[Being the Aphorisms of Sanctorius, Translated Into English with Large Explanations..](#) Penguin

Cyberpunk and Cyberculture explores the work of a wide range of writers- Acker, Cadigan, Rucker, Shierley, Sterling, Williams and, of course, Gibson - setting their work in the context of science fiction, other literary genres, genre cinema - from Metropolis to Terminator to The Matrix - and contemporary work on the culture of technology.

Human, All Too Human Sagwan Press

In this book, after discussing the fundamental problems of current science and other philosophic concepts, beginning with controversies between Heraclitus and Parmenides, Ilya Prigogine launches into a message of great hope: the future has not been determined. Contrary to globalisation and the apparent contemporary mass culture society, individual behaviour is beginning to increasingly become the key factor which governs the evolution of both the world and society as a whole. It is a message that challenges existing widespread views, implicitly or explicitly, through mass communication; moreover the importance of the individual's actions implies a reflection of each person on the responsibilities that each one assumes when taking or acting upon a decision. This responsibility is associated with the freedom of thought as well as a critical analysis of fashions, customs, preconceived ideas, and ideologies, externally imposed: exactly contrary to the ideas of those who wish us to be ?perfect consumers? in a world

dominated only by monetary wealth.Challenging this drive towards the elimination of freedom of thought in the individual is now imperative if we are to save man and his planet from catastrophe, which seems to be ever imminent and (unfortunately) irreversible.This last book of Ilya Prigogine provides a small, disputable, but nonetheless valuable contribution towards that end.

Short Philosophical Essays Routledge

These essays by eleven internationally renowned historians present nuanced profiles of the major social and professional groups—the callings-of the Middle Ages. The contributors focus on attitudes of medieval men and women toward their own society. Through a variety of techniques, from a reading of the Song of Roland to a reading of administrative records, they identify characteristic viewpoints of members of the fighting class, the clergy, and the peasantry. Along with vivid descriptions of what life was like for warrior knights, monks, high churchmen, criminals, lepers, shepherds, and prostitutes, this innovative approach offers a valuable new perspective on the complex social dynamics of feudal Europe. "Very useful discussions of texts, both learned and literary."—Christopher Dyer, *Times Literary Supplement* Contributors: Mariateresa Fumagalli Beonio Brocchieri, Franco Cardini, Enrico Castelnuovo, Giovanni Cherubini, Bronislaw Geremek, Aron Ja. Gurevich, Christiane Klapisch-Zuber, Jacques Le Goff, Giovanni Miccoli, Jacques Rossiaud, and André Vauchez.

Medieval Callings Springer

Disclosing Childhoods offers a critical account of knowledge production in childhood studies. The book argues for the need to be reflexive about the knowledge practices of the field and to scrutinize the role of researchers in disclosing certain childhoods rather than others. A relational lens is used to critique the ongoing fixation of childhood studies with the unitary child-agent and to re-introduce the question of ontology in knowledge production. The author provides a critical account of childhood studies' trajectory, as well as exploring the key concepts of voice, agency and participation, illustrating the potential of a reflexive stance towards knowledge production. Drawing on poststructuralist and posthumanist thinking, each of these concepts is critiqued for its conceptual limits while productive avenues are offered to reconfigure their utility. Spyrou also addresses the ethics and politics of knowledge production and considers key emerging insights which can contribute towards the development of a more reflexive and critical childhood studies. Students and scholars across a range of disciplines, including childhood studies, anthropology, sociology and geography, will find this book of interest, as well as those interested in qualitative research methodology and social theory.

Bangalee lives in Ritter Castle where few things, if any, are ever put away. A bit of clothing here, a few toys there, everywhere there is clutter and junk. All would have stayed the same had it not been for the appearance of the mysterious and very hungry Grunk, who loves to eat clutter and junk. Children of all ages and some adults, too, learn to tidy up with this engaging story.

Deliberation and Signs in Homer's Odyssey John Wiley & Sons

In dramatic representations and narrative reports of inner deliberation the *Odyssey* displays the workings of the human mind and its hero's practical intelligence, epitomized by anticipating consequences and controlling his actions accordingly. Once his hope of returning home as husband, father and king is renewed on Calypso's isle, Odysseus shows a consistent will to focus on this purpose and subordinate other impulses to it. His fabled cleverness is now fully engaged in a gradually emerging plan, as he thinks back from that final goal through a network of means to achieve it. He relies on "signs"-inferences in the form "if this, then that" as defined by the Stoic Chrysippus-and the nature of his intelligence is thematically underscored through contrast with others' recklessness, that is, failure to heed signs or reckon consequences. In Homeric deliberation, the mind is torn between competing options or intentions, not between "reason" and "desire." The lack of distinct opposing faculties and hierarchical organization in the Homeric mind, far from archaic simplicity, prefigures the psychology of Chrysippus, who cites deliberation scenes from the *Odyssey* against Plato's hierarchical tri-partite model. From the Stoics, there follows a psychological tradition leading through Hobbes and Leibniz, to Peirce and Dewey. These thinkers are drawn upon to show the significance of the conception of "thinking" first articulated in the *Odyssey*. Homer's work inaugurates an approach that has provoked philosophical conflict persisting into the present, and opposition to pragmatism and Pragmatism can be discerned in prominent critiques of Homer and his hero which are analyzed and countered in this study.

Astronauts explore an alien spacecraft hurtling toward the sun in this Hugo and Nebula Award-winning novel—"a stone-cold classic" of hard sci-fi (*The Guardian*). An enormous cylindrical object has entered Earth's solar system on a collision course with the sun. A team of astronauts are sent to explore the mysterious craft, which the denizens of the solar system name Rama. What they find is astonishing evidence of a civilization far more advanced than ours. They find an interior stretching over fifty kilometers; a forbidding cylindrical sea; mysterious and inaccessible buildings; and strange machine-animal hybrids, or "biots," that inhabit the ship. But what they don't find is an alien presence. So who—and where—are the Ramans? Often listed as one of Clarke's finest novels, *Rendezvous with Rama* won numerous awards, including the Hugo, the Nebula, the Jupiter, and the British Science Fiction Awards. A fast-paced and compelling story of an enigmatic encounter with alien technology, *Rendezvous with Rama* offers both answers and unsolved mysteries that will continue to fascinate readers for generations. "Mr. Clarke is splendid . . . We experience that chilling touch of the alien, the not-quite-knowable, that distinguishes SF at its most technically imaginative." —*The New York Times*

Semantic Studies in English Proverbs Creo en el amor

This book explores the nature of Britain-based artists' engagement with the transformations of their environment since the early days of the Industrial Revolution. At a time of pressing ecological concerns, the international group of contributors provide a series of case studies that reconsider the nature-culture divide and aim at identifying the contours of a national narrative that stretches from enclosed lands to rising seas. By adopting a longer historical view, this book hopes to enrich current debates concerning art's engagement with recording and questioning the impact of human activity on the environment. The book will be of interest to scholars working in art history, contemporary art, environmental humanities, and British studies.
