University1. Introduction. Capital budgeting is one of the most important decisions faced by the financial management of any organization (Batra & Verma, 2014). It is a planning mechanism used by an organization to make evaluation decisions on how to allocate resources among investment projects (Al-Mutairi et al., 2018) and assessing the investment projects that will create benefits for periods of over ... Capital budgeting: a systematic review of the literature Imposing capital rationing can lead to change in selection of the plan. Plan Y requires initial investment of \$2,100,000 whereas plan X requires \$2,700,000, if the capital expenditure budget is less than the amount required to make investment in plan X. Chapter 10 Solutions | Principles Of Managerial Finance ... Capital budgeting techniques are related to investment in fixed assets. Fixed assets are that portion of balance sheets which are long term in nature. On the other hand current assets are short term by nature. We may also said that capital budgeting is technique employed to determine the value of project and investment in

fixed assets.
