Small enough to fit in your pocket, this practical little book will help you change the world as you shop! While we strive to make our vote count every four years, few of us realize that our most immediate power to shape the world is squandered on a daily basis. Every dollar we spend has the potential to create social and environmental change. In fact, it already has. The world that exists today is in large part a result of our purchasing decisions. The Better World Shopping Guide rates hundreds of products and

services from A to F, so you can quickly tell the "good guys" from the "bad guys" and ensure your money is not supporting corporations that make decisions based solely on the bottom line. Drawing on decades of meticulous research, this completely revised and updated sixth edition will help you find out who actually "walks the talk" when it comes to: Environmental sustainability Human rights Community involvement Animal protection Social justice Small enough to fit in a back pocket or handbag and organized in a user-friendly format, *The Better World Shopping Guide* helps you reward companies who are doing good, penalize those involved in destructive activities, and change the world as you shop! Ellis Jones, PhD is the award-winning, bestselling author of five previous editions of *The Better World Shopping Guide*, and co-author of *The Better World Handbook*. A scholar of social responsibility, global citizenship, and everyday activism, he has dedicated himself to uncovering practical ways for people to make a difference in the world. He currently teaches at Holy Cross College in Worcester, MA.

Evaluation Guide: Introduction to MicroStrategy 10 John Wiley & Sons

Written by a team of lawyers with long-standing experience in patent litigation in Europe, this book is a comprehensive and practical guide to European patent law, highlighting the areas of consistency and difference between the most influential European patent law jurisdictions: the European Patent Office

(EPO), England & Wales, France, Germany and the Netherlands. It is frequently the case that the decisions and approaches of these courts are cited by European patent lawyers of all jurisdictions when submitting arguments in their own national courts. The book is therefore intended to provide a guide to patent lawyers acting in the national European courts today. The book also looks to the future, by addressing all the areas of patent law for which the proposed Unified Patent Court (UPC) will need to establish a common approach. Uniquely, the book addresses European patent law by subject matter area, assessing the key national and EPO approaches together rather than in nation-by-nation chapters; and provides an outline in each chapter of the common ground between the national approaches, as a guide for the possible application of European patent law in the UPC.

This book is an illustrated guide to assistive technologies and devices (AT/AD). It chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. In general, AT can include mobility devices such as walkers and wheelchairs, as well as hardware, software, and peripherals that assist people with disabilities in accessing computers or other information technologies. Advanced AT has coincided with the advent of personal electronic devices that could be customized for use, such as computers and smart phones. For people with disabilities, AT includes simple gadgets for the home and office, electronic gadgets and complex computer systems for the workplace, mobility aids and accessible vans for getting around and modified equipment for lifestyle needs, such as talking ATMs and strobe light alarm systems. This book empowers people with disabilities to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.
