Did you know that a tree is the biggest plant that grows? How does a tree get the food it needs? What happens to trees in the winter? Read and find out about an apple tree's life cycle through every season. Now rebranded with a new cover look, this Common Core exemplar book features content-rich vocabulary in a classic text by Clyde Robert Bulla, beautifully detailed illustrations updated by Stacey Schuett, and a find out more section with simple experiments to learn about evaporation and tree rings, and more books to read. Both text and artwork were vetted for accuracy by an expert. This is a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory

concepts perfect for children in the primary grades and supports the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

The winner of the prestigious Caldecott Honor, and described by the New York Times as 'a masterwork', Aaron Becker's stunning, wordless picture book debut about self-determination and

unexpected friendship follows a little girl who draws a magic door on her bedroom wall. Through it she escapes into a world where wonder, adventure and danger abound. Red marker pen in hand, she creates a boat, a balloon and a flying carpet which carry her on a spectacular journey ... who knows where? When she is captured by a sinister emperor, only an act of tremendous courage and kindness can set her free. Can it also guide her home and to happiness? In this exquisitely illustrated book, an ordinary child is launched on an extraordinary, magical journey towards her greatest and most rewarding adventure of all...

**Principles and Standards for School Mathematics** National Academies Press

"Exciting and engaging vocabulary instruction can set students on the path to a lifelong fascination with words. This book provides a research-based framework and practical strategies for vocabulary development with children from the earliest grades through high school. The authors emphasize instruction that offers rich information about words and their uses and enhances students' language comprehension and production. Teachers are guided in selecting words for instruction; developing student-friendly explanations of new words; creating meaningful learning activities; and getting students involved in thinking about, using, and noticing new words both within and outside the classroom. Many concrete examples, sample classroom dialogues, and exercises for teachers bring the material to life. Helpful appendices include suggestions for trade books that help children enlarge their vocabulary and/or have fun with different aspects of words"--

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a

unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
