In Princes, Brokers, and Bureaucrats, the most thorough treatment of the political economy of Saudi Arabia to date, Steffen Hertog uncovers an untold history of how the elite rivalries and whims of half a century ago have shaped today's Saudi state and are reflected in its policies. Starting in the late 1990s, Saudi Arabia embarked on an ambitious reform campaign to remedy its long-term economic stagnation. The results have been puzzling for both area specialists and political economists: Saudi institutions have not failed across the board, as theorists of the "rentier state" would predict, nor have they achieved the all-encompassing modernization the regime has touted. Instead, the kingdom has witnessed a bewildering mélange of thorough failures and surprising successes. Hertog argues that it is traits peculiar to the Saudi state that make sense of its uneven capacities. Oil rents since World War II have shaped Saudi state institutions in ways that are far from uniform. Oil money has given regime elites unusual leeway for various institutional experiments in different parts of the state: in some cases creating massive rent-seeking networks deeply interwoven with local society; in others large but passive bureaucracies; in yet others insulated islands of remarkable efficiency. This process has fragmented the Saudi state into an uncoordinated set of vertically divided fiefdoms. Case studies of foreign investment reform, labor market nationalization and WTO accession reveal how this oil-funded apparatus enables swift and successful policy-making in some policy areas, but produces coordination and regulation failures in others.

An investor's crucial guide to the changing face of Saudi Arabian business Business and Entrepreneurship in Saudi Arabia is an essential reference guide, informing investors on the key issues that define how business will be done as the nation's family-owned businesses change hands. Supported by the U.S.-Saudi Arabian Business Council, this book introduces the reader to the new Saudi entrepreneur and explains why Saudi Arabia's boom deserves more of the world's attention. As the heads of family-owned businesses age and corporate boards are reshaped, business practices will be influenced by the ascension of the country's young leaders. Interviews with young Saudi entrepreneurs describe the challenges, triumphs, failed attempts, and successful endeavors they experience every day as time-tested traditional models bump up against more modern, innovative ideas and methods. The book's companion website features a variety of useful tools and documents that help readers implement the concepts presented, and the firsthand information provides deep insight into the future of these companies. Saudi Arabia is profoundly influencing the technological advances of multiple industries through increasing collaboration and in-country partnerships with communities around the world. The evolution of the Kingdom's family-owned businesses is becoming more important to investors as young Saudis claim their legacies, and this book provides an insightful understanding of the changing nature of Saudi business. Meet the emerging entrepreneur class of Saudi Arabia Learn how the Saudi boom affects global business Discover what investors need to know about the Saudi economy Examine how time and technology is reshaping the way business is done Gain useful insight into the direction management of the Kingdom's growth will take over the next five years The Saudi economy constitutes thirty percent of the Arab world's GDP, and sixty percent of the population is under the age of thirty. Business and Entrepreneurship in Saudi Arabia provides essential information investors need to navigate the changing tide of doing business in Saudi Arabia.

The Economics of Renewable Energy in the Gulf Springer

Since the outbreak of the Arab Spring the Middle East is going through a turbulent phase as violence, internal conflicts and civil wars are ravaging a number of countries. Even relatively stable Gulf monarchies are not untouched by the impact of popular demand for change. For India, the Persian Gulf is an extended neighbourhood and the region of vital importance receives scant attention. In the light of the Arab Spring, Iranian nuclear deal and the rise of ISIS, it has become impossible for India to be indifferent to the changing internal dynamics. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Concepts, Regulation and Changing Markets Routledge

This report explores the prospects for renewables to diversify national economies and the combined GCC energy mix, while helping the region meet climate goals and contribute to the 2030 Agenda for Sustainable Development.

This book uses electricity-sector reforms to question some of the preconceived ideas concerning the MENA region and to provide a broader analysis of related political economy issues. It presents potential further developments of MENA's electricity-sector reforms, taking into consideration the region's unique constraints and opportunities, and discusses the practical limits of reform and deregulation. Specifically, it examines the relationship between reforms and oil prices from a new perspective and presents alternatives to the Single Buyer Model. Complementing existing research on electricity-sector reforms in other emerging markets, the book provides a new analytical framework for assessing reforms that can be easily applied to other markets and sectors.

This third edition of Doing Business with Saudi Arabia is the definitive English language guide to business practice and commercial opportunity in the Kingdom, the largest economy in the Middle East. This authoritative guide provides an up-to-date appraisal of the current economic and investment climate, a review of market potential in the key sectors, and unique best practice advice on all aspects of commercial engagement with Saudi Arabia. Also included are detailed regional and sectoral profiles.

Saudi Arabia Investment and Business Guide Volume 1 Strategic and Practical Information John Wiley & Sons

Key initiatives include a privatisation programme which would see the divestment of a number of state-owned giants, such as the partial listing of Aramco, the creation of the world's largest sovereign wealth fund and the increased participation of women in the job market. The Kingdom has played a key role too on the international stage in 2017, becoming the first country to host President Trump, a visit which resulted in renewed trade and investment commitments on both sides. Meanwhile the country's importance as a trading hub continues to grow thanks to both the various infrastructural upgrades that are taking place to its ports and airports, as well as its geographical advantage as a connector of three continents and its proximity to the Red Sea - through which 10% of world trade travels.

The Monthly Newsletter of the Royal Embassy of Saudi Arabia Oxford Business Group

The Cooperation Council for the Arab States of the Gulf (GCC) has been at the epicenter of global

energy markets because of its substantial endowment of hydrocarbons. Yet countries in the region have also stated their intent to be global leaders in renewable energy. This collection explores the drivers for the widespread adoption of renewable energy around the GCC, the need for renewable energy and the policy-economic factors that can create success. All six countries within the GCC have plans to include renewable energy power generation in their energy mix for various reasons including: a growing demand for electricity because of increasing populations, an increasing government fiscal deficit due to inefficient subsidies, the need to diversify the economy and global pressure to meet climate change requirements. However, the decision of when and by how much to introduce renewable energy is fraught with complications. In this book, a stellar cast of regional policy and academic experts explore the reasons behind these renewable energy plans and the potential impediments to success, whether it be the declining cost of producing energy from hydrocarbons, an infrastructure which needs to be updated, social acceptance, lack of financing and even harsh weather. Weighing up all these factors, the book considers the route forward for renewable energy in the Gulf region. The Economics of Renewable Energy in the Gulf offers an excellent examination of the adoption of renewable energy in the area. It will be of great interest to academic researchers and policy makers alike, particularly those working in the areas of energy economics, public policy and international relations.

WTO, NAFTA, and Energy Charter Walter de Gruyter GmbH & Co KG

Since 2008, energy and food markets—those most fundamental to human existence—have remained in turmoil. Resource scarcity has had a much bigger global impact in recent years than has been predicted, with ongoing volatility a sign that the world is only part-way through navigating a treacherous transition in the way it uses resources. Scarcity, and perceptions of scarcity, increase political risks, while geopolitical turmoil exacerbates shortages and complicates the search for solutions. The New Politics of Strategic Resources examines the political dimensions of strategic resource challenges at the domestic and international levels. For better or worse, energy and food markets are shaped by perceptions of national interest and do not behave as traditional market goods. So while markets are an essential part of any response to tighter resource supplies, governments also will play a key role. David Steven, Emily O'Brien, Bruce Jones, and their colleagues discuss what those roles are and what they should be. The architecture for coordinating multilateral responses to these dynamics has fallen short, raising questions about the effective international management of these issues. Politics impede here too, as the major powers must negotiate political and security trade-offs to cooperate on the design of more robust international regimes and mechanisms for resource security and the provision of global public goods. This timely volume includes chapters on major powers (United States, India, China) and key suppliers (Russia, Saudi Arabia). The contributors also address thematic topics, such as the interaction between oil and state fragility; the changing political dynamics of climate change; and the politics of resource subsidies. The book provides comprehensive compilation on Islamic legal documents related to Islamic financial system consists of legal statutes, frameworks, guidelines, circulars and internal compliant manual covering Islamic banking, takaful and Islamic capital markets. Brief description of those documents are laid down to assist non-legal background readers in having comprehensive view of Islamic finance legal system. Few special focuses are done to Shariah screening methodologies for stocks, Islamic fund and real estate with special review on few sukuk issuances as to familiarize reader with the principle terms and conditions (PTC) of the sukuk. Islamic finance is not just a system but it is a way to achieve the spirit of Shariah i.e. maqasid Shariah in providing prosperity to the society in blessing ways avoiding all prohibited elements as stated in Islamic law.

Cambridge University Press

This book examines China's bilateral relations with its established suppliers of crude petroleum and on occasion, petroleum gas products including liquefied natural gas (LNG) based on a five-dimensional framework: political-diplomatic relations, economic-trade relations, military- security relations, cultural relations, and petroleum-energy relations. A five-dimensional approach is comprehensive in nature and offers a complete understanding of China's complex relationships rather than looking solely on more typical perspectives like bilateral trade, security relationships, or energy ties. More often than not, social science literature focuses on one or more aspects of China's bilateral relations, which does not provide a complete picture of the complex nature of its interstate ties. This book endeavors to bridge this gap and look more substantially at China's bilateral relationships with energy-petroleum relations being the key aspect linking each one of them. The specific bilateral relationships examined are China's relations with Angola, Brazil, Republic of the

Congo, Iran, Iraq, Kazakhstan, Kuwait, Oman, Russia, Saudi Arabia, South Sudan, Sudan, United Arab Emirates, and Venezuela. These countries matter because their crude petroleum and petroleum gas product exports account for over 50 percent of China's annual oil consumption.

Evaluation and Prospects Routledge

This book examines how the most commonly used construction project contracts are applied in a range of countries around the world. The specific situation of each of the almost 40 countries studies is dealt with in a dedicated chapter, allowing for easy comparison between differing legal and commercial environments. Each chapter contextualizes the relevant contracts within the legal and commercial systems prevalent in a particular country and examines a number of common issues impacting construction projects around the world. This unique book will be an essential resource for construction law specialists around the world because of its focus on commonly used contracts and the contextualizing of these contracts into the legal and commercial environment of each studied country. All contributions are from practicing construction project lawyers ensuring that the quality of the information and analysis is of the highest standard.

Energy and Food Security Challenges in the 21st Century Oxford Business Group

Starting from the premise that a multilateral legal framework is the surest way to achieve predictability and transparency under conditions of increasing reliance on internationally traded energy, the essays gathered in this book treat the many complex interlocking issues raised by examining that desideratum in the light of current reality. Concentrating on the application of WTO agreements to energy trade - as well as energy-related issues addressed in the current WTO negotiations - the authors offer in-depth discussion and analysis of such issues as the following: the effectiveness of existing WTO agreements in addressing issues pertinent to energy trade how restrictive practices of energy endowed countries can be tackled under existing international trade rules; existing frameworks for investment in highly capital-intensive energy infrastructure projects; and conditions for access to pipelines and transmission grids; regulation of energy services; bioenergy development and trade; energy issues addressed in the WTO accession negotiations of energy endowed countries; international instruments of resolution of energy-related disputes.

This timely and relevant case study presents an unparalleled anthropological overview of Saudi Arabia, a nation-state of prime importance, while it builds a vital understanding of globalization the connectedness of the world. In its beautifully written pages, Jordan describes how a country with no modern education system and no modern technology or infrastructure developed all of these and became a first-rate world player in economics, education, and medicine in just a few short decades. After situating the work in current anthropological theory, Jordan presents a summary of the unique geography, history, and traditional cultures of the Arabian Peninsula. From there readers land in a world of traffic jams, skyscrapers, and marble shopping malls. They learn the steps of the modernization process, its effects on peoples lives, and the reasons for its success through examples from education, the oil industry, and a mini case study of a hospital. This fast-moving, eye-opening account casts a wide net. It includes multifaceted discussions of international politics and political organization, the position of women and the role of religion, the global importance of the oil industry, and the impact of the 9/11 tragedy on the Kingdom of Saudi Arabia. In addition to introductory cultural anthropology and Middle East survey courses, The Making of a Modern Kingdom serves as an ideal casebook with modern applicability in political and economic anthropology courses.
