Après avoir proposé des ouvertures théoriques dans son premier volume, la collection Fabrica Mundi cherche maintenant à poursuivre son enquête sur les voies de l'américanisation. Renversant dès l'introduction le sinocentrisme, actuelle monnaie courante, il s'agit d'approfondir l'idée centrale selon laquelle, à partir du dévoilement de l'Amérique, l'histoire (celle des Occidentaux mais aussi celle des autres ?) s'édifie dans le cadre d'une inscription de l'espace de l'Amérique dans un espace

mondial. Ce volume étudie les mécanismes de l'américanisation comme des dynamiques de constructions géographiques et politiques, religieuses ou juridiques : les questions nouvelles d'implantation et de conversion posées par l'Amérique se confrontent en permanence à une série de résonances mondialisées, au niveau des espaces géographiques (la question des portes, des passages, des voies qui opèrent un ensemble de connexions, des projections cartographiques avec l'Asie en permanence dans la mire) et culturels (parcours par des porteurs d'américanisation comme l'Inca Garcilaso), et au niveau de l'écriture du droit (le jeu des catégories juridiques entre Ancien et Nouveau Monde) et de l'histoire (celle d'une américanisation préparée dès le Moyen Âge). Dans tous les cas, cela suppose de concevoir l'Amérique comme un laboratoire pour l'Occident : les processus d'américanisation en oeuvre sont autant de raccords, de filiations, de symétries des temps et des espaces.

Therapeutic, Probiotic and Unconventional Foods compiles the most recent, interesting and innovative research on unconventional and therapeutic foods, highlighting their role in

improving health and life quality, their implications on safety, and their industrial and economic impact. The book focuses on probiotic foods, addressing the benefits and challenges associated with probiotic and prebiotic use. It then explores the most recently investigated and well-recognized nutraceutical and medicinal foods and the food products and ingredients that have both an impact on human health and a potential therapeutic effect. The third and final section explores unconventional foods and discusses intriguing and debated foods and food sources. While research has been conducted on the beneficial biological effects of probiotics and therapeutic food, the use of these foods remains controversial. To overcome the suspicion of the use of alternative, homeopathic and traditional products as therapy, this book reveals and discusses the most recent and scientifically sound and confirmed aspects of the research. - Compiles the most recent, interesting and innovative research on unconventional and therapeutic foods - Highlights the role of unconventional and therapeutic foods in improving health and life quality - Discusses the implications of unconventional and therapeutic foods on safety - Presents the industrial and economic impact of unconventional and therapeutic foods

You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, "lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely." The three books are *The Timeless Way of Building*, *The Oregon Experiment*, and this book, *A Pattern Language*. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain "languages," which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. "Patterns," the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today.

A Few Acres of Ice is an in-depth study of France's complex relationship with the Antarctic, from the search for Terra Australis by French navigators in the sixteenth century to France's role today as one of seven states laying claim to part of the white continent. Janet Martin-Nielsen focuses on environment, sovereignty, and science to reveal not only the political,

commercial, and religious challenges of exploration but also the interaction between environmental concerns in polar regions and the geopolitical realities of the twenty-first century. Martin-Nielsen details how France has worked (and at times not worked) to perform sovereignty in Terre Adélie, from the territory's integration into France's colonial empire to France's integral role in making the environment matter in Antarctic politics. As a result, *A Few Acres of Ice* sheds light on how Terre Adélie has altered human perceptions and been constructed by human agency since (and even before) its discovery.

Les déformations crâniennes positionnelles (DCP) du nourrisson - « tête plate » dans le langage courant - concernent un nombre très conséquent d'enfants. Elles sont source d'inquiétude pour les parents alors qu'elles pourraient être évitées grâce à un diagnostic et une prise en charge précoces. De nombreux dogmes et croyances sur ces DCP sont répandus parmi les professionnels de santé, pouvant mener à des erreurs diagnostiques et des retards de prise en charge. Dans ce contexte, cet ouvrage constitue une base solide de connaissances théoriques et pratiques qui permet une prise en charge efficace et harmonisée des enfants concernés. Son objectif est de réunir des données fiables, récentes et consensuelles sur les DCP du nourrisson. Dans la première partie, les aspects théoriques sont abordés, notamment les causes, les facteurs de risque, l'épidémiologie ou encore les conséquences des DCP. Dans les parties suivantes, des notions pratiques concernant les éléments diagnostiques et cliniques, ainsi que la prise en charge sont détaillées. Près de 150 photos et dessins accompagnent le texte. L'originalité et la force de ce livre résident dans son aspect pluridisciplinaire : 22 professionnels représentant 12 disciplines différentes ont co-écrit cet ouvrage, en s'appuyant à la fois sur leur expérience pratique et sur les récentes données scientifiques internationales sur le sujet. L'enjeu est avant tout une réflexion commune et cohérente entre professionnels, qu'il s'agisse du bilan diagnostique, de la prévention ou de l'orientation thérapeutique. Cet ouvrage s'adresse à tous les professionnels médicaux et paramédicaux travaillant avec des nourrissons ou de jeunes enfants (médecin, pédiatre, sage-femme, infirmière et auxiliaire puéricultrice, kinésithérapeute, ostéopathe, psychomotricien, chiropracteur, etc.), mais aussi aux parents s'intéressant à ce sujet.

What can Montesquieu still teach us today? Montesquieu was the first political writer who first formulated the principles of separation of powers and the independence of justice. He was the first to scientifically study human institutions, both ancient and modern, Asiatic and European, African and American. Again, he was the first thinker to theorize Federal Democracy, systematically tracking down the root causes of human events in its environmental, cultural, historical, and geographical aspects. Analysing several aspects of Montesquieu's philosophical and political thought, this volume highlights his stoicism, realism, anti-despotism as well as his staunch defence of human dignity. Introducing one of the sharpest thinkers of modernity, this book offers fundamental tools to understand the very ground of our contemporary times.

Longo Mai'nin kuruluş kararı, neoliberalizmin hâkim olmaya başladığı bir dönemde 18-20 Aralık 1972 tarihlerinde, on farklı Avrupa ülkesinden gelen aktivistlerin, Bâle'da yaptıkları kongrede alınmıştır. Fransa'da kurulan, üyelerinin tarımla ve çeşitli zanaatsal etkinliklerle uğraştığı politik ve kolektif bir eko-tarım

deneyimidir. Kitap bu topluluktaki insanların kendi aralarındaki hiyerarşiyi en aza indirme çabalarını ve tarım için seferber edilen canlılarla olan ilişkilerini, özgürlük pratiği açısından ele almaktadır. Kitabın temel sonucu, insanların bu özyönetim deneyimlerinin, diğer canlıların yönetimine dayandığıdır. Komünü, tarım ve zanaatkarlık yaparak politik mücadeleye devam edebilecekleri ve hiyerarşik ilişkilerin olmadığı bir yapılanma şeklinde tasavvur etmişlerdir. Bu karardan sadece altı ay sonra, Güney Fransa'da, içinde ormanın ve yerleşim yerlerinin olduğu, iki yüz yetmiş hektarlık bir araziye satın alarak yerleşmişlerdir. Kiraz Özdoğan, Güney Fransa'daki komünde, bizzat yaşayarak bu pratiği deneyimlemiştir. Kurucularıyla görüşmüş, yaşamını komünde sürdürenlerle birlikte yaşamış ve gelip gidenlerin görüşlerini alarak bu özgün eseri yazmıştır. Bu çalışmanın, Türkiye'deki deneyimlere büyük katkı sağlayacağını ve tartışmalara geniş bir açı kazandıracağını düşünüyoruz. Değişik isimler altında da olsa, başka yaşam deneyimlerini yayınlamaya ve bir arada yaşamak üzerine metinler üretmeye devam ediyoruz. Bu kez sadece keyifli okumalar değil; katılmaya, birlikte yaşamaya ve yeni niyetli topluluklar kurmaya doğru hareketlenmenizi diliyoruz.

VII Congresso nazionale di archeologia medievale. Pré-tirages (Lecce, 9-12 settembre 2015). Vol. 1 Springer Nature Focusing on Messiaen's relation to history - both his own and the history he engendered - the Messiaen Perspectives volumes convey the growing understanding of his deep and varied interconnections with his cultural milieu. Messiaen Perspectives 1: Sources and Influences examines the genesis, sources and cultural pressures that shaped Messiaen's music. Messiaen Perspectives 2: Techniques, Influence and Reception analyses Messiaen's compositional approach and the repercussions of his music. While each book offers a coherent collection in itself, together these complementary volumes elucidate how powerfully Messiaen was embedded in his time and place, and how his music resonates ever more today. Messiaen Perspectives 2: Techniques, Influence and Reception explores Messiaen's imprint on recent musical life. The first part scrutinizes his compositional technique in terms of counterpoint, spectralism and later piano music, while the second charts ways in which Messiaen's influence is manifest in the music and careers of Ohana, Xenakis, Murail and Quebecois composers. The third part includes case studies of Messiaen's reception in Italy, Spain and the USA. The volume also includes an ornithological catalogue of Messiaen's birds, collates information on the numerous 'tombeaux' pieces he inspired, and concludes with a Critical Catalogue of Messiaen's Musical Works.

NEMO Near-Eastern Musicology Online Vol. 4 Nos. 6 & 7 Springer This book focuses on the decision of the Tribunal in the South China Sea Arbitration that China had operated its law enforcement vessels in ways that created risks of collision with Philippine official vessels at Scarborough Shoal in April and May 2012. The book explains the International Regulations for Preventing Collisions at Sea (COLREGS) and the incidents in layperson's terms. It analyzes China's violations of the COLREGS on the basis of confidential Philippine documents declassified for the Arbitration, technical works by professional mariners, and the reports submitted by the navigational safety experts to the Tribunal. It pays attention to Chinese post-arbitration critiques of the Tribunal's decision, which it characterizes as rationalizations of collisions as instruments of Chinese foreign policy. It contrasts China's conduct with the practice of the US and Western European States, which mandate compliance with collision regulations even during law enforcement operations. The book draws on sources in five languages (English, French, German, Italian, and Spanish), and helps the reader understand the

pattern of China's harassment of vessels from littoral and non-littoral States in the South China Sea as well as the absence of legal foundations for China's rationalizations of its behavior.

Nonnus of Panopolis in Context III Frank Alva Nonnus of Panopolis (5th c. AD), the most important Greek poet of Late Antiquity, is best known for his *Dionysiaca*, a grand epic that gathers together all myths associated with Dionysus, god of wine and mysteries. The poet also authored the *Paraphrase of St. John's Gospel* which renders the Fourth Gospel into sophisticated hexameter verse. This volume, edited by Filip Doroszewski and Katarzyna Jażdżewska, brings together twenty-six essays by eminent scholars that discuss Nonnus' cultural and literary background, the literary techniques and motifs used by the poet, as well as the composition of the *Dionysiaca* and the exegetical principles applied in the *Paraphrase*. As such, the book will significantly deepen our understanding of literary culture and religion in Late Antiquity.

Jacobus Cornelius Kapteyn All'Insegna del Giglio Climate change impacts upon the world's poorest most heavily. It is therefore essential that international development initiatives focus on improving the ability of developing countries to adapt to the effects of climate change. This book, a product of research by the JICA-RI (Research Institute of the Japan International Cooperation Agency), examines climate change adaptation from the perspective of development cooperation in order to provide useful lessons for those engaged in research, policy and practice in this vital area. In this book the editors have brought together a wide range of case studies from across Africa and Asia, covering urban and rural areas and different sectors including water, agriculture and disaster management, in order to examine the following: o high-resolution climate change projection in Asia and how this can be used in planning appropriate adaptation responses o in-depth case studies of climate change projections, social, economic and environmental impact and vulnerability assessment and adaptation in rural Thailand and urban Philippines o cases across Africa for which climate data is less readily available and alternative approaches need to be adopted o the current situation amongst international donors o emerging issues caused by climate change In the introductory section, the editors draw together the full implications from the case studies to discuss how international communities can support adaptation in developing countries and to give an assessment of bilateral projects. They reflect on the lessons learned and offer recommendations for future research and international development cooperation.

Discovering Françoise Dolto Yeni İnsan Yayınevi Gerald K. Stone has collected books about Canadian Jewry since the early 1980s. This volume is a descriptive catalog of his Judaica collection, comprising nearly 6,000 paper or electronic documentary resources in English, French, Yiddish, and Hebrew. Logically organized, indexed, and selectively annotated, the catalog is broad in scope, covering Jewish Canadian history, biography, religion, literature, the Holocaust, antisemitism, Israel and the Middle East, and more. An introduction by Richard Menkis discusses the significance of the Catalog and collecting for the study of the Jewish experience in Canada. An informative bibliographical resource, this book will be of interest to scholars and students of Canadian and North American Jewish studies.

Fluid Mechanics, Second Edition deals with fluid mechanics, that is, the theory of the motion of liquids and gases. Topics covered range from ideal fluids and viscous fluids to turbulence, boundary layers, thermal conduction, and diffusion. Surface phenomena, sound, and shock waves are also discussed, along with gas flow, combustion, superfluids, and relativistic fluid dynamics. This book is comprised of 16 chapters and begins with an overview of the fundamental equations of fluid dynamics, including Euler's equation and Bernoulli's equation. The reader is then introduced to the equations of motion of a viscous fluid; energy dissipation in an incompressible fluid; damping of gravity waves; and the mechanism whereby turbulence occurs. The following chapters explore the laminar boundary layer; thermal conduction in fluids; dynamics of diffusion of a mixture of fluids; and the phenomena that occur near the surface separating two continuous media. The energy and momentum of sound waves; the direction of variation of quantities in a shock wave; one- and two-dimensional gas flow; and the intersection of surfaces of discontinuity are also also considered. This monograph will be of interest to theoretical physicists.

[...] Eh quoi ! se disait-il, serais-je condamné à travailler comme journalier, comme homme de peine, dans les lieux mêmes où mon père cultivait pour son propre compte ? La pensée d'émigrer, de s'expatrier, lui venait bien quelquefois, mais il la repoussait aussitôt comme anti-patriotique, anti-nationale. [...] Mais dites-moi, je vous prie, puis-je en toute confiance choisir dans les milliers d'arpents non encore défrichés de ces vastes Cantons de l'Est, le lot qui me conviendra, sauf à en payer plus tard le prix au propriétaire, quand il me sera connu ? [...] Oh ! Gardez-vous-en bien. Si je vous racontais tous les malheurs qui sont résultés des imprudences de ce genre, et dont nos pauvres compatriotes ont été les victimes, depuis un certain nombre d'années, vous en frémiriez. Les grands propriétaires de ces terres incultes ne sont pas connus aujourd'hui, mais ils se cachent comme le loup qui guette sa proie ; et lorsque, après plusieurs années de travail, un défricheur industriel aura doublé la valeur de leur propriété, ils se montreront tout-à-coup pour l'en faire déguerpir. [...] Eh bien ! dit Jean d'un ton sérieux, je suis devenu propriétaire. J'ai maintenant à moi, en pleine propriété, sans aucune redevance quelconque, sans lods et ventes, ni cens et rentes, ni droit de banalité, ni droit de retrait, ni aucun droit quelconque, un magnifique lopin de terre de cent acres de terre...

Messiaen Perspectives 2: Techniques, Influence and Reception BRILL

This psychobiographical study of the renowned French pediatrician and psychoanalyst Françoise Dolto introduces both her theories of child development and her unique insights into language and identity. A friend of Jacques Lacan's, Dolto believed that we are all humanized through language, and that the words we use carry unconscious traces of our early histories of love,

suffering and desire. Suggesting that infants unconsciously symbolize and that a continuous circulation of unconscious affects—the transference—prevails in all language-based relations, her findings challenge assumptions about autism, autobiography, linguistics, literacy, pedagogy and therapy. Dolto's own corpus—a rich archive blending the personal and professional—demonstrates this, with echoes between Dolto's constructs about the child and her own challenging childhood. This fascinating book will not only introduce the work of Françoise Dolto to many readers, but will be a valuable resource for all psychoanalytic researchers and theorists interested in childhood, language and identity.

A partir del hallazgo del manuscrito de Orán, posible relato autobiográfico de Miguel de Cervantes, Álvaro Espina reconstruye en esta novela la vida del escritor durante los años que pasó en la corte al servicio de los príncipes de Éboli. El contenido de un cartapacio descubierto tras el terremoto de Orán permite al editor de esta novela reconstruir la vida de Cervantes en Madrid entre 1566 y 1569, antes de su huida a Italia. Aunque el texto aparenta haber sido dictado o escrito por el propio Cervantes, el editor no descarta que se trate de una autobiografía apócrifa, de autor desconocido. El joven Miguel de Cervantes se instala con su familia en una casa de la calle Atocha de Madrid y entra a formar parte de la casa Éboli como secretario privado de los príncipes y preceptor de su hija Ana. Al mismo tiempo prepara su examen de Bachiller por la Universidad Complutense en el estudio de López de Hoyos. La obra relata la etapa más desconocida de la vida de Cervantes, mientras culmina su educación, y permite asomarse a lo que pudieron ser sus primeros pasos en el amor y en la creación literaria, como narrador predilecto de Juana de Austria, del príncipe don Carlos y de Isabel de Valois, antes de la desdichada desaparición del heredero al trono y de la reina. La condición de testigo de las intrigas palaciegas que se desarrollan alrededor de esta tragedia tendrá para el joven Cervantes consecuencias imprevisibles. Reseñas: «Una gran novela que nos acerca a lo que pudo ser la vida de Cervantes en el Madrid de Felipe II y a las intrigas de la corte. Alvaro Espina es un gran contador de historias y su conocimiento de la época es extraordinario.» Julia Navarro «A partir de un supuesto manuscrito cervantino encontrado en Orán, el autor desarrolla una trama casi policíaca que mezcla gracia y erudición, pasión y distancia, imaginación y trabajo investigador. Componiendo este texto, Álvaro Espina se ha divertido mucho, a la vez que ha aprendido otro tanto sobre las entretelas de la corte de Felipe II y de la vida española del llamado Siglo de Oro.» José Álvarez Junco «Ha llegado el momento de educar nuestro presente y la literatura es un buen punto de partida. Cervantes en la casa de Éboli, la primera novela de Álvaro Espina, es un estupendo compañero de viaje.» El Economista En los blogs... «En ese apasionante y vertiginoso Madrid de los Austrias la trama nos sumerge en un relato de intrigas palaciegas, casi policíacas. Se hace un repaso, desde la ficción, a la juventud del escritor, a sus amores y desengaños, a sus inquietudes y sus primeros pinitos con la literatura.» Blog La piedra de Sísifo «Álvaro Espina nos deleita con esta apasionante biografía reconstruida a partir de un manuscrito escrito por Cervantes. Una novela que puede que se convierta en una de las joyas de la literatura española.» Blog Entérate de lo último
