vivid reading experience." —The New York Times Book Review "Touching as well as hilariously lewd.... Roth is vibrantly talented." —New York Review of Books Portnoy's Complaint n. [after Alexander Portnoy (1933- )] A disorder in which strongly-felt ethical and altruistic impulses are perpetually warring with extreme sexual longings, often of a perverse nature. Spielvogel says: 'Acts of exhibitionism, voyeurism, fetishism, auto-eroticism and oral coitus are plentiful; as a consequence of the patient's "morality," however, neither fantasy nor act issues in genuine sexual gratification, but rather in overriding feelings of shame and the dread of retribution, particularly in the form of castration.' (Spielvogel, O. "The Puzzled Penis," *Internationale Zeitschrift für Psychoanalyse*, Vol. XXIV, p. 909.) It is believed by Spielvogel that many of the symptoms can be traced to the bonds obtaining in the mother-child relationship.

This edition is the first of its kind to offer a basic collection of facsimile, English language, historical articles on all aspects of the extermination of the European Jews. A total of 300 articles from 84 journals and collections allows the reader to gain an overview of this field. The edition both provides access to the immense, rich array of scholarly articles published after 1960 on the history of the Holocaust and encourages critical assessment of conflicting interpretations of these horrifying events. The series traces Nazi persecution of Jews before the implementation of the "Final Solution", demonstrates how the Germans coordinated anti-Jewish activities in conquered territories, and sheds light on the victims in concentration camps, ending with the liberation of the concentration camp victims and articles on the trials of war criminals. The publications covered originate from the years 1950 to 1987. Included are authors such as Jakob Katz, Saul Friedländer, Eberhard Jäckel, Bruno Bettelheim and Herbert A. Strauss.

Co-published by Routledge for the American Educational Research Association (AERA) Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness, for example, commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive, AERA-sponsored Handbook. Organized into seven sections, the Handbook focuses on (1) disciplinary foundations of educational policy, (2) methodological perspectives, (3) the policy process, (4) resources, management, and organization, (5) teaching and learning policy, (6) actors and institutions, and (7) education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions, and methods will drive future policy research? Topics such as early childhood education, school

choice, access to higher education, teacher accountability, and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design, and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic, government, and think-tank researchers engaged in policy research. In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.
