Loose-Leaf for Principles of Auditing & Other Assurance Services with Connect McGraw-Hill Education
 Messier employs the new audit approach currently being used by auditing professionals. This new approach is a direct result of the demands of Sarbanes-Oxley, which has changed the way auditors do their jobs. The new auditing approach emphasizes understanding the entity (i.e., the organization or business being audited) and its environment (i.e. industry), and then assessing the business risks faced by the entity and how management controls those risks. This new audit process focuses on business processes instead of accounting cycles. This unique and innovative approach has been developed in response to changing market dynamics. The systematic approach, referred to in the subtitle of the text, reflects the early introduction of three basic concepts that underlie the audit process: materiality, audit risk, and evidence; this allows Messier to build upon this model in subsequent chapters. These are central to everything an auditor does and a unique feature of Messier. As such, this approach helps students develop auditor judgment, a vital skill in today's auditing environment.

Auditors are trained to investigate beyond appearances to determine the underlying facts—in other words, to look beneath the surface. The recent financial crisis has made this skill even more crucial to the business community. As a result of this recent crisis and of the financial statement accounting scandals that occurred at the turn of the century, understanding the auditor's responsibility related to fraud, maintaining a clear perspective, probing for details, and understanding the big picture are indispensable to effective auditing. The author team of Louwers, Ramsay, Sinason, Strawser, and Thibodeau has dedicated years of experience in the auditing field to this new edition of *Auditing & Assurance Services*, supplying the necessary investigative tools for future auditors.

The fourth edition of *Auditing & Assurance Services* is the most up-to-date auditing text on the market. All chapters and modules in the fourth edition have been revised to incorporate professional standards through SAS 116, AS7, international standards of auditing (ISAs), and unnumbered standards adopted through July 2009. New terminology from the AICPA's Clarity Project has been incorporated throughout the book. In addition, all chapters include new problems, Kaplan CPA Review simulations, and comprehensive case questions. Fraud awareness, a thorough understanding of internal controls, and the ability to use technology effectively are the hallmarks of a successful auditor in business today. With *Auditing & Assurance Services*, 4th edition, students are prepared to take on auditing's latest challenges. As a leader in fraud coverage, it is accompanied by the Apollo Shoes Case, the only standalone FRAUD audit case on the market (available online on the book's OLC). The text is also designed to

provide flexibility for instructors; the twelve chapters focus on the auditing process while the eight modules provide additional topics that can be taught at the instructor's discretion without interrupting the flow of the text.

As auditors, we are trained to investigate beyond appearances to determine the underlying facts—in other words, to look beneath the surface. From the Enron and WorldCom scandals of the early 2000s to the financial crisis of 2007–2008 to present-day issues and challenges related to significant estimation uncertainty, understanding the auditor's responsibility related to fraud, maintaining a clear perspective, probing for details, and understanding the big picture are indispensable to effective auditing. With the availability of greater levels of qualitative and quantitative information ("big data"), the need for technical skills and challenges facing today's auditor is greater than ever. The author team of Louwers, Blay, Sinason, Strawser, and Thibodeau has dedicated years of experience in the auditing field to this new edition of *Auditing & Assurance Services*, supplying the necessary investigative tools for future auditors.
