SME Policy Index: Western Balkans and Turkey 2019 Assessing the Implementation of the Small Business Act for Europe Financing SMEs and Entrepreneurs 2020 An OECD Scoreboard An OECD Scoreboard

This report evaluates how to strengthen Thailand's SME and entrepreneurship policies to promote innovative entrepreneurship and SME innovation at regional level. This is critical in supporting a shift towards a more innovation-driven and regionally-balanced economy in Thailand.

An OECD Scoreboard OECD Publishing

The pandemic recession in 2020 was milder than in most other OECD countries, but recent outbreaks have prompted the country to begin transitioning from a zero tolerance to a containment approach to the virus. As the recovery becomes more firmly entrenched, public policy must focus on setting the conditions for another prolonged period of strong and well-distributed growth in living standards.

SME Policy Index: The Mediterranean Middle East and North Africa 2014 Implementation of the Small Business Act for Europe OECD Publishing

SMEs that grow have a considerable positive impact on employment creation, innovation, productivity growth and competitiveness. Digital technologies and global value chains offer new opportunities for SMEs to participate in the global economy, innovate and strengthen productivity. Yet SMEs are lagging behind in the digital transition and are disproportionately affected by market failures, trade barriers, policy inefficiencies and the quality of institutions. A cross-cutting approach to SME policy can enhance SME innovation and scale-up, as well as their contributions to inclusive growth. This includes a business environment conducive to risk-taking and experimentation by entrepreneurs, as well as access to entrepreneurship competencies, management and workforce skills, technology, innovation, and networks.

The Productivity-Inclusiveness Nexus OECD Publishing

Smaller companies are abundant in the business realm and outnumber large companies by a wide margin. Understanding the inner workings of small businesses offers benefits to the consumers and the economy. The Handbook of Research on Intrapreneurship and Organizational

Sustainability in SMEs is a critical scholarly resource that examines the strategies and concepts that will assist small and medium-sized enterprises to achieve competitiveness. Featuring coverage on a broad range of topics such as financial management, corporate sustainability, and organizational culture, this publication is geared towards business managers, professionals, graduate students, and researchers working in the field of smaller-scale business development initiatives.

International Monetary Fund

This study evaluates the effectiveness of IFC's strategic priority of private sector development in frontier countries (high-risk and/or low-income) by supporting micro, small, and medium enterprises (MSMEs) during fiscal years (FY)1994-2006. IFC has channeled its support to MSME's by: i) indirect financing through financial intermediaries, and ii) by indirect institution-building support via specialized regional small and medium enterprise (SME) development facilities. This evaluation analyzes IFC's development results and provides recommendations on how IFC's performance can be improved in this area going forward.

OECD Studies on SMEs and Entrepreneurship SME and Entrepreneurship Policy in Israel 2016 World

Bank Publications

This report examines Israel's performance in stimulating SMEs and entrepreneurship and makes recommendations for government policy.

Financing SMEs and Entrepreneurs 2017 An OECD Scoreboard OECD

The 8th edition of the Scoreboard on SME and Entrepreneurship Finance report provides data from 46 countries around the world on debt finance, alternative finance instruments and financing conditions, as well as information on policy initiatives to improve their access to finance.

OECD Studies on SMEs and Entrepreneurship SME and Entrepreneurship Policy in Indonesia 2018 OECD Publishing

This publication presents the findings of the OECD review of SME and Entrepreneurship Policy in Viet Nam. It offers an in-depth examination of the performance of small and medium enterprises (SMEs) and entrepreneurship in Viet Nam, the quality of the business environment, and national policies in support of new and small businesses.

PISA 2015 Assessment and Analytical Framework Science, Reading, Mathematic, Financial Literacy and Collaborative Problem Solving OECD Publishing

Robust SME sectors are critical to the prosperity of the six Western Balkan economies and Turkey, accounting for over 70% of those employed in the business sector and generating 65% of value added in these seven economies. Yet their potential remains untapped, as SMEs across the region grapple ...

Evidence, Policy Responses and Guidance OECD Publishing

The importance of financial inclusion is increasingly recognized by policymakers around the world. Small and medium-sized enterprise (SME) financial inclusion, in particular, is at the core of the economic diversification and growth challenges many countries are facing. In the Middle East and Central Asia (MENAP and CCA) regions, SMEs represent an important share of firms, but the regions lag most others in terms of SME access to financing.

OECD Studies on SMEs and Entrepreneurship Entrepreneurship Policies through a Gender Lens OECD Publishing

What is important for citizens to know and be able to do? The OECD Programme for International Student Assessment (PISA) seeks to answer that question through the most comprehensive and rigorous international assessment of student knowledge and skills.

Financial Inclusion, Regulation, and Education OECD Publishing

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech

Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

OECD Reviews of Innovation Policy Innovation in Southeast Asia OECD Publishing

Austrian citizens enjoy high living standards, well-being and social cohesion. Until the ongoing global slowdown, robust employment growth in the private sector kept domestic demand and investment remarkably robust. More people moved into work and inward migration has been strong. At the same time, new challenges related to social cohesion challenges have emerged, as increased skill differences in the population and diverging productivity performance across firms have generated a higher range of outcomes for job quality and market wages than in the past. Myriad entrepreneurial firms across all regions should better adapt to new megatrends of ageing, globalisation and digitalisation.

PISA 2018 Assessment and Analytical Framework OECD Publishing

The SME Policy Index is a benchmarking tool for emerging economies to monitor and evaluate progress in policies that support small and medium-sized enterprises. The ASEAN SME Policy Index 2018 is a joint effort between the Economic Research Institute for ASEAN and East-Asia (ERIA), the Organisation for Economic Co-operation and Development (OECD) and the ASEAN Coordinating Committee on Micro, Small and Medium Enterprises (ACCMSME). The report is the outcome of work conducted by the ten ASEAN Member States (Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Viet Nam). Divided into eight policy dimensions, it builds on the previous edition of the ASEAN SME Policy Index 2014. The current edition presents an updated methodology which makes this document a powerful tool to assess the strengths and weaknesses that exist in policy design, implementation, and monitoring and evaluation for SMEs, and allows for a benchmarking of the level to which the ASEAN Strategic Action Plan for SME Development (SAP SMED) 2016-2025 has been implemented. Its objective is to enhance the capacity of policy makers to identify policy areas for future reform, as well as

implement reforms in accordance with international good practices. The report provides a regional perspective on recent developments in SME-related policies in Southeast Asia as well as in individual ASEAN Member States. Based on this analysis the report provides a menu of concrete policy options for the region and for the individual countries.

Progress in the Implementation of the Small Business Act for Europe OECD Publishing

This book provides a comparative overview across the region for SME policy development.

Implementation of the Small Business Act for Europe Asian Development Bank

Financial inclusion is receiving increasing attention as having the potential to contribute to economic and financial development while at the same time fostering more inclusive growth and greater income equality. Although substantial progress has been made, there is still much to achieve. East Asia, the Pacific, and South Asia combined account for 55% of the world's unbanked adults, mainly in India and the People's Republic of China. This book surveys the experience of a number of advanced and Asian emerging economies to assess factors affecting the ability of low-income households and small firms to access financial services, including financial literacy, financial education programs, and financial regulatory frameworks, as well as identify policies that can improve their financial access while maintaining financial stability. It aims to identify successful experiences and important lessons that can be adopted by other emerging economies. The studies cover the experiences of Germany, the United Kingdom, Bangladesh, India, Indonesia, the Philippines, Sri Lanka, and Thailand. The book adopts a practical and holistic approach to issues related to financial inclusion. For example, innovative methods of promoting financial access, such as mobile phone banking and microfinance, require corresponding innovations in regulatory frameworks, perimeters, and capacity. Moreover, programs in the areas of financial education and consumer protection are needed to enable households and firms to take full advantage of improvements in financial access.

OECD Studies on SMEs and Entrepreneurship Russian Federation: Key Issues and Policies OECD Publishing

Financing SMEs and Entrepreneurs 2017 provides information on debt, equity, asset-based finance, and framework conditions for SME and entrepreneurship finance, complemented with an overview of recent policy measures to support access to finance in 39 countries. The sixth instalment of this ...
