Proceedings of the 5th International Conference on Science, Education and Technology, ISET 2019, 29th June 2019, Semarang, Central Java, Indonesia Cambridge University Press

The COVID-19 pandemic was a forceful reminder that education plays an important role in delivering not just academic learning, but also in supporting physical and emotional well-being. Balancing traditional "book learning" with broader social and personal development means new roles for schools and education more generally.

Designed to complement every introductory library reference course, this is the perfect text for students and librarians looking to expand their personal reference knowledge, teaching failsafe

methods for identifying important materials by matching specific types of questions to the best available sources, regardless of format. Guided by a national advisory board of educators and practitioners, this thoroughly updated text expertly keeps up with new technologies and practices while remaining grounded in the basics of reference work. Chapters on fundamental concepts, major reference sources, and special topics provide a solid foundation; the text also offers fresh insight on core issues, including ethics, readers' advisory, information literacy, and other key aspects of reference librarianship; selecting and evaluating reference materials, with strategies for keeping up to date; assessing and improving reference services; guidance on conducting reference interviews with a range of different library users, including children and young adults; a new discussion of reference as programming; important special reference topics such as Google search, 24/7 reference, and virtual reference; and delivering reference services across multiple platforms. As librarians experience a changing climate for all information services professionals, in this book Cassell and Hiremath provide the tools needed to manage the ebb and flow of changing reference services in today's libraries.

AISTSSE 2018 European Alliance for Innovation

The House of Our Ancestors is a study of the Mountain Balinese or Bali Aga, an ethnic group with a distinct history and culture who are thought to be the indigenous people of Bali, Indonesia. In popular ideas of Balinese identity, the highland people feature as the conceptual counterpart to the royal houses established in the southern lowlands of the island. Hidden in shadow of this courtly culture, the world of the highland Balinese has been largely ignored even though Bali counts among the most researched localities in the world. This book explores their social organization and status economy from the perspective of an innovative theory of "precedence?". Regional domains, villages and origin houses among the Bali Aga are all conceived and ranked in reference to the basic ideas of a sacred origin in the past, and of an order of precedence connecting the past with the present. The analysis of precedence ranking, evident at all levels of Bali Aga social organization, leads to the development of a new theory of status for Austronesian societies that departs radically from the notion of hierarchy as proposed by Louis Dumont in his classic study of the Indian caste system.

Proceedings of the 1st Asian Conference on Humanities, Industry, and Technology for Society, ACHITS 2019, 30-31 July 2019, Surabaya, Indonesia IGI Global

We are delighted to introduce Proceedings of the 3rd International Symposium On Religious Life (ISRL 2020). This conference has brought academicians, researchers, developers and practitioners around the world. In collaboration with Indonesian Consortium for Religious Studies (ICRS) and Indonesian Institute of Sciences (LIPI), the Agency for Research, Development and Training of the Ministry of Religious Affairs (MoRA) convened bi-annual symposium with the following main theme: "Religious Life, Ethics and Human Dignity in the Disruptive Era". The 3rd ISRL highlighted the role of religion and ethics in the disruptive era that erode human values, civility, and dignity. In the processes of development and technological revolution, religion can play an essential role in providing spiritual, moral, and ethical guidance. In the context of the Covid-19 pandemic, religion is perceived in two ways: on the one hand, some faith communities have been willfully negligent and become 'super-spreaders' of the dangerous virus by defying stay-at-home orders. Yet, on the other hand, religion has also galvanized its adherents to support economically vulnerable and marginalized communities affected by the lockdown and social restrictions. Likewise, in democratization, religion gives society the necessary dynamic thrust to maintain its vibrancy, resiliency, and sustainability. This Symposium is therefore expected to delve into the complexity of how religion, religious values and faith communities confront the contemporary challenges to uphold ethics and human dignity. We strongly believe that ISRL conference provides a good forum for all academicians, researcher, developers and practitioners to discuss all religious Life, ethics and human dignity. We also expect that the future ISRL conference will be as successful and stimulating, as indicated by the contributions presented in this volume.

2021 International Conference on Applied Artificial Intelligence (ICAPAI) Brill Academic Publishers

The Indonesian Dutch Consortium on Muslim-Christian Relations brought together academics, intellectuals as well as social activists from both countries, Christians and Muslims alike. While what is published here is the academic output, the impact of the consortium has therefore been

much broader. The contributions are organized according to five generative themes: Identity, Religion and State, Gender, Hermeneutics and Theology of Dialogue. The book has attracted attention already before its publication. It is hoped that this project will inspire continuous efforts for interreligious dialogue. [Muslimisch-christliche Beziehungen. Vergleichende Untersuchungen und Beobachtungen in Indonesien und den Niederlanden] Wissenschaftler, Intellektuelle und Aktivisten aus den Niederlanden und Indonesien, Muslime und Christen, Frauen und Männer, haben sich hier erstmals in einem Konsortium zusammengefunden, um miteinander ins Gespräch zu kommen. Während mit diesem Band das Ergebnis vielfältiger gemeinsamer Forschungsprojekte vorgelegt wird, hat ihre Initiative darüber hinaus eine viel größere Breitenwirkung in Kirche und Gesellschaft. Die Beiträge sind anhand von fünf generativen Themen geordnet: Identität, Religion und Staat, Gender, Hermeneutik und Theologie des Dialogs. Das Buch hat bereits vor seiner Veröffentlichung großes Interesse auf sich gezogen und kann weitere Bemühungen um interreligiöse Dialoge in den verschiedensten Kontexten inspirieren.

The House of Our Ancestors European Alliance for Innovation

In terms of becoming a successful bioentrepreneur, there is still much more to learn. There are many ways to learn the essential fundamentals of entrepreneurship, including through the mistakes of previous businesses and models. Increased knowledge and a better understanding of what works can be derived from these previous failures and mistakes. Additionally, learning from other bioentrepreneurs can help businesses run successfully. By looking deeper into business models, product development, the fundamental concepts of bioentrepreneurship, and the essential characteristics of bioentrepreneurs, one can become better equipped to understand the role of biological sciences in entrepreneurship, specifically the role of product development.

Bioentrepreneurship and Transferring Technology Into Product Development provides a comprehensive understanding of the role of biological sciences, specifically in transforming technology into commercial product. This book compiles the theoretical and practical aspects of bioentrepreneurship and discusses the various factors, including creating business plans, acquiring funding, and successful business models. The chapters also cover areas such as small-scale product development, intellectual property rights, funding schemes for start-ups, and new prospective biotechnology product development. This book is essential for bioentrepreneurs, entrepreneurs, product developers, scientists, practitioners, researchers, academicians, and students interested in product development from a biological science perspective.

The proceedings of International Conference on Science, Education, and Technology 2019 are the compilation of articles in the internationally refereed conference dedicated to promote acceleration of scientific and technological innovation and the utilization of technology in assisting pedagogical process.

Theory and Analysis Delmar Pub

"Why write together?" the authors ask. They answer that question here, in the first book to combine theoretical and historical explorations with actual research on collaborative and group writing. Lisa Ede and Andrea Lunsford challenge the assumption that writing is a solitary act. That challenge is grounded in their own personal experience as long-term collaborators and in their

extensive research, including a three-stage study of collaborative writing supported by the Fund for the Improvement of Post-Secondary Education. The authors urge a fundamental change in our institutions to accommodate collaboration by radically resituating power in the classroom and by instituting rewards for collaborative work that equal rewards for single-authored work. They conclude with the injunction: "Today and in the twenty-first century, our data suggest, writers must be able to work together. They must, in short, be able to collaborate."

Society 5.0 University of Texas Press

This book constitutes the refereed proceedings of the 6th International Conference on Electronic Government held in September 2007. The 37 revised papers were selected from numerous submissions. They cover research foundations, frameworks and methods, process design and interoperability, electronic services, policies and strategies, assessment and evaluation, participation and democracy, and perspectives on e-government.

The Great Transformation SAGE

Like its previous editions, the Seventh Edition of Accounting Theory presents complex materials in a clear and understandable manner. Incorporating the latest accounting standards and presenting the most up-to-date accounting theory from the top academic journals in accounting and finance throughout the world, this book comprehensibly presents both the theoretical structure of accounting theory as well as the politics of the standard-setting process, which often opposes the theoretical structure. Key Features: - A reorganized table of contents with a thoroughly revised chapter on International Accounting (Chapter 10) - Discussion of the conceptual framework of the IASB (Chapter 7) - An emphasis on principles-based standards as opposed to rules-based standards - More theoretical issues are related to real world examples coming from the popular news media. - New questions, cases, problems, and writing assignments--many from corporate annual reports. - An Instructor's Resource CD includes answers to end-of-chapter materials, chapter summaries, test banks, and PowerPoint slides.

Wound Care Manual Elsevier Science Limited

This book contains papers presented at the 1st International Conference on Islamic Heritage Architecture and Art. The papers deal with the design of many types of buildings in Islamic countries and the influence that these structural forms have had in non-Islamic countries. Coverage will also include construction materials. There is much to learn from past experiences to arrive at solutions that are environmentally sound and sustainable in the long term. As conventional energy resources become scarce, the Islamic design heritage can offer invaluable lessons on how to deal with difficult and extreme environments in an efficient manner. Traditional architecture and urban environment in most Islamic countries is now being eroded by overemphasis on global type of architecture and city planning. As a consequence, many regions are losing their identity. The Conference will aim to review these developments in the light of what the classical Islamic urban designs and architectures have to offer modern society. There will also be coverage of conservation techniques appropriate to the materials and structural forms used. Topics covered include: Architectural heritage; Archaeological studies; Historical aspects; The Islamic urban environment; Types of buildings (e.g., Mosques and minarets; Mausolea; Citadels and fortifications, Baths and caravanserais; Bridges and dams; Cisterns and quants; Earth-sheltered architecture; Irrigation systems; Wind towers); Climate adaptability; Arches and vaults; Domes and squinches; Double shell dome; Geometry and orientation; The use of light; Design and nature; Vernacular architecture; Construction materials (e.g., Masonry and mortars; Wood, Metals; Tiles, Adobe); Structural analysis; Earthquake resistant structures; Calligraphy, painting and patterns; Architectural conservation. The contents will be of interest to all researchers, practitioners and government employees actively involved with Islamic Heritage Architecture. *Modern Derivatization Methods for Separation Science* OECD Publishing Bringing together experts in the field of manual therapy, this unique collection includes commissioned Masterclass articles on vertebral column injuries and rehab that were published in the journal Manual Therapy between the years 1995 - 2002. Ideal for study and clinical reference, this compact and portable volume groups articles into sections by anatomical area. The articles also include updated "postscripts" where the original authors summarize the developments in their related research and clinical practice that have taken place since their papers were first published. Brings together classic papers by experts in the field that--- until now--- were only available in separate issues of the journal Manual Therapy. Includes updates by the original authors. Designed for frequent use and clinical reference.
