Welcome to the Unified Modeling Language™ (UML®) website. Feel free to browse news and articles on UML, success stories, available certification and training, along with the current specifications. UML is OMG's most-used specification, and the way the world models not only application structure, behavior, and architecture, but also business process and data structure. Welcome To UML Web Site! 2.2.1. The Unified Modeling Language¶ The Unified Modeling Language, or UML is an industry standard graphical notation for describing and analysing software

designs. The symbols and graphs used in the UML are an outgrowth of efforts in the 1980's and early 1990's to devise standards for Computer-Aided Software Engineering (CASE). 2.2. The Unified Modeling Language Unified Modeling Language (UML) is a general purpose modelling language. The main aim of UML is to define a standard way to visualize the way a system has been designed. It is quite similar to blueprints used in other fields of engineering. UML is not a programming language, it is rather a visual language. Unified Modeling Language (UML) | An Introduction ... The current version of the Unified Modeling Language™ is UML 2.5, released in June 2015 [UML 2.5 Specification]. UML® specification (standard) is updated and managed by the Object Management Group (OMG™) OMG UML.
