Profit First John Wiley & Sons

Author of cult classics *The Pumpkin Plan* and *The Toilet Paper Entrepreneur* offers a simple, counterintuitive cash management solution that will help small businesses break out of the doom spiral and achieve instant profitability. Conventional accounting uses the logical (albeit, flawed) formula: Sales - Expenses = Profit. The problem is, businesses are run by humans, and humans aren't always logical. Serial entrepreneur Mike Michalowicz has developed a behavioral approach to accounting to flip the formula: Sales - Profit = Expenses. Just as the most effective weight loss strategy is to limit portions by using smaller plates, Michalowicz shows that by taking profit first and apportioning only what remains for expenses, entrepreneurs will transform their businesses from cash-eating monsters to profitable cash cows. Using Michalowicz's Profit First system, readers will learn that:

- Following 4 simple principles can simplify accounting and make it easier to manage a profitable business by looking at bank account balances.
- A small, profitable business can be worth much more than a large business surviving on its top line.
- Businesses that attain early and sustained profitability have a better shot at achieving long-term growth.

With dozens of case studies, practical, step-by-step advice, and his signature sense of humor, Michalowicz has the game-changing roadmap for any entrepreneur to make money they always dreamed of.

The term small business denotes an entity that is privately owned and managed that can only hire a minimal number of employees. These companies are also usually classified by annual revenue made, monthly sales, shipments, total business assets as well as the total annual gross revenue achieved. The Small Business Administration (SBA) is the body that holds primary responsibility for the regulation of the size standards. The size standards are generally dictated by the Industry sector as well as by State Regulators. There are now industry variations that govern size. Examples of these stipulations include a standard of between one hundred and five hundred employees for the wholesale sector while the maximum stipulated employees for a manufacturing business must fall between five hundred and a thousand employees.
