*15th International Conference, MODELS 2012, Innsbruck, Austria, September 30 -- October 5, 2012, Proceedings* Springer Science & Business Media

This book constitutes the refereed proceedings of the 15th International Conference on Model Driven Engineering Languages and Systems, MODELS 2012, held in Innsbruck, Austria, in September/October 2012. The 50 papers presented in this volume were carefully reviewed and selected from a total of 181 submissions. They are organized in topical sections named: metamodels and domain specific modeling; models at runtime; model management; modeling methods and tools, consistency analysis, software product lines; foundations of modeling; static analysis techniques; model testing and simulation; model transformation; model matching, tracing and synchronization; modeling practices and experience; and model analysis.

*Apache OFBiz* Springer

This volume presents the revised and peer reviewed contributions of the 'EPR Future 2014' conference held in Dornbirn/Austria on November 17-18th, 2014. The book assembles latest research and recent practice on enterprise information systems in general and specifically on core topics like business process management (BPM), business intelligence (BI) and enterprise resource planning (ERP) systems. To master the challenges of enterprise information systems comprehensively, this book contains chapters with a business as well as an IT focus to consider enterprise information systems from various viewpoints.

*Modelling -- Foundation and Applications* Springer Science & Business Media

This book includes a number of selected papers from the PRO-VE '07 Conference, providing a comprehensive overview of recent advances in various Collaborative Networks domains. It covers trust aspects, performance and value systems, VO breeding environments, VO creation, e-contracting, collaborative architectures and frameworks, professional virtual communities, interoperability issues, business benefits, and case studies and applications in industry and services.

*ECOOP 2008 - Object-Oriented Programming* Springer

Max Hoffmann describes the realization of a framework that enables autonomous decision-making in industrial manufacturing processes by means of multi-agent systems and the OPC UA meta-modeling standard. The integration of communication patterns and SOA with grown manufacturing systems enables an upgrade of legacy environments in terms of Industry 4.0 related technologies. The added value of the derived solutions are validated through an industrial use case and verified by the

development of a demonstrator that includes elements of self-optimization through Machine Learning and communication with high-level planning systems such as ERP. About the Author: Dr.-Ing. Max Hoffmann is a scientific researcher at the Institute of Information Management in Mechanical Engineering, RWTH Aachen University, Germany, and leads the group "Industrial Big Data". His research emphasizes on production optimization by means of data integration through interoperability and communication standards for industrial manufacturing and integrated analysis by using Machine Learning and stream-based information processing.

**Small and Medium Enterprises** IGI Global

Mit diesem Buch werden Sie angeleitet, Schritt für Schritt Apache OFBiz zu konfigurieren.

*Apache OFBiz Development* Springer

Local functional systems that create inefficient islands of information are being replaced by expensive enterprise-wide applications that unify the functional areas; however, while we have not yet been able to completely and seamlessly integrate across functions, we find that the new islands of information are no longer functional but political, cultural, linguistic, and geographical. The global village is a reality and enterprise resource planning (ERP) implementations face new issues and challenges. Enterprise Resource Planning for Global Economies: Managerial Issues and Challenges provides authoritative research on the theoretical frameworks and pragmatic discussions on global implementations of information systems, particularly ERP systems. This book offers professionals, managers, and researchers, who want to improve their understanding of the issues and challenges that arise when information systems cross national boundaries, with an authoritative, essential research resource.

**Concepts, Methodologies, Tools, and Applications** Springer

The design, development, and use of suitable enterprise resource planning systems continue play a significant role in ever-evolving business needs and environments. Enterprise Resource Planning: Concepts, Methodologies, Tools, and Applications presents research on the progress of ERP systems and their impact on changing business needs and evolving technology. This collection of research highlights a simple framework for identifying the critical factors of ERP implementation and statistical analysis to adopt its various concepts. Useful for industry leaders, practitioners, and researchers in the field.

*ERP-Systeme* Lulu.com

This book constitutes the refereed proceedings of the 10th International Conference on Model Driven Engineering Languages and Systems (formerly the UML series of conferences), MODELS 2007, held in Nashville, USA, September 30 - October 5, 2007. The 45 revised full papers were carefully reviewed and selected

from 158 initial submissions. The papers are organized in topical sections.

**The Business Guide to Free Information Technology Including Free/Libre Open Source Software** Springer

"This book provides a comprehensive collection of research on current technological developments and organizational perspectives on the scale of small and medium enterprises"-- Provided by publisher.

*IFIP TC 5 Working Group 5.5 Eighth IFIP Working Conference on Virtual Enterprises September 10-12, 2007, Guimarães, Portugal* IGI Global

This book constitutes the refereed proceedings of the 5th International Symposium on Engineering Secure Software and Systems, ESSoS 2013, held in Paris, France, in February/March 2013. The 13 revised full papers presented together with two idea papers were carefully reviewed and selected from 62 submissions. The papers are organized in topical sections on secure programming, policies, proving, formal methods, and analyzing.

*The Making of Information Systems* disserta Verlag

This book contains a selection of refereed papers presented at the "International Conference on Operations Research (OR 2011)" which took place at the University of Zurich from August 30 to September 2, 2011. The conference was jointly organized by the German speaking OR societies from Austria (ÖGOR), Germany (GOR) and Switzerland (SVOR) under the patronage of SVOR. More than 840 scientists and students from over 50 countries attended OR 2011 and presented 620 papers in 16 parallel topical streams, as well as special award sessions. The conference was designed according to the understanding of Operations Research as an interdisciplinary science focusing on modeling complex socio-technical systems to gain insight into behavior under interventions by decision makers. Dealing with "organized complexity" lies in the core of OR and designing useful support systems to master the challenge of system management in complex environment is the ultimate goal of our professional societies. To this end, algorithmic techniques and system modeling are two fundamental competences which are also well-balanced in these proceedings.

**Holistic Enterprise Applications Made Easy** Springer Science & Business Media

In Unternehmen aller Art und Größe spielen betriebswirtschaftliche Anwendungssysteme oder Warenwirtschaftssysteme für die Bewältigung der aufkommenden Arbeiten eine zentrale Rolle. Für solche sogenannten ERP-Systeme (Enterprise Resource Planning Systeme) gibt es national und international eine Vielzahl an Anbietern. Eine ganz besondere Gruppe stellen die Open Source Systeme, also Systeme bei denen der Quelltext offen lesbar ist, dar. Diese besonderen

Anwendungssysteme tauchen immer wieder aufgrund fehlender Lizenzkosten und absoluter Herstellerunabhängigkeit im zentralen Bewusstsein der IT-Entscheider auf. Um diesen Bereich objektiv zu durchleuchten wird in dieser Arbeit ein wissenschaftliches Konzept vorgestellt, das als Evaluationschema die Anzahl der Systeme reduziert. Hierzu wird eine Methodik verwendet, die die Auswahl methodisch auf einige wenige Anbieter beschränkt. Insgesamt werden 85 Open Source ERP-Anbieter untersucht. Als Grundlage für die Evaluationen dienen dabei funktionale-technische und nichtfunktionale Anforderungen. Die funktional-technischen Anforderungen orientieren sich dabei an aktuellen Trends und Tendenzen moderner ERP-Systemanbieter auf Basis anderer wissenschaftlicher Ausarbeitungen und Studien. Nichtfunktionale Anforderungen dagegen werden in dieser Studie nach der gängigen ISO Norm zur Softwarequalität bestimmt. Zentraler Bestandteil der durchgeführten Evaluation ist dabei ein Anbieterverzeichnis, das im Laufe der Studie erstellt wurde. Dieses Verzeichnis enthält zusammenfassende lösungsneutrale Darstellungen und Informationen zu 38 aktuell relevanten Systemanbietern aus dem Bereich der Open Source ERP-Systeme. Demnach enthält es auch allgemeine, technische und funktionale Anforderungen und Trends. Die gewonnenen Informationen werden unter dem Aspekt der Leistungsfähigkeit und des Einsatzgebietes mit anderen wissenschaftlichen Arbeiten gegenübergestellt und verglichen. Auf diese Weise konnte ein praktischer Nutzen dieser Systeme nachgewiesen und eine Empfehlung auf Basis entscheidender Gewichtungsfaktoren ermittelt werden.

*Modelling Foundations and Applications* IGI Global  
Enterprise resource planning (ERP) integrates internal and external management information across an entire organization, embracing finance/accounting, manufacturing, sales and service, customer relationship management, etc. ERP systems automate this activity with an integrated software application. Its purpose is to facilitate the flow of information between all business functions inside the boundaries of the organization and manage the connections to outside stakeholders. ERP systems can run on a variety of hardware and network configurations, typically employing a database as a repository for information. This book is your ultimate resource for ERP - Enterprise Resource Planning. Here you will find the most up-to-date information, analysis, background and everything you need to know. In easy to read chapters, with extensive references and links to get you to know all there is to know about ERP - Enterprise Resource Planning right away, covering: Enterprise resource planning, List of ERP software packages, 24SevenOffice, A1 ERP, Aiva 9001, Baan ERP, BOMtracker, Business Planning and Control System, Cambashi, Clear Enterprise, Compass ERP, Configurable Network Computing, ERP modeling, HeliumV, JustFoodERP, MAPICS, MAS 500, MECOMS, Microsoft Dynamics AX, Microsoft Dynamics C5, Microsoft Dynamics ERP, Microsoft Dynamics NAV, Microsoft Dynamics SL, MySAP All-in-One, NolaPro, Opti-Time Company, Oracle E-Business Suite, Oracle General Ledger, Profitability Analysis (SAP), Project-Open, SAP Business ByDesign, SAP Business One, SAP ERP, SAP IS-U, SAP R/2, SAP R/3, Secure Network Communications, ERP system selection methodology, Systems Applications Products audit, T-code, TaskHub, Transport (SAP), WorkPLAN, Adempiere, Apache OFBiz, BlueErp, Bots (edi), Comparison of Tryton and Open ERP, Compiere, Dolibarr, ERP5, FrontAccounting, GNU Enterprise, IntarS, JFire, MSupply, OpenAccounting, Openbravo, OpenERP, OpenMFG, Openpro, Opentaps, PhreeBooks, Postbooks, Tryton, WebERP, 1C Company, ABAS Software, Acsis, Acumatica, Advanced Business Solutions,

Apriso, Baan, BatchMaster Software, CDC Software, Ceridian, CGram Software, Clear Objective, CMiC, CODA (company), Comarch, Consona Corporation, Deltek, Eastern Software Systems, Epicor, Exel Computer Systems, Ferranti Computer Systems, FinancialForce.com, FlexSystem, Geac Computer Corporation, Glovia Services Inc, IFS AB, Infor Global Solutions, Intacct, Intentia, IRIS Software, JD Edwards, Jeeves (ERP system), Krawler, Lawson Software, Maconomy, Mincom (company), NetSuite, Openda, Oracle Corporation, PeopleSoft, Plex Systems, ProfitKey International, Publishing Technology plc, QAD Inc, Ramco Systems, Sage Group, SAP AG, SESCOI, SIV.AG, Softline, Nsite Software (Platform as a Service), Solarsoft Business Systems, SSA Global Technologies, STN Ltd, Syspro, Transtek, UFIDA, Unit4, Visibility (corporation), Visma, WorkBook Software A/S, XTuple This book explains in-depth the real drivers and workings of ERP - Enterprise Resource Planning. It reduces the risk of your technology, time and resources investment decisions by enabling you to compare your understanding of ERP - Enterprise Resource Planning with the objectivity of experienced professionals.

**Model Driven Engineering Languages and Systems** Tebbo  
This book constitutes the refereed proceedings of the 11th International Conference on Model Driven Engineering Languages and Systems, MoDELS 2008, held in Toulouse, France, during September 28-October 3, 2008. The 58 revised full papers presented were carefully reviewed and selected from 271 submissions. The book also contains three keynote speeches and contributions to workshops, symposia, tutorials and panels at the conference. The papers are organized in topical sections on Model Transformation: Foundations; Requirements Modeling; Domain-Specific Modeling; Model Transformation: Techniques, Composition and Analysis of Behavioral Models; Model Comprehension; Model Management; Behavioral Conformance and Refinement; Metamodeling and Modularity; Constraints; Model Analysis; Service-Oriented Architectures; Adaptive and Autonomic Systems; Empirical Studies; Evolution and Reverse Engineering; Modeling Language Semantics; Dependability Analysis and Testing; Aspect-Oriented Modeling; Structural Modeling; and Embedded Systems.

IGI Global  
The Guide summarizes computer software for over 30 business areas. The best software packages for each area are presented in plain English. This book answers the question of What is available. Anyone starting a business will quickly see how to capitalize on these in business. Anyone already in business learns what packages can be added to improve an existing business. Choose and area of interest such as accounting, time tracking, shared calendars, payroll, HR, POS, cash registers, online storefront, ERP, project management, messaging, groupware, email servers, document management, workflow, remote desktops, remote file access, VPN, customer management, sales, CRM, audio-visual, attorneys, physicians, spreadsheets, word processors, computer telephones, contact managers, presentations, spam control, web servers, database systems, web sites, blogs, forums, and others. The reader gains immediate knowledge of what software can be used in business.

*5th International Symposium, ESSoS 2013, Paris, France, February 27 - March 1, 2013. Proceedings* Springer

The instability of today's economic climate calls for non-profit organizations to approach social problems in new and interesting ways, and Information and Communication Technologies may serve as an answer to this call. ICT Management in Non-Profit Organizations aims to explore the effective and comprehensive deployment of appropriate ICT strategies within the nonprofit

sector. This innovative reference work will discuss how ICT enables the non-profit sector to achieve organizational efficiency, effectiveness, and, ultimately, self sufficiency, and will provide elected and appointed policymakers, managers, and planners in governments, public agencies, and nonprofit organizations with a comprehensive strategy for creating an ICT management agenda in the non-profit sector.

*Handbuch der ERP-Auswahl* Packt Publishing Ltd

This is an accessible step-by-step tutorial that introduces readers to the world of OFBiz through practical examples and clear explanations. It will guide you through the framework, teach you to tweak OFBiz and master widgets, entities, and permissions, and give you the knowledge to customize your own bespoke applications. This book is for developers who want to build easily deployed and supported OFBiz applications. No previous knowledge of OFBiz is assumed, but readers should be comfortable in a Java development environment.

*Concepts, Methodologies, Tools and Applications* Springer

It is a pleasure to present the proceedings of the 22nd European Conference on Object-Oriented Programming (ECOOP 2008) held in Paphos, Cyprus. The conference continues to serve a broad object-oriented community with a technical program spanning theory and practice and a healthy mix of industrial and academic participants. This year a strong workshop and tutorial program complemented the main technical track. We had 13 workshops and 8 tutorials, as well as the co-located Dynamic Language Symposium (DLS). Finally, the program was rounded out with a keynote by Rachid Guerraoui and a banquet speech by James Noble. As in previous years, two Dahl-Nygaard awards were selected by AITO, and for the first time, the ECOOP Program Committee gave a best paper award.

The proceedings include 27 papers selected from 138 submissions. The papers were reviewed in a single-blind process with three to five reviews per paper. Preliminary versions of the reviews were made available to the authors a week before the PC meeting to allow for short (500 words or less) author responses. The responses were discussed at the PC meeting and were instrumental in reaching decisions. The PC discussions followed Oscar Nierstrasz' Champion pattern. PC papers had five reviews and were held at a higher standard.

**Enterprise Resource Planning and Supply Chain**

**Management** Packt Publishing Ltd

HEMP is an agile approach to business analysis and system design for end users, project managers, business analysts, application designers, software architects, application developers, and quality assurance professionals. HEMP complements agile software development methodologies with an equally agile approach for gathering and documenting business requirements and producing system designs to drive application development that will meet the needs of end-user organizations. The practices and artifacts in HEMP are applicable for building new systems as well as customizing existing ones. HEMP is agnostic to programming languages and application frameworks so can be applied regardless of technology preference. This book includes case studies and numerous examples to help you understand the context of recommendations and how to apply them.
