*A Cunning Chess Opening Repertoire for
White Everyman Chess*

The Petroff Defence has traditionally been regarded as a reliable defensive mechanism to counter the aggressive 1 e4. It also has a reputation for being one of the most drawish of all openings and a choice that Black only makes when content to achieve a draw. However, in

recent years, this has all changed. A new generation of players, spearheaded by the 2018 World Championship challenger, Fabiano Caruana (whose qualification route was built heavily around the Petroff), are re-interpreting this ancient defence. While recognising the impressive solidity of the Petroff they are honing it into a fine counter-attacking weapon. Opening Repertoire: The Petroff Defence examines all aspects of this highly complex opening and provides the reader with well-researched, fresh, and innovative

analysis. Each annotated game has valuable lessons on how to play the opening and contains instructive commentary on typical middlegame plans. The suggested lines for Black are based around the very latest games and analysis. * A complete repertoire for Black in the Petroff Defence. * A question and answer approach provides an excellent study method.

Opening Repertoire: The Sveshnikov
Gambit Publications

The Ruy Lopez is perhaps the most classical of all chess openings. It dates back to the 16th century and has featured in the opening repertoire of every modern world champion. It is a highly flexible variation: Bobby Fischer used it to create numerous powerful strategic masterpieces. In the hands of

Anatoly Karpov it led to many of his trademark positional squeezes, whereas Garry Kasparov often used it as a springboard for his typically powerful attacks. Opening Repertoire: The Ruy Lopez is a modern examination of this perennial favourite. Joshua Doknjas has put together a repertoire for White based firmly around contemporary trends in the Lopez. He examines all aspects of this highly complex opening and provides the reader with well-researched, fresh, and innovative analysis. Each annotated game has valuable lessons on how to play the opening and contains instructive commentary on typical middlegame plans. * A complete repertoire for White in the Ruy Lopez. * A question and answer approach provides an excellent

study method.

Opening Repertoire: The Modern Benoni
Everyman Chess

The Grünfeld Defence is a combative reply to 1 d4 which has been favoured by many world champions including those two legends of the game, Bobby Fischer and Garry Kasparov. It is an opening in the hypermodern style, in that Black generally allows White to build a strong centre early on in the expectation of being able to undermine it in the middlegame play. Opening Repertoire: The Grünfeld Defence book cuts through the dense theory that surrounds this opening and establishes a straightforward repertoire is based around consistent strategies and concepts. It has all the information necessary to enable the reader to begin

playing the Grünfeld with confidence. There are also "Grünfeld-type" suggestions to counter White systems based on the English and Réti openings. In Opening Repertoire: The Grünfeld Defence, Nigel Davies guides the reader through the complexities of the Grünfeld and carves out a repertoire for Black. He examines all aspects of this highly complex opening and provides the reader with well-researched, fresh, and innovative analysis. Each annotated game has valuable lessons on how to play the opening and contains instructive commentary on typical middlegame plans.- A complete repertoire for Black against 1 d4.- A question and answer approach provides an excellent study method.

Opening Repertoire Opening Repertoire

Every chess player needs to decide which openings he is going to play. But where do you start? The risk of drowning in the turbulent sea of opening theory is only too real for beginning amateurs. Often your goals and ambitions will be misguided. If you are trying to win in 20 moves, copy what's in fashion among top-GM's or memorize variations, you are wasting your time. Most likely you will never get to play your 'preparation' and end up aimlessly switching from one opening to the other. Experienced French chess trainer Vincent Moret provides a complete, ready-to-go chess opening repertoire for White with a sound set of lines that do not outdate rapidly, do not require memorization and are easy to digest for beginners and post-beginners. To show the typical

plans and the underlying ideas in the various lines of his repertoire, Moret not only selected games of grandmasters. He mainly uses games of young, improving players to highlight the errors they tend to make. With many exercises to test your understanding of the ideas behind the repertoire.

A Vigorous Chess Opening Repertoire for Black Owl Books

One of the hardest tasks competitive chess players face is the development of an opening repertoire suited to their own style of play. In this book, translated by Ken Neat, Grandmaster Gufeld makes the job easier by providing an ideal

framework for a practical opening repertoire, specifically tailored for those who relish attacking play.

A Ferocious Opening Repertoire

Everyman Chess

Following up with methodical play in the center, provides an opening repertoire based on 1 d4 and 2 c4 and discusses strategies for both sides.

The Caro-Kann Gambit Publications

In this book, the first to focus on these issues, Steve Giddins provides common-sense guidance on one of the perennial problems facing chess-players. He tackles questions such as: whether to play main lines, offbeat openings or 'universal' systems; how to avoid being 'move-ordered'; how to use computers; if and when to depart from or change your repertoire. Giddins argues that from

novice to grandmaster, a player's basic task when choosing a repertoire is the same: he needs to select openings that suit his playing style and that he can play with confidence. The repertoire should not require more memory work and study than he is capable of, or has time for. The book is rounded off with a look at the use of 'role models' and an investigation of the repertoires of leading players past and present.

Modern Chess Opening Repertoire for White Gambit

In 1998 a slim volume by International Master John Donaldson explored the crafting of a sophisticated but easily assimilated group of interrelated opening strategies intending to establish small but lasting advantages. The result, *A Strategic Opening Repertoire*, was an

instant success. Now this second edition, revised by Danish FM Carsten Hansen with the assistance of John Donaldson, is greatly expanded twice the size with many more games and detailed explanation. The lines presented here based on 1. Nf3, 2.c4 and 3.g3 will serve a player well throughout his career as they are based on solid positional ideas with an emphasis on understanding rather than memorizing. They will not fall because of one sharp novelty. The aim of playing 1.Nf3 is to head for queenside openings that restrict Black's counterplay. And using this repertoire, you will invariably find yourself on more familiar ground than your opponent. This new edition of A Strategic Opening Repertoire is both revised and expanded. While I have gone through

every page of this book, the lions share of the work was done by my colleague and fellow flank opening enthusiast Danish FM Carsten Hansen. I am particularly indebted to him for fleshing out the annotations to many of the games, particularly in the second half of the book. We both strongly believe in the value of well-annotated model games as a teaching tool and hope that this edition of A Strategic Opening Repertoire will increase your understanding of the game and deepen your position skills.

Opening Repertoire The Ruy Lopez

New In Chess, Csi

Christof Sielecki presents a repertoire for Black against mainline 1 d4, with the Nimzo-Indian and Bogo-Indian defenses. Sielecki focuses on lines where Black adopts a dark-square strategy. This

creates a system-type approach linking variations to a common theme, making the repertoire much easier to learn and understand.

My First Chess Opening Repertoire for White Everyman Chess

One of the important issues players face - both relatively inexperienced ones at the beginning of their career as well as seasoned ones as they realize their chess craves change - is choosing an opening repertoire. As a player and a coach, I have seen many approaches to

this question, both remarkable and mistaken. Some players believe that the opening is something to ignore, that everything is decided in the middlegame. Others think that studying opening traps is what wins games. Some tend to follow their favorite world-class player's recommendations, while others like to sidestep well-known opening theory early on, preferring unpopular side-lines. To me, opening choice is about all those decisions. I think that many openings are good; there are some dubious ones, but they can also yield formidable results overall or in specific situations if chosen and handled carefully. I firmly believe that your opening repertoire should mostly be based on your playing style and other personal traits, such as memory and

work ethic. It is important to evaluate yourself as well as your strengths and weaknesses properly in order to be able to build the right repertoire that would not only suit you well, but also improve your overall chess. The little detail, though, is in the word "mostly". Namely, I firmly believe that there are a few classical, rock-solid openings with an impeccable reputation, such as 1.e4 e5 as a response to 1.e4 or the Queen's Gambit and Nimzo as an answer to 1.d4 that players of all styles and standards should try, no matter what their style is. This will enable players to learn, appreciate and practice some of the key chess values, such as the importance of space, lack of weaknesses, bad pieces, and comfortable development and so on - you name it. I, myself, started out as a

keen Sicilian player. Just like all youngsters, I cheerfully enjoyed complications, tactical massacres and everything else that the Sicilian is all about. However, as I was developing as a player, my style was changing also. Eventually, I realized I was much more successful with positional play, so it was time to change the outfit - and 1.e4 e5 suited me well. I have used this move as a response to 1.e4 nearly exclusively in recent years, both versus weaker and stronger opposition, with fantastic results. If only other openings would grant me such results as well! I have not only studied these variations myself but have also shown them to numerous private students. To be frank, we have almost always concentrated on White's most dangerous possibilities, such as the

Ruy Lopez, Italian and Scotch. Occasionally, we have also analysed the side-lines - either as a part of preparation for specific opponents or to make sure my students become more universal players and gain more all-round knowledge. Eventually, I realized that the knowledge I gained from 1.e4 e5 can and should be shared with more players, and this is how my book came to life. Of course, the readers will differ, so there is a no "one-size-fits-all" solution. But, I have carefully and diligently tried to achieve the same goal I used when working with my students: to keep my recommendations both theoretically sound as well as practical and accessible. I expect not only titled players but club players and the less experienced readers to equally benefit

from this book. So, sometimes you will find razor-sharp novelties, but in many cases, we will rely on positional understanding, typical structures and standard ideas. I believe the opening is not all about memorization, so I have taken a different approach from many authors by keeping the balance between recommending objectively good variations as well as making sure an adequate amount of work will suffice to get you started. You won't need to spend years studying the material, fearing there is still much more to learn. 1.e4 e5! is not just an opening. It is repertoire that represents our game as a whole. It is something players of all styles will enjoy due to the countless possibilities 1...e5 provides. Hopefully, learning 1...e5 will also make you a

better player. And, finally, I hope the book you are now holding in your hands will not only give you joy but illustrate a passion for chess with the variations presented in this work.

A Strategic Opening Repertoire

Everyman Chess

The Sveshnikov Variation of the Sicilian Defence provides a battleground for one of the key conflicts in chess: structure versus activity. Black voluntarily accepts a weak pawn formation but in return obtains easy development and excellent piece activity. This is a line that finds favour with aggressive, attacking players who are confident in their tactical ability. The idea of playing ...e5 in the Sicilian is an old one but the modern Sveshnikov treatment was developed in the 1970s, since when it has featured in the

repertoires of numerous elite players. It is currently experiencing great popularity due to the fact that it was Magnus Carlsen's choice in his World Championship Match against Fabiano Caruana in London 2018. Carlsen's success with the line was a significant factor in his eventual victory in the match. Since then he has continued to use the Sveshnikov with great success. In *Opening Repertoire: The Sveshnikov* leading chess author Cyrus Lakdawala guides the reader through the complexities of this dynamic variation and carves out a repertoire for Black. He examines all aspects of this highly complex opening and provides the reader with well-researched, fresh, and innovative analysis. Each annotated game has valuable lessons on how to

play the opening and contains instructive commentary on typical middlegame plans. * A complete repertoire for Black in the Sicilian Sveshnikov. * A question and answer approach provides an excellent study method.

Opening Repertoire: The Iron English Everyman Chess

In modern chess, faster time controls have become more important than ever. Every day, countless numbers of rated blitz and rapid games are being played in online and over-the-board competitions and championships. In blitz chess it is important to make the right decisions quickly and almost instinctively. That is why world-famous opening expert Grandmaster Evgeny Sveshnikov and his son, International

Master Vladimir Sveshnikov, have created an opening repertoire for club players that is forcing, both narrow and deep, and aggressive. The aim is to be in control as much as possible. You want to be the one who decides which opening is going to be played, you want to dictate the strategical and technical choices. And you want to keep the pressure, increasing your opponent's chances to stumble. If you play the lines the Sveshnikovs have selected, you will not end up in positions where finding the theoretically best move is all-important, but in positions where it is relatively easy to spot the moves with the greatest practical effect. Your results will improve and you will probably end up playing their variations in 'slow chess' as well. *Kaufman's New Repertoire for Black and*

White Owl Books

James Rizzitano's goal in this book is to provide you with a one-volume, theoretically sound, dynamic opening repertoire beginning with 1 e4. Studying the choices of the current top players, he identifies these secrets of their success: Play openings where you have a relatively safe king. Take the bishop-pair in a semi-open position if it is offered to you. Avoid creating unnecessary weaknesses in your own position. Accept questionable gambits and material sacrifices. Absorb any space advantage conceded by the opponent. His choice of lines to recommend is based on these principles, and supported by detailed work with the current top computer engines. While serious work on chess openings confirms the basic truth that

White can't simply force a large advantage from the start position, we can greatly narrow Black's path to safety, and tilt the practical struggle in our favour. To have a chance of half a point, our opponents will need to solve difficult tactical and strategic problems deep into the middlegame. The main lines recommended are: Giuoco Piano (via Bishop's Opening move-order) Modern Advance Caro-Kann Tarrasch French Rossolimo and Moscow Sicilians, and 2...e6 3 c3 Traditional main lines vs Scandinavian and Alekhine Tricky piece-play options against the Pirc and Modern International Master James Rizzitano dominated New England chess from 1976 to 1989, winning 157 of 336 events in which he competed. His career highlights include victories over Albur,

Benjamin, Benko, Christiansen, Dlugy, I.Gurevich, and Wolff. In more recent years Rizzitano made a return to competitive chess, and has written five books for Gambit, including *How to Beat 1 d4* and *Play the Najdorf Sicilian*.
An Idiot-Proof Chess Opening Repertoire Gambit

By choosing variations that lead to similar structures, highly experienced player, writer and teacher Sam Collins has put together an ideal repertoire for players with limited study time. White opens with 1 e4 and develops his pieces to natural squares and seeks open lines and the initiative. A successful repertoire is more than a set of variations; it also requires strategic understanding of the resulting positions and a knowledge of the key tactical methods and patterns.

Because many of Collins's recommendations lead to familiar structures, ideas can easily be transplanted from one opening to another. He gives complete illustrative games that emphasize the main themes. The specific analysis is up-to-the-minute and features many new ideas that have proven their worth in recent grandmaster practice. Throughout there is a great deal of attention to move-order subtleties and on finding nuances in 'sidelines' that your opponents are most unlikely to have examined in detail. Irish international master Sam Collins won the championship of his home country in 2002 and 2014. He has represented Ireland in numerous olympiads, winning an individual gold medal at Bled in 2002. He is also an

experienced chess teacher who has lectured at the Berkeley Chess School in California. His previous books for Gambit were *Chess Explained: The c3 Sicilian* and the highly successful general opening work *Understanding the Chess Openings*.

A Turn-key Package for Ambitious Beginners
Everyman Chess

Cyrus Lakdawala presents an aggressive opening repertoire, based on the Veresov Opening. This repertoire is perfect for those who have little time for study but enjoy taking opponents out of their comfort zones.

Play the Caro-Kann Gambit Publications
The Modern Benoni is just about the most aggressive method that Black can choose to counter White's 1 d4. In the main line variations Black allows White

to have a preponderance of central pawns which, traditionally, grants the first player the advantage. However, in return, Black gains the opportunity for tremendously dynamic counterplay. This places White under immediate pressure as any inaccurate moves can prove to be disastrous. In this book, FIDE Master John Doknjas examines all aspects of this highly complex opening and provides the reader with well-researched, fresh, and innovative analysis. Each annotated game has valuable lessons on how to play the opening and contains instructive commentary on typical middlegame plans. With thorough variations and explanations on pawn structures and piece placement, this book provides insight for both strong masters and less

experienced players alike. The format is ideal for the chessplayer keen to improve their game. While reading you are continually challenged to answer probing questions – a method that greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of chess knowledge. * A complete repertoire for Black in the Modern Benoni. * A question and answer approach provides an excellent study method.

Opening Repertoire: The Ruy Lopez
Gambit Publications

Grandmaster Damian Lemos presents a repertoire for White in the Queen's Gambit, one of the most famous chess openings. The Queen's Gambit enjoys a long and illustrious past. It has been played by virtually all the strongest

grandmasters in the history of chess, and today it remains a popular choice for players of all levels. White's opening moves in the Queen's Gambit are built on sound strategic principles, and it can lead to positions rich in both tactical and positional play. It's a perfect opening to use in order to develop your chess understanding. It's a perfect opening to use in order to develop your chess understanding. There are many defences that Black can employ against the Queen's Gambit and it's easy to become confused by the countless options for both White and Black. Lemos tackles this problem by providing a concise, easy-to-learn and practical repertoire that is suitable for players of all levels. Using illustrative games, Lemos examines the typical tactics and strategies for both

sides, and highlights the key move order issues. This book tells you everything you need to know about playing the

Queen's Gambit. * A complete repertoire with 1 d4 d5 2 c4 * Over 50 games with grandmaster analysis * Written by a Queen's Gambit expert
