This book is an attempt towards simplifying and reviving the subject of pulse examination as described in Unani system of medicine, for its better understanding. It also includes possible correlations between classical and conventional views about pulse and the theories governing the generation and changes in pulse

waves. It is aimed at re-establishing the clinical significance of pulse examination. Unani System of Medicine in India ASIA PACIFIC BUSINESS PRESS Inc. Taking Traditional Knowledge to the Market explores the paradox at the heart of the ayurvedic and unani medicine manufacturing industry to present itself as modern and traditional, common and professional at the same time. On the one hand, the natural, wholesome and authentic nature of these medicines is juxtaposed with the synthetic, violent and iatrogenic character of western medicines, which dominate the Indian market. They are linked to Indian popular culture, the

heyday of Indian civilisation, and a humane approach to medicine. At the same time, large ayurvedic and unani manufacturers use modern science and technology to create a competitive edge and distance themselves from the image of backwardness, that also sticks to Indian medical traditions. Based on an ethnographic fieldwork, from 1996 to 2002, Maarten Bode studies five Indian ayurvedic and unani medicine firms Hamdard, Zandu, Dabur, Himalaya and Arya Vaidya Sala. The narrative follows the perspective of these manufacturers and hence provides an insight into the categorisations and the characteristics of the consumer. Bode also

reveals that researches conducted by large ayurvedic and unani manufacturers on their best-selling brands follow logic-positivistic and biomedical lines, often ignoring humoral concepts and classical pharmacological notions.

Herbal cosmeto-dermatology is needed today because herbal remedies are safer for the skin than allopathic or synthetic drugs. This book is predicated on Unani Medicine, Eastern Medicine, Ayurveda, Integrative Medicine, CAM, Alternative Medicine, Uyghur Medicine, Botanicals & Herbal Medicine. This book of Herbal Cosmeto-Dermatology having 30 chapters described the history of

beautification through cosmetics in the first chapter. It is rightly mentioned about Leucoderma /Vitiligo that Ibn Sina was the first person who declared the skin disease as hereditary. Earlier, this Unani heritage was unheard of! Present medical science also accepts that Lecoderma/Vitiligo is hereditary. Besides the first chapter concerning history, 13 other chapters have been written by Prof. Abdul Latif, and in two of them, he is a contributory author. The remaining chapters in the book are the works of other experts' compilations. State of Unani Medicine in India Academic Press  
This report is structured in five parts: national framework for

traditional and complementary medicine (T&CM); product regulation; practices and practitioners; the challenges faced by countries; and, finally, the country profiles. Apart from the section on practices and practitioners, the report is consistent with the format of the report of the first global survey in order to provide a useful comparison. The section on practices and practitioners, which covers providers, education and health insurance, is a new section incorporated to reflect the emerging trends in T&CM and to gather new information regarding these topics at a national level. All new information received has been incorporated into

individual country profiles and data graphs. The report captures the three phases of progress made by Member States; that is, before and after the first WHO Traditional Medicine Strategy (1999-2005), from the first global survey to the second global survey (2005-2012) and from the second survey to the most recent timeline (2012-2018).

These Unani practitioners can practice as qualified doctors in India, as the government approve their practice. Unani medicine is very close to Ayurveda. Both are based on theory of the presence of the

elements (in Unani, they are considered to be fire, water, earth and air) in the human body. According to followers of Unani medicine, these elements are present in different fluids and their balance leads to health and their imbalance leads to illness. Government have exclusive department of Indian system of medicine inclusive of Unani under Health ministry and several states have department and institutions to ensure the proper regulation and development of Unani medicine in India. Herb gardens, nursery of medicinal plants, experimental and field scale cultivation are the major initiatives taken for the improvement of medicine. Skin disease,

liver disorder, sexual disturbances, pulmonary, sinus and communicable diseases are the major effective treatment achieved areas for Unani. Tremendous progress has been registered in the development of modern medicine. Yet, medicinal plants continue to be an important source of drugs throughout the world. A good knowledge of research methodology is extremely important to conduct a scientifically sound research, and a valid research is essential for the development of every science, so does AYUSH systems of

medicine. The movement of research in Medicine dates back to the times of its origin, when Greek Physician-Philosopher Hippocrates freed Medicine from superstitions, and presented it in the initial scientific form. Thereafter, the Roman Philosopher Galen stabilized the foundations of Hippocratic medical thoughts, on which the Arab and Iranian physicians like Rāzī and Ibn Sīnā, built an edifice and developed the system to great heights. Ibn Sīnā laid down guidelines for clinical testing of drugs as early as in 11th Century. The scientific research in AYUSH Systems of Medicine was given a boost in India by a versatile genius, Masīḥ al-Mulk

Ḥakīm Ajmal Khān, in the 1920s. He spotted Dr. Salīm al-Zamān Ṣiddīqī, a chemist, for undertaking chemical studies on some important medicinal plants, used in Unani System of Medicine. The present scenario of the AYUSH systems of medicine and its contribution to healthcare is very important to date. There are several areas, where traditional medicines are independently able to manage the diseases, such as skin diseases, liver diseases, GIT disorders, etc., but scientific data of these claims are lacking. So, it is the need of the hour to explore and evaluate the AYUSH systems of medicine on internationally acceptable scientific

parameters. For the purpose, a number of books are available in the market, but it is a very tough task for the newbies to understand the basics of research from these high-level books. This book is written in simple and palatable language, especially for the PG Scholars and AYUSH Researchers, who face difficulty in understanding the subject. The book deals with research and its types, research problem, hypotheses, research designs, and data collection, etc. with updated guidelines. We hope that the purpose of writing this book would be fulfilled and the Postgraduate Scholars, as well as other researchers, will find this book helpful in understanding the

basics of Research Methodology.

Unani is Greek medicine. It's foundations were laid by Hippocrates (460-377 B.C.) and Galen (131-210 B.C.),

and it owes its further development to the achievements of Arabic and Persian physicians such as Abu Bakr, Ar Razi (850-925 B.C.), and Avicenna (Abu Ali Ibn Sina) (980-1037), who, on the basis of Galen's and Hippocrates' works, created a harmonious medical system. Unani's theory of medicine is based on the concept of the four humors: blood, mucus, yellow and black bile. The initial equilibrium of humors determines a person's state of health, imbalance and disease. Basic concepts: Elements, Nature, Humors. The main treatment protocol is to restore the balance of humors, which uses natural medicines and methods. Currently, Unani, along with other

types of alternative medicine, is widely practiced in the world. The effort set by the authors of this publication are: 1) to try to find a correspondence between Unani's provisions and the ideas of modern medicine; 2) to systematize the rich practical material accumulated by the authors, so that they can be used by specialists in their practice; 3) to interest in the methods and theoretical foundations of Unani's medicine by doctors who are unfamiliar with it. *Handbook of Ayurvedic Medicinal Plants* NIIR PROJECT CONSULTANCY SERVICES This comprehensive guide to healing synthesizes the
