The tenth annual Advertising and Consumer Psychology Conference held in San Francisco focused on branding -- a subject generating intense interest both in academia and in the "real world." The principle theory behind these conferences is that much can be gained by joining advertising and marketing professionals with academic researchers in advertising. Professionals can gain insight into the new theories, measurement tools and empirical findings that are emerging, while academics are stimulated by the insights and experience that professionals describe and the research questions that they pose. This book consists of papers delivered by experts from academia and industry discussing issues regarding the role of advertising in the establishment and maintenance of brand equity -- making this volume of interest to advertising and marketing specialists, as well as consumer and social psychologists.

"This pioneering study of United States direct investment in Japan will interest academic specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why a little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy." Psychology Press

Una inflexión en la trayectoria evolutiva de la humanidad, señalada por Nostradamus a través de una de sus más famosas profecías, se convierte en realidad en medio de una cruenta guerra que el ejército colombiano, apoyado por el ejército americano, libra contra una nueva y temible organización terrorista internacional. Nicolás Sarmiento demostro ser, desde que nació en 1997, un niño diferente. Sus habilidades y dones se fueron desarrollando hasta que tuvo que enfrentarse con

un enemigo mucho más poderoso que él, un complot de alcances inimaginables, que pone en peligro la continuidad de la raza humana, tal y como hoy la conocemos. Las fuerzas del bien y del mal parecen haber escogido a Nicolás como instrumento de una más de sus batallas. En medio de la acción y el suspenso que transcurre en diferentes escenarios de Colombia y los Estados Unidos, el lector se encontrará -finalmente- con una realidad que tarde o temprano la humanidad tendrá que afrontar: la posibilidad de que las personas podamos alcanzar la inmortalidad. Por ser una historia cuyo desenlace ocurre en el futuro (2019), la tecnología es un factor preponderante y es por eso que sus aspectos técnicos han sido cuidadosamente estudiados y documentados. How could one company—General Motors—meet disaster on one continent and achieve explosive growth on another at the very same time? While General Motors was hurtling towards bankruptcy in 2009, GM's subsidiary in China was setting new sales and profit records. This book reveals how extraordinary people, remarkable decisions and surprising breaks made triumph in China possible for General Motors. It also shows just how vulnerable that winning track record remains. No small part of GM's success in China springs from its management of shifting business and political relationships. In China, the government makes the rules for—and competes in—the auto industry. GM's business partner, the City of Shanghai, is both an ally and a competitor. How does such an unnatural relationship work on a day-to-day basis? Where will it go on the future? General Motors also engages in constant battles with other global and Chinese car makers for the hearts of demanding Chinese consumers. Dunne gives us rare glimpses into the mindsets and behavior of this new moneyed set, the world's newest class of wealthy consumers. China is already the number one car market in the world. During the next ten years, China will export millions of cars and trucks globally, including to the United States. American Wheels, Chinese Roads presents readers with fascinating illustrations of what to expect when Chinese cars, companies, and business people arrive on our shores.

What do you do if you're a Ford salesman, and someone says, "Ford's cars are no good! I wouldn't take one if you gave it to me. I'm going to get Chevrolet cars." Instead of arguing, try this approach: Respond by agreeing with the person. "Brother, listen, Chevrolet's cars are good cars. Their cars are made by a fine company and sold by good people." [When you agree with him, this is a sure way to avoid an argument]. Once he's exhausted the points about Chevrolet's cars, you can begin to talk about the good points of Ford's cars. A man was warned by an officer for not putting his dog on a leash. Some days later, he was caught with the same offence. Rather than wait for the officer to start speaking, he took the initiative by admitting his mistake, "Officer, you've caught me red-handed. I'm guilty. I have no excuses." The chances are, when you begin to condemn yourself, the officer would want to feel important and nourish his self-esteem by showing you mercy. During a course in human relations, a class wrote down criticisms to a certain man to let him see himself as others see him. One man was broken-hearted because he was denounced for being too sure of himself, too self-centred, too domineering, an egoist, trouble-maker, and a communist. One of his critics ordered him to get out of class. Instead of denouncing his critics, he said, "Boys, I certainly am unpopular. There can be no mistaking that. It hurts me to read these comments, but they are good for me. They have taught me a lesson. I long for friends just as you do. I want to make people like me. Won't you help me? Won't you please write me some more criticisms and tell me what I can do to improve my personality? If you will, I'll try hard, awfully hard, to change."
