The next 60 seconds can change your life, for good or bad, and it's all about how you live them. This ground-breaking book shows how mindfulness, being present in each moment, will transform your life for the better.

One-minute Mindfulness Mountaineers Books

The year 1973 marks one of the most important turning points in the history of the twentieth century. Prior to that year, the world had become accustomed to a plentiful supply of inexpensive fossil fuels--especially oil.

During this first major international oil crisis, however, the western world's dependency on unstable eastern energy resources became dramatically clear. Published to accompany the comprehensive and enlightening 2008 exhibition, "1973: Sorry, Out of Gas," hosted by the Canadian Centre for Architecture in Montreal, this beautifully designed, frightening and strangely inspiring volume examines the oil crisis of 1973 as the major precedent of contemporary concerns about energy resources and fossil fuel dependency. The 1973 shortage triggered research and development of renewable energy sources, improved technologies and sparked social experiments that were to have an enduring impact on the fields of architecture and policy in both America and Europe. Put together by the acclaimed Italian book designer Massimo Pitis, this volume includes a monumental stash of documentary photographs, ephemera, documents, transcripts and original writings on all things related to the oil crisis--from Jimmy Carter

to underground utopias. Reproductions cover everything from impossible traffic jams leading up to empty gas stations to board games with names like Energy Quest and Petrol. Specially conceived for this occasion, an illustrated tale by Harriet Russell, whose work is regularly featured in "Time Out" and the "Guardian," introduces the ideas behind this book from a child's point of view. Russell's drawings depict ironic and humorous situations that will familiarize children with energy-saving and oil dependency concerns. *Writing Religion* Corraini Editore

A dazzling visual history of ceramic tiles from around the world and across the centuries. The Rocks Don't Lie: A Geologist Investigates Noah's Flood Harper Collins

Everything's bigger in Big Sky country, including the hearts of the Montana Men After years on the rodeo circuit, Gabe Bowden wants nothing more than land of his own and a woman who will claim his heart for more than one night. When he has the chance to buy the enormous Wolf Ranch spread, he snaps up the

incredible deal. Everything is set, until Gabe rescues a woman on the deserted, snowy road leading to the property, and the half-frozen beauty changes everything. Ella Wolf rushes to her family's abandoned Montana ranch after her twin sister is murdered. She knows she's next...unless she can uncover a secret hidden somewhere at Wolf Ranch. The last thing Ella expects is to be rescued by a rugged rancher with his own agenda. A man who almost makes her forget how dangerous love can be... As an unlikely partnership sparks into something so much more, and a killer closes in, can Ella and Gabe learn to trust one another before it's too late?

An Introduction to Co-ordination Chemistry Junior League of Honolulu Soggy Sneakers has been Oregon's primary source of information for whitewater enthusiasts since 1980. Members of Willamette Kayak and Canoe Club—who have run nearly all of Oregon's rivers—share their expertise and detail rapids and landmarks found on each run. There's something for everyone, from Class 1 (flatwater) excursions to Class 5+ (most challenging) rapid-filled adventures.

Headquartered in Corvallis, Oregon, Willamette Kayak and Canoe Club is a nonprofit organization dedicated to teaching kayaking and canoeing skills, promoting water safety, preserving and protecting the free-flowing rivers of Oregon, and developing the camaraderie of their sport. Learn more about

them at www.wkcc.org. A Taste of Aloha Currency This book details the factors involved in the injection moulding process, from material properties and selection to troubleshooting faults, and includes the equipment types currently in use and machine settings for different types of plastics. Material flow is a critical parameter in moulding and there are sections covering rheology and viscosity. High temperature is also discussed as it can lead to poor quality mouldings due to material degradation. The text is supported by 74 tables, many of which list key properties and processing parameters, and 233 figures; there are also many photographs of machinery and mouldings to illustrate key points. Troubleshooting flow charts are also included to indicate what should be changed to resolve common problems. Injection moulding in the Western World is becoming increasingly competitive as the manufacturing base for many plastic materials has moved to the East. Thus, Western manufacturers have moved into more technically difficult

products and mouldings to provide enhanced added value and maintain market share. Technology is becoming more critical, together with innovation and quality control. There is a chapter on advanced processing in injection moulding covering multimaterial and assisted moulding technologies. This guide will help develop good technical skills and appropriate processing techniques for the range of plastics and products in the marketplace. Every injection moulder will find useful information in this text, in addition, this book will be of use to experts looking to fill gaps in their knowledge base as well as those new to the industry. ARBURG has been manufacturing injection moulding machines since 1954 and is one of the major global players. The company prides itself on the support offered to clients, which is exemplified in its training courses. This book is based on some of the training material and hence is based on years of experience.

The Production and Thermal Utilization of Biomass Pellets Chicken House
100 Faces From Finland contains a series of

individual biographical studies dedicated to those who, in their own spheres of life, have made important contributions to the development of Finnish society. The articles came into being as part of the National Biography of Finland, which contains 6000 brief biographies edited by the Finnish Historical Society. The collection is not just an introduction to individuals, however, as the closely interwoven articles provide an overall view of Finland's human resources and expertise over the centuries. The book's time span stretches through three different cultural and political ages: The Middle Ages until 1809, when Finland was a part of the Swedish Realm; from 1809 to 1917, when it was a Russian Grand Duchy; and since 1917 when it has been an independent state. The collection contains, in equal proportions, people who are well-known for their contributions to society, and those who are famous in the arts and sciences. Political life is represented by the Presidents of the Republic, and the less exalted ranks of society by church builders and hunters. Cultural figures known to an international

public -- from the architect Alvar Aalto to the composer Jean Sibelius or from the painter Helene Schjerfbeck to the glass artist Tapio Wirkkala -- are also presented in the book.

In the late 1980s, the Alevis, at that time thought to be largely assimilated into the secular Turkish mainstream, began to assert their difference as they never had before. The question of Alevism's origins and its relation to Islam and to Turkish culture became a highly contested issue.

According to the dominant understanding, Alevism is part of the Islamic tradition, although located on its margins. It is further assumed that Alevism is intrinsically related to Anatolian and Turkish culture, carrying an ancient Turkish heritage, leading back into pre-Islamic Central Asian Turkish pasts. Dressler argues that this knowledge about the Alevis-their demarcation as "heterodox" but Muslim and their status as carriers of Turkish culture-

is in fact of rather recent origins. It was formulated within the complex historical dynamics of the late Ottoman Empire and the first years of the Turkish Republic in the context of Turkish nation-building and its goal of ethno-religious homogeneity.

In his first-ever collaboration, New York Times bestselling author James Rollins combines his skill for cutting-edge science and historical mystery with award-winning novelist Rebecca Cantrell's talent for haunting suspense and sensual atmosphere in a gothic tale about an ancient order and the hunt for a miraculous book known only as . . .

The Blood Gospel An earthquake in Masada, Israel, kills hundreds and reveals a tomb buried in the heart of the mountain.

A trio of investigators—Sergeant Jordan Stone, a military forensic expert; Father Rhun Korza, a Vatican priest; and Dr. Erin Granger, a brilliant but disillusioned archaeologist—are sent to explore the macabre discovery, a subterranean temple holding the

crucified body of a mummified girl. But a brutal attack at the site sets the three on the run, thrusting them into a race to recover what was once preserved in the tomb's sarcophagus: a book rumored to have been written by Christ's own hand, a tome that is said to hold the secrets to His divinity. The enemy who hounds them is like no other, a force of ancient evil directed by a leader of impossible ambitions and incalculable cunning. From crumbling tombs to splendid churches, Erin and her two companions must confront a past that traces back thousands of years, to a time when ungodly beasts hunted the dark spaces of the world, to a moment in history when Christ made a miraculous offer, a pact of salvation for those who were damned for eternity. Here is a novel that is explosive in its revelation of a secret history. Why do Catholic priests wear pectoral crosses? Why are they sworn to celibacy? Why do the monks hide their countenances under hoods? And why does Catholicism insist that the consecration of wine during Mass results in its transformation to Christ's own blood? The answers

to all go back to a secret sect within the Vatican, one whispered as rumor but whose very existence was painted for all to see by Rembrandt himself, a shadowy order known simply as the Sanguines. In the end, be warned: some books should never be found, never opened—until now.

A Pocket Mirror for Heroes is a mirror because it reflects "the person you are or the one you ought to be." It is a pocket mirror because its author took the time to be brief. And it is a mirror for heroes because it provides a vivid image of ethical and moral perfection to which all can aspire. *The Art of Worldly Wisdom* by Baltasar Gracian was all but forgotten for three hundred years, until its republication in 1992 turned this lost classic into a New York Times bestseller. Now Gracian, the Spanish Jesuit considered Machiavelli's

better in strategy and insight, sets a new standard on the art of living and the practice of achieving. That new standard is the art of heroism--how to be "the consummate person, ripe and perfect: accurate in judgment, mature in taste, attentive in listening, wise in sayings, shrewd in deeds, the center of all perfection." Gracian teaches the reader to be "a giant"--"the greatest person possible, a miracle of perfection, a king." Wit, wisdom, courage, elegance, grace, humility, spontaneity--these are the qualities needed to reach heroism in any occupation. But it is not enough to be wise or graceful: one must learn as well how to manage that talent, how to distinguish a quality from its shadow. A Pocket Mirror for Heroes provides "a politics for governing oneself, a compass for sailing toward excellence, an art for reaching distinction with just a few rules of discretion," and it will be wise and witty company for anyone who recognizes--and relishes--the challenges of daily life.

How the mystery of the Bible's greatest story shaped geology: a MacArthur Fellow presents a surprising perspective on Noah's Flood. In Tibet, geologist David R. Montgomery heard a local story about a great flood that bore a striking similarity to Noah's Flood. Intrigued, Montgomery began investigating the world's flood stories and—drawing from historic works by theologians, natural philosophers, and scientists—discovered the counterintuitive role Noah's Flood played in the development of both geology and creationism. Steno, the grandfather of geology, even invoked the Flood in laying geology's founding principles based on his observations of northern Italian landscapes. Centuries later, the founders of modern creationism based their irrational view of a global flood on a perceptive critique of geology. With an explorer's eye and a refreshing approach to both faith and science, Montgomery takes readers on a journey across landscapes and cultures. In the process we discover the illusive nature of truth, whether viewed through the lens

of science or religion, and how it changed through history and continues changing, even today.

Why is there something rather than nothing? Does God exist? Does time

flow? What are we? Do we have free will? What is truth? Metaphysics is concerned with ourselves and reality, and the most fundamental questions regarding existence. This clear and accessible introduction covers the central topics in metaphysics in a concise but comprehensive way. Brian Garrett discusses the crucial concepts in a highly readable manner, easing the reader in with a look at some important philosophical problems. He addresses key areas of metaphysics: God Existence Modality Universals and particulars Facts Paradoxes of material constitution Causation Time Free will Personal identity Truth.

This second edition has been thoroughly revised. Most chapters include substantial amounts of new material, and there are additional chapters on Existence, Modality, Facts and Paradoxes of Material Constitution. What is this thing called Metaphysics? contains many helpful student-friendly features. Each chapter concludes with a useful summary of the main ideas discussed, a glossary of important terms, study questions, annotated further reading, and a guide to web resources. Text boxes provide bite-sized summaries of key concepts and major philosophers, and clear and interesting examples are used throughout.
