In this new edition of his popular book, Craig Dykstra explores the contributions of the traditions, education, worship practices, and disciplines of the Reformed Christian community in helping people grow in faith. In doing so, he makes the case that the Christian church, in its own traditions, has a wealth of wisdom about satisfying spiritual hunger and the desire to know God deeply--wisdom that offers coherent, thoughtful guidance in such diverse settings as congregational life, families, youth groups, and higher education.

Controversy rages on about God's choosing people for salvation. Are only the few elect? Rather than typically beginning with the preconceptions of systematic theologies, Dr. William Klein takes up this question by searching for a biblical theology of election. He surveys the OT contexts of God's choosing individuals--prophets, priests, kings--to serve divine purposes, and considers God's election of the nation of Israel as his special people. This OT study proposes that God's election is both individual and corporate, but not always determinative. Individuals entered the people of God by birth, but not all the people found salvation. Faith in Yahweh was required. This book traces these elective understandings through the intertestamental literature, identifying continuities and shifts. The bulk of the study, and the heart of the argument, focus on the New Testament. Klein identifies concepts of election, and relationships between writers in the gospels, the Lucan material, Paul's writings, and the rest. The new covenant, God choosing the church in Christ, emphasizes election as corporate, while the individual election of Jesus' disciples and of Paul raises the question whether such chosenness is necessarily salvific. In closing, Klein discusses the most engaging and divisive questions around God's election, and offers a real challenge to today's church.

Primary-grade teachers face an important challenge: teaching children how to read while enabling them to build good habits so they fall in love with reading. Many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence, intention, and joy as readers. In *Growing Readers*, Kathy Collins helps teachers plan for independent reading workshops in their own classrooms. She describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong, well-rounded readers. Kathy outlines a sequence of possible units of study for a yearlong curriculum. Chapters are devoted to the individual units of study and include a sample curriculum as well as examples of mini-lessons and reading conferences. There are also four "Getting Ready" sections that suggest some behind-the-scenes work teachers can do to prepare for the units. Topics explored in these units include: print and comprehension strategies; reading in genres such as poetry and nonfiction; connecting in-school reading and out-of-school reading; developing the strategies and habits of lifelong readers. A series of planning sheets and management tips are presented throughout to help ensure smooth implementation. We want our students to learn to read, and we want them to love to read. To do this we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day. The ideas found in *Growing Readers* create the kind of primary classrooms where that happens.
