ROJAS NATHANIEL

Contemporary Moral Arguments Jason Aronson

This collection of nine papers on topics relating to the title, brings together many of Geach's thoughts on such topics as resurrection, deductive proof of the existence of God, God's role in ethics, materialism, and the relation of time and prayer.

Holy War, Holy Peace Broadview Press

This book discusses three possible human enhancement paradigms and explores how each involves different values, uses of technology, and different degrees and kinds of ethical concerns. A new framework is advanced that promotes technological innovation that serves the improvement of the human condition in a respectful and sustainable way.

Ethical Issues in Nursing Springer

On the imperative of sustainable development: a philosophical and ethical appraisal / Johan Hattingh -- Integrating economic development, social justice and ecological sustainability: a case of sustainable development in the waste industry, eThekweni Unicity, Durban / Sara Freeman, Ndeybo Mgingqizana -- Environmental management: expertise, uncertainty, responsibility / Mike Ward --

Decentralising environmental management in Malawi: the challenge of capacity-building / Martin Mkandawire -- Policy playing out in the field: a case study of the implementation of sustainable agriculture in Uganda / Daniel Babikwa -- The evolution of people-and-parks relationships in South Africa's National Conservation Organisation / Kevin Moore, Lynette Masuku van Damme -- Industry and sustainability: a re-view through critical discourse analysis / Leigh Price -- Challenges for environmental journalism in Africa: a case story of NGO-based journalism in ecological youth of Angola / Vladimir Russo -- Curriculum patterning in environmental education: a review of developments in formal education in South Africa / Heila Lotz-Sisitka -- Indigenous knowledge and the school curriculum: a review of developing methods and methodological perspectives / Rob O'Donoghue, Edgar Neluvhalani -- Sustainable development in a post-colonial context: the potential for emancipatory research / Tsepo Mokuku -- Ambivalent globalising influences in a local context: the case of an environmental education practitioner's experience in Zambia / Justin Lupele.

Population Perils Routledge

Frankena -- The right to be saved from starvation / William Aiken - Give if it helps but not if it hurts / Joseph Fletcher -- Reason and

morality in a world of limited food / Richard A. Watson -- The morality of wealth / Michael A. Slote -- Lifeboat earth / Onora O'Neill -- Productive justice / Howard Richards -- Vegetarianism and "The other weight problem" / James Rachels.

A New Dictionary of Christian Ethics MIT Press

'The Trolley Problem Mysteries' considers whether who turns the trolley and/or how it is turned (or otherwise stopped) affect the moral permissibility of acting and suggests general proposals for when we may and may not harm some people to help others.

Justice Oxford University Press

This anthology, designed for use in undergraduate courses in environmental ethics, includes new and classic readings by leading writers in the field, full-length case studies, and many short discussion cases. Introductions and discussion questions are provided for all the essays, with each chapter introduced by a summary of the issues and appropriate philosophic, historical and scientific background. Exploring ethical theory, environmental ethics, science and the environmental movement, Earthcare also offers suggestions for students on how to think about ethics and the environment. Through many worldviews, religions and philosophical perspectives, this collection grapples with environmental ethics issues from valuing nature, concerns about the atmosphere, water, land, animals, and human population as well as the interlocking and often problematic interests of business, consumption, energy and sustainability. This book also features examples of a wide variety of environmentally engaged individuals, giving students a way of seeing the connections between the material studied and what they themselves might accomplish.

Lifeboat Ethic Versus Corporate Ethic Rowman & Littlefield

For thirty years, Peter Singer's *Practical Ethics* has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

Intercom Oxford University Press on Demand

In its seventh edition, "Social Ethics: Morality and Social Policy"

continues to provide material that will encourage reflective and critical examination of key contemporary moral problems. With additional readings and a new organization that groups related chapters together under four categories, this edition enhances the teachability that was the most salient characteristic of previous editions. The text maintains its ability to bring the central issues into clear focus, while allowing supporting arguments for widely diverse positions to be presented by those who embrace them.

Practical Ethics New York : Harper & Row

The third edition of *Global Politics: A New Introduction* continues to provide a completely original way of teaching and learning about world politics. The book engages directly with the issues in global politics that students are most interested in, helping them to understand the key questions and theories and also to develop a critical and inquiring perspective. Completely revised and updated throughout, the third edition offers up-to-date examples engaging with the latest developments in global politics, including the Syrian war and the refugee crisis, fossil fuel divestment, racism and Black Lives Matter, citizen journalism, populism, and drone warfare. *Global Politics: examines the most significant issues in global politics - from war, peacebuilding, terrorism, security, violence, nationalism and authority to poverty, development, postcolonialism, human rights, gender, inequality, ethnicity and what we can do to change the world; offers chapters written to a common structure, which is ideal for teaching and learning, and features a key question, an illustrative example, general responses and broader issues; integrates theory and practice throughout the text, by presenting theoretical ideas and concepts in conjunction with a global range of historical and contemporary case studies. Drawing on theoretical perspectives from a broad range of disciplines, including international relations, political theory, postcolonial studies, sociology, geography, peace studies and development, this innovative textbook is essential reading for all students of global politics and international relations.*

Titanic Taylor & Francis

As the first biography of Professor Herman Daly, this book provides an in-depth account of one of the leading thinkers and most widely read writers on economics, environment and sustainability. Herman Daly's economics for a full world, based on his steady-state economics, has been widely acknowledged through numerous prestigious international awards and prizes. Drawing on extensive interviews with Daly and in-depth analysis of his publications and debates, Peter Victor presents a unique insight into Daly's life from childhood to the present day, describing his intellectual development, inspirations and influence. Much of the book is devoted to a comprehensive

account of Daly's foundational contributions to ecological economics. It describes how his insights and proposals have been received by economists and non-economists and the extraordinary relevance of Daly's full world economics to solving the economic problems of today and tomorrow. Innovative and timely, this book will be of great interest to students, scholars, researchers, activists and policy makers concerned with economics, environment and sustainability.

God and the Soul Transaction Publishers

The Anthropocene is a concept which challenges the foundations of humanities scholarship as it is traditionally understood. It calls not only for closer engagement with the natural sciences but also for a synthetic approach bringing together insights from the various subdisciplines in the humanities and social sciences which have addressed themselves to ecological questions in the past. This book is an introduction to, and structured survey of, the attempts that have been made to take the measure of the Anthropocene, and explores some of the paradigmatic problems which it raises. The difficulties of an introduction to the Anthropocene lie not only in the disciplinary breadth of the subject, but also in the rapid pace at which the surrounding debates have been, and still are, unfolding. This introduction proposes a conceptual map which, however provisionally, charts these ongoing discussions across a variety of scientific and humanistic disciplines. This book will be essential reading for students and researchers in the environmental humanities, particularly in literary and cultural studies, history, philosophy, and environmental studies.

The Blair Reader Evidential Details

It is often said that with the election of Donald Trump nativism was raised from the dead. After all, here was a president who organized his campaign around a rhetoric of unvarnished racism and xenophobia. Among his first acts on taking office was to issue an executive order blocking Muslim immigrants from entering the United States. But although his actions may often seem unprecedented, they are not as unusual as many people believe. This story doesn't begin with Trump. For decades, Republicans and Democrats alike have employed xenophobic ideas and policies, declaring time and again that "illegal immigration" is a threat to the nation's security, wellbeing, and future. The profound forces of all-American nativism have, in fact, been pushing politics so far to the right over the last forty years that, for many people, Trump began to look reasonable. As Daniel Denvir argues, issues as diverse as austerity economics, free trade, mass incarceration, the drug war, the contours of the post 9/11 security state, and, yes, Donald Trump and the Alt-Right movement are united by the ideology of nativism, which binds together assorted anxieties and concerns into a ruthless political project. All-American Nativism provides a powerful and impressively researched account of the long but often forgotten history that gave us Donald Trump.

Thieves of Virtue John Wiley & Sons

This title was first published in 2001: Ethical thinking about medical decision-making has roots deep in history. This collection of contemporary essays by leading international scholars traces

the development of modern bioethics and explores the theory and current issues surrounding this widely contested field.

Ethics in International Politics? HSR Press

A Companion to Cultural Geography brings together original contributions from 35 distinguished international scholars to provide a critical overview of this dynamic and influential field of study. Provides accessible overviews of key themes, debates and controversies from a variety of historical and theoretical vantage points Charts significant changes in cultural geography in the twentieth century as well as the principal approaches that currently animate work in the field A valuable resource not just for geographers but also those working in allied fields who wish to get a clear understanding of the contribution geography is making to cross-disciplinary debates

The Anthropocene Penguin

After the publication of Atlas Shrugged in 1957, Ayn Rand occasionally lectured in order bring her philosophy of Objectivism to a wider audience and apply it to current cultural and political issues. These taped lectures and the question-and-answer sessions that followed not only added an eloquent new dimension to Ayn Rand's ideas and beliefs, but a fresh and spontaneous insight into Ayn Rand herself. Never before available in print, this publishing event is a collection of those enlightening Q & As. This is Ayn Rand on: ethics, Ernest Hemingway, modern art, Vietnam, Libertarians, Jane Fonda, religious conservatives, Hollywood Communists, atheism, Don Quixote, abortion, gun control, love and marriage, Ronald Reagan, pollution, the Middle East, racism and feminism, crime and punishment, capitalism, prostitution, homosexuality, reason and rationality, literature, drug use, freedom of the press, Richard Nixon, New Left militants, HUAC, chess, comedy, suicide, masculinity, Mark Twain, improper questions, and more.

Routledge Encyclopedia of Philosophy: Index Verso Books

As a broad concept, 'globalization' denotes the declining significance of national boundaries. At a deeper level, globalization is the proposition that nation-states are losing the power to control what occurs within their borders and that what transpires across borders is rising in relative significance. The Ethical Dimensions of Global Development: An Introduction, the fifth book in Rowman & Littlefield's Institute for Philosophy and Public Policy Studies series, discusses key questions concerning globalization and its implications, including: Can general ethical principles be brought to bear on questions of globalization? Do economic development and self-government require a duty of care? Is economic destiny crucial to individual autonomy? This collection provides readers with current information and useful insights into this complex topic.

Rethinking Human Enhancement HarperCollins Publishers

This cd-rom is for high school (and up) and is correlated with National Science Education Standards.

Exploring Fact and Value Augsburg Fortress Publishing

America's decorated, military intelligence remote viewer targets the SS Titanic - April, 1912 Learn of the Titanics astounding crew's nest circumstances as the ship turns from the ice Then, move to a

final resolution regarding Captain E.J. Smith's unknown non-drowning death. Book includes drawings of artifacts, whose shapes were only confirmed onboard after the ocean floor dredging of the wreck. Read History's only on board narrative - after the last life boat was away. Includes the Princess Diana Accident sessions Introduction.

A Companion to Cultural Geography Routledge

May 1999 Kinship systems profoundly influence household economic strategies and thereby affect a wide range of development outcomes. Das Gupta distinguishes the lifeboat ethic of Northern Europe's stem family system from the corporate ethic of North India's joint family system, which has much in common with that of China. She contrasts these family systems to show how norms of residence and inheritance * Profoundly influence our values and social constructs. * Shape patterns of conflict and cooperation between people, thus influencing many basic aspects of social organization and behavior. * Influence health outcomes by categorizing people according to whether their health is promoted or allowed to fail. * Shape a wide range of other development outcomes, including migration, strategies of household resource management, ways of exploiting commercial opportunities, and the operation of civil society. Das Gupta develops a number of hypotheses about the nature of these relationships. Some of these are substantiated quantitatively, and others can be tested empirically. This paper-a product of Regulation and Competition Policy, Development Research Group-is part of a larger effort in the group to study social institutions and development outcomes. Monica Das Gupta may be contacted at mdasgupta@worldbank.org.

Ethics and Medical Decision-Making Cambridge University Press

An argument against the "lifeboat ethic" of contemporary bioethics that views medicine as a commodity rather than a tradition of care and caring. Bioethics emerged in the 1960s from a conviction that physicians and researchers needed the guidance of philosophers in handling the issues raised by technological advances in medicine. It blossomed as a response to the perceived doctor-knows-best paternalism of the traditional medical ethic and today plays a critical role in health policies and treatment decisions. Bioethics claimed to offer a set of generally applicable, universally accepted guidelines that would simplify complex situations. In Thieves of Virtue, Tom Koch contends that bioethics has failed to deliver on its promises. Instead, he argues, bioethics has promoted a view of medicine as a commodity whose delivery is predicated not on care but on economic efficiency. At the heart of bioethics, Koch writes, is a "lifeboat ethic" that assumes "scarcity" of medical resources is a natural condition rather than the result of prior economic, political, and social choices. The idea of natural scarcity requiring ethical triage signaled a shift in ethical emphasis from patient care and the physician's responsibility for it to neoliberal accountancies and the promotion of research as the preeminent good. The solution to the failure of bioethics is not a new set of simplistic principles. Koch points the way to a transformed medical ethics that is humanist, responsible, and defensible.
