In the second part of the book, you will find answer keys and detailed explanations to questions, except those that are self explanatory. These explanations discuss

why the answer is correct and - more importantly - why another answer that may have seemed correct is the wrong choice. The explanations include the foundations and details of important science topics needed to answer related questions on the MCAT. By reading these explanations carefully and understanding how they apply to solving the question, you will learn important biology and biochemistry concepts and the relationships between them. To achieve a high MCAT score, you need to develop skills to properly apply the knowledge you have and quickly choose the correct answer.
