Fun with the Worst Witch (World Book Day) HMH

Now I didn't believe a broken-down old unicorn could make wishes come true . . . not for a minute. But what if it could? Mags has a lot to wish for—a nice house with a mama who isn't tired out from work; a normal little sister; a brother who doesn't mooch for food; and, once in a while, she'd like some new clothes for school. When her sister Hannie finds a stuffed unicorn, Mags's wishes start to come true. She knows the unicorn can't really be magic, but she won't let anything ruin her newfound luck—even if it means telling her own sister to believe something that can't possibly be true.

A Bad Spell for the Worst Witch ePenguin

Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom Nichols' *The Death of Expertise* shows how this rejection of

experts has occurred: the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine, among other reasons. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy or, in the worst case, a combination of both. An update to the 2017 breakout hit, the paperback edition of *The Death of Expertise* provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today.

The Last Noo-Noo Macmillan Children's Books

The stories we read as children are the ones that stay with us the longest, and from the nineteenth century until the 1950s stories about schools held a particular fascination. Many will remember the goings-on at such earnest establishments as Tom Brown's

Rugby, St Dominic's, Greyfriars, the Chalet School, Malory Towers and Linbury Court. In the second part of the twentieth century, with more liberal social attitudes and the advent of secondary education for all, these moral tales lost their appeal and the school story very nearly died out. More recently, however, a new generation of compromised schoolboy and schoolgirl heroes - Pennington, Tyke Tiler, Harry Potter and Millie Roads - have given it a new and challenging relevance. Focusing mainly on novels written for young people, *From Morality to Mayhem* charts the fall and rise of the school story, from the grim accounts of Victorian times to the magic and mayhem of our own age. In doing so it considers how fictional schools not only reflect but sometimes influence real life. This captivating study will appeal to those interested in children's literature and education, both students and the general reader, taking us on a not altogether comfortable trip down memory lane.
