A richly illustrated tapestry of interwoven studies spanning some six thousand years of history, *Dæmons Are Forever* is at once a record of archaic contacts and transactions between humans and protean spirit beings—*dæmons*—and an account of exchanges, among human populations, of the science of spirit beings: *dæmonology*. Since the time of the Indo-European migrations, and especially following the opening of the Silk Road, a common *dæmonological* vernacular has been shared among populations ranging from East and South Asia to Northern Europe. In this virtuoso work of historical sleuthing, David Gordon White recovers the trajectories of both the “inner demons” cohabiting the bodies of their human hosts and the “outer *dæmons*” that those same humans recognized each time they encountered them in their enchanted haunts: sylvan pools, sites of geothermal eruptions, and dark forest groves. Along the way, he invites his readers to reconsider the potential and promise of the historical method in religious studies, suggesting that a “connected histories” approach to Eurasian *dæmonology* may serve as a model for restoring history to its proper place at the heart of the discipline of the history of religions.

In the late 1990s, several non-governmental organizations (NGOs) focused world attention on the issue of conflict diamonds which funded wars, massive death, and refugee crises across Central and West Africa. Several governments, NGOs, and key industry players engaged in negotiations under the so-called Kimberley Process (KP). A voluntary global agreement came into effect leading to a substantial decline in illicit diamond trade. Despite its importance in international affairs, the KP remains understudied in academia. Franziska Bieri's book provides the first comprehensive account of the KP and is the first to reveal how NGOs have become critical actors in their own right, possessing the ability to directly influence policies and to participate in the decision making and the implementation of global agreements. In developing this argument, Bieri explains: why the NGO campaign to raise awareness was successful; why a rapid and comprehensive resolution on such a complex global problem was possible; how the tripartite negotiations between states, NGOs, and industry developed during the implementation of the agreement, which is an on-going process. Based on extensive personal interviews with prominent campaigners, leading bureaucrats, and industry officials, hundreds of KP publications, official UN documents, industry news, and NGO reports, this timely book allows for a much needed engagement in contemporary debates about the campaign against conflict diamonds, the Kimberley Process, and the themes defining today's global governance arena.

When Mia learns that her mother has died, all the colour in her world changes to a dreary grey. She feels guilty, angry, sad and lost (sometimes all at once!), and she doesn't know what to do to feel better. Little by little, with the help of her Dad, Mia learns how to cope with her difficult feelings.

Together, they remember her mother by creating memory boxes, and they even get rid of anger by crazily sloshing paints and punching holes in newspapers! In the end, Mia finds her own, very special way of coping. When she feels sad or lonely, she looks up to the stars. Full of practical strategies, this storybook for children aged 5-9 addresses loss, grief and hope. Written from the perspective of Mia who has experienced the sudden death of her mother, it covers the different stages of grief, from initial disbelief, anger and sadness to resolution and hope. The book highlights the importance of giving children the time and space to work through their feelings and provides a host of thoughtful activities to help them cope. It also addresses some of the questions children commonly ask about death. Uniquely illustrated, this book will be an invaluable resource for anyone supporting a grieving child, especially bereavement counsellors, social workers, teachers and other school staff, as well as parents.

High-temperature and high-pressure treatment of diamond is becoming an important technology to elaborate diamonds. This is the first book providing a comprehensive review of the properties of HPHT-treated diamonds, based on the analysis of published data and the work of the authors. The book gives a detailed analysis of the physics of transformation of internal structures of diamonds subjected to HPHT treatment and discusses how these transformations can be detected using methods of optical microscopy and spectroscopy. It also gives practical recommendations for the recognition of HPHT-treated diamonds. The book is written in a language and terms which can be understood by a broad audience of physicists, mineralogists and gemologists.

I hit a bit of a rocky patch during my childhood. My little brother, Phillip, and I were young when both of our parents died. We were shuffled around to different foster homes, and none of them were good situations. Eventually, a wonderful couple adopted us and treated us like we were their own. It was smooth sailing after that. I went through middle school and high school like a normal girl with a normal family. My parents had another child, a son named Evan. So I was the oldest with two younger brothers. I was in high school when I fell in love with Bradley Clark, the star of the football team. Things happened with us, and I ended up being homeschooled during my senior year. I am now the single mother of a three-and-a-half-year-old boy named Mac whose football star father has never so much as met him. I was as happy as a single mother could be. Bradley was never there for us, so I didn't know anything else. My life was what I made it, and I made it good. I had settled into a nice routine where I took care of my responsibilities and made time for writing children's books, which was a passion of mine. I didn't think I was lacking anything. Until I met Drew.

You thought The Cartel was over, but Diamonds are forever. . . . The Diamond family has survived murder, deceit, and betrayal. Through it all, they're still standing tall, and a new era has begun. After surviving a failed attempt on her life, Breeze has moved into the queen's position by Zyir's side. Zyir has taken over the empire and locked down Miami's streets. He has the world in his palms, but there is always new blood ready to overthrow the throne. Young Carter has retired and moved away from the madness—that is, until he gets an unexpected visitor at his home. This person shakes up the whole family, causing chaos that threatens to bring down the Cartel for good. New York Times bestselling authors Ashley and JaQuavis deliver the highly anticipated fourth installment of the wildly popular Cartel series.

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, *New York Review of Books*) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and ventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

The real-world counterpart to the fantastic James Bond novel *Diamonds Are Forever*, it centres around an interview with John Collard, a member of the International Diamond Security Organisation (IDSO), as well as the circumstances surrounding their meeting. Collard explains the IDSO through a mix of examples and history, detailing the corruption and crime that he observed. The book's contents were so incisive that De Beers (who originally pushed with the IDSO's creation) threatened legal action.
