This report concisely introduces FAO's work on biodiversity mainstreaming, including the regional consultations on the subject that took place in 2018 and 2019. It particularly focuses on the Regional Dialogue on Biodiversity Mainstreaming across Agricultural Sectors in Asia and the Pacific, held in Bangkok, Thailand, in July 2019. It outlines the main topics addressed in its opening, plenary, thematic and closing sessions; and highlights the most relevant regional needs, priorities, and recommendations identified by the meeting participants.

### SEAVEG 2012: High Value Vegetables in Southeast Asia: Production, Supply and Demand BRILL

It is necessary to integrate field data relevant to policy with a global overview with up-to-date information for synthesis into scenarios and a vision of how future research and development in agriculture can best help those who are most needy and have little access to productive resources. The overall task is a huge challenge for policy-makers and the agricultural research establishment. It is also of concern in teaching agricultural students to be able to respond to future challenges. This publication is an attempt to stimulate discussion on future options of research policy, suggesting changes of agricultural R&D for societal development in accordance with the Millennium Development Goals.

Piening, head of the European Parliament's interparliamentary relations division for non-European countries, provides a succinct overview of all the EU's external activities during the 40-some years of its existence and of the impact European integration has come to have far beyond the EU's borders. Seven detailed appendices include lists of key trade provisions of the EC treaty, Title V, and principal commission delegations outside the EU. [Genocide and Resistance in Southeast Asia](#) AVRDC-WorldVegetableCenter

Two modern cases of genocide and extermination began in Southeast Asia in the same year. Pol Pot's Khmer Rouge regime ruled Cambodia from 1975 to 1979, and Indonesian forces occupied East Timor from 1975 to 1999. This book examines the horrific consequences of Cambodian communist revolution and Indonesian anti-communist counterinsurgency. It also chronicles the two cases of indigenous resistance to genocide and extermination, the international cover-ups that obstructed documentation of these crimes, and efforts to hold the perpetrators legally accountable. The perpetrator regimes inflicted casualties in similar proportions. Each caused the deaths of about one-fifth of the population of the nation. Cambodia's mortality was approximately 1.7 million, and approximately 170,000 perished in East Timor. In both cases, most of the deaths occurred in the five-year period from 1975 to 1980. In addition, Cambodia and East Timor not only shared the experience of genocide but also of civil war, international intervention, and UN conflict resolution. U.S. policymakers supported the invading Indonesians in Timor, as well as the indigenous Khmer Rouge in Cambodia. Both regimes exterminated ethnic minorities, including local Chinese, as well as political dissidents. Yet the ideological fuel that ignited each conflagration was quite different. Jakarta pursued anti-communism; the Khmer Rouge were communists. In East Timor the major Indonesian goal was conquest. In Cambodia, the Khmer Rouge's goal was revolution. Maoist ideology influenced Pol Pot's regime, but it also influenced the East Timorese resistance to the Indonesia's occupiers. Genocide and Resistance in Southeast Asia is significant both for its historical documentation and for its contribution to the study of the politics and mechanisms of genocide. It is a fundamental contribution that will be read by historians, human rights activists, and genocide studies specialists.

The subject of food security and land issues in Africa has become one of increased importance and contention over recent years. In particular, the focus has shifted to the role new global South donors - especially India, China and Brazil - are playing in shaping African agriculture through their increased involvement and investment in the continent. Approaching the topic through the framework of South-South co-operation, this highly original volume presents a critical analysis of the ways in which Chinese, Indian and Brazilian engagements in African agriculture are structured and implemented. Do these investments have the potential to create new opportunities to improve local living standards, transfer new technology and knowhow to African producers, and reverse the persistent productivity decline in African agriculture? Or will they simply aggravate the problem of food insecurity by accelerating the process of land alienation and displacement of local people from their land? Topical and comprehensive, *Agricultural Development and Food Security in Africa* offers fresh insight into a set of relationships that will shape both Africa and the world over the coming decades.

Fish, molluscs, crustaceans and aquatic plants are fundamental, essential and indispensable foods eaten by people around the world as part of healthy diets, cultural heritage and culinary tradition. Small-scale artisanal fisher and fish farmers produce a large portion of this food. The International Year of Artisanal Fisheries and Aquaculture (IYAFA) 2022 was an opportunity to highlight the importance of small-scale artisanal fisheries and aquaculture for our food systems, livelihoods, culture and the environment. This report provides a summary overview of the objectives, activities and recommendations of the IYAFA 2022. It aims to motivate relevant stakeholders to ensure that the end of the Year is the beginning of a new era of support for small-scale fisheries and aquaculture.

One of the first systematic efforts to cross-compare how ASEAN, India and Australia are approaching policy challenges such as maritime security, climate change, energy security, law enforcement, "good governance" and the politics of security institutions or "architectures".

[Making U.S. Foreign Policy Toward South Asia](#) Diamond Pocket Books Pvt Ltd

Lays out a picture of impending planetary crisis - a global food shortage that threatens to hit by mid-century - that would dwarf any in our previous experience. This book describes a dangerous confluence of shortages - of water, land, energy, technology, and knowledge - combined with the increased demand created by population and economic growth

The European Commission's Joint Research Centre and FAO's Global Soil Partnership collaborated with experts from across Asia and other regions to produce the first-ever Soil Atlas of Asia. The aim

of the Atlas is to raise awareness about the significance of soil to life in Asia among a wide range of audiences, including the general public, decision makers, politicians, teachers, and scientists from other disciplines. The Atlas comprises a series of annotated maps that demonstrate the diversity of soil characteristics across Asia in an easy-to-understand manner. It also explains how soils are formed, the key factors that shape soil characteristics, and why these vary across the continent. Moreover, the Atlas emphasizes the role of soils in shaping our daily lives and highlights the growing pressures on soils resulting from urban expansion, inappropriate land management, pollution, increased demand for food, and climate change. The Atlas encourages people to understand how their actions can help protect and restore soils while reducing degradation processes.
