Grundfos Horizontal Split Case Pumps The Grundfos HS horizontal split case pump is a single-stage, non-self-priming, between bearing, centrifugal volute pump. The axially split design allows easy removal of the top casing and access to the pump components (bearings, wear rings, impeller, and shaft seal) without disturbing the motor or pipework. Horizontal Split Case Pumps | Cyclone Industries Suitable for electric or diesel drives, split case pump duties range from around 200 US gpm to 5,000 US gpm. SPP Pumps also boasts the largest UL Listed horizontal fire pump to date - with a capacity of 8,000 US gpm. Split Case Pumps | SPP Pumps Most split-case pumps are axially-split - meaning that the flange at which the pump casing separates is in the same plane as the pump axis. Radially-split pumps are also available, and are commonly used in very high-pressure and high-temperature industrial applications (boiler-feed pumps are one common application for radially-split pumps). Split-Case Pumps | Intro to Pumps This manual covers the installation, operation and maintenance of Patterson Pump horizontal split case

pumps. The pump is a centrifugal, single stage, double suction type. When properly installed and when given reasonable care and maintenance, centrifugal pumps should operate satisfactorily for a long period of time.
