 What 4 atoms make up 96% of living organisms?
 ANSWER . Organic Chemistry : 10 - Answer
 Carbon Hydrogen ...O-Chem, Lipids, Cell Membrane & Transport Test Review
 d. passive transport
 h. equilibrium
 ____ The diffusion of water through a cell membrane ____
 The movement of substances through the cell membrane without the use of cellular energy
 ____ Used to help substances enter or exit

the cell membrane ____
 When energy is required
 to move materials
 through a cell
 membrane Cell Transport
 Review Sheet 13) How
 does particle size affect a
 molecule's transport
 across a cell membrane?
 a) Particle size is less
 important than particle
 shape for calculating
 transport speed. b) It is
 easier for small molecules
 to diffuse across the cell
 membrane. Cell Transport
 Test Review Questions
 (ID: 18229) A selectively
 permeable cell membrane
 is one that allows certain

molecules or ions to pass
 through it by means of
 active or passive
 transport. Explain two
 functions of the cell
 membrane. The cell
 membrane is a very
 important structure which
 functions to allow certain
 substances to enter or
 leave the cell. Biology 1:
 Test Review - The Cell
 Membrane and
 Homeostasis ... F The
 cell membrane forms
 around another
 substance, for example,
 how the amoeba gets its
 food D When
 molecules move from

areas of high
 concentration to areas of
 low concentration Label
 the diagrams of cells
 using the following terms:
 diffusion, active transport,
 osmosis, facilitated
 diffusion, or
 equilibrium. Cell Transport

passive transport e. osmosis f. endocytosis
 The diffusion of water through a cell membrane
 D The movement of substances through the cell membrane without the use of cellular energy
 A Used to help substances enter or exit the cell membrane
 Denton Independent School District / Overview
 In addition to allowing transport of specific material across the membrane, protein in the membrane also function as an anchor for the cytoskeleton, a scaffold

made of microfilaments, intermediate filaments, and microtubules. It provides stability to the cell and allows for intracellular transport, or movement of objects inside the cell, such as organelles.
 ...Function of the Plasma Membrane | Biology Review [Video]
 In the study of biology, a cell organelle is an internal organ of the cell which is responsible for performing certain tasks which ultimately keep the cell alive. In this quiz, we put you to the test by asking you to name and define

the jobs of specific cell organelles. Good luck!
