This book provides the first in-depth exploration of video games as history. Chapman puts forth five basic categories of analysis for understanding historical video games: simulation and epistemology, time, space, narrative, and affordance. Through these methods of analysis he explores what these games uniquely offer as a new form of history and how they produce representations of the past. By taking an inter-disciplinary and accessible approach the book provides a specific and firm first foundation upon which to build further examination of the potential of video games as a historical form.

As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a

further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

 Who cut off Medusa's head? Who was raised by a she-bear? Who tamed Pegasus? It takes a demigod to know, and Percy Jackson can fill you in on the all the daring deeds of Perseus, Atalanta, Bellerophon, and the rest of the major Greek heroes. Told in the funny, irreverent style readers have come to expect from Percy, (I've had some bad experiences in my time, but the heroes I'm

going to tell you about were the original old school hard luck cases. They boldly screwed up where no one had screwed up before. . .) and enhanced with vibrant artwork by Caldecott Honoree John Rocco, this story collection will become the new must-have classic for Rick Riordan's legions of devoted fans--and for anyone who needs a hero. So get your flaming spear. Put on your lion skin cape. Polish your shield and make sure you've got arrows in your quiver. We're going back about four thousand years to decapitate monsters, save some kingdoms, shoot a few gods in the butt, raid the Underworld, and steal loot from evil people. Then, for dessert, we'll die painful tragic deaths. Ready? Sweet. Let's do this.

"Andrew Smith is the Kurt Vonnegut of YA . . . [Smith's novels] are the freshest, richest, and weirdest books to hit the YA world in years." —Entertainment Weekly Skillfully blending multiple story strands that transcend time and place, award-winning Grasshopper Jungle author Andrew Smith chronicles the story of Ariel, a refugee who is the sole survivor of an attack on his small village. Now living with an adoptive family in Sunday, West Virginia, Ariel's story is juxtaposed against those of a schizophrenic bomber and the diaries of a failed arctic expedition from the late nineteenth century . . . and a depressed, bionic reincarnated crow.

To date there has been a significant gap in existing knowledge about the social history of music in Britain from 1950 to the present day. The three volumes of Live Music in Britain address this gap and do so through a unique prism—that of live music. The key theme of the books is the changing nature of the live music industry in the UK, focused upon popular music but including all musical genres. Via this focus, the books offer new insights into a number of other areas including the

relationship between commercial and public funding of music; changing musical fashions and tastes; the impact of changing technologies; the changing balance of power within the music industries; the role of the state in regulating and promoting various musical activities within an increasingly globalised music economy; and the effects of demographic and other social changes on music culture. Drawing on new archival research, a wide range of academic and non-academic secondary sources, participant observation and a series of interviews with key personnel, the books have the potential to become landmark works within Popular Music Studies and broader cultural history. The third volume covers the period from Live Aid to Live Nation (1985–2015).

A groundbreaking look at the connection between germs and mental illness, and how we can protect ourselves. Is it possible to catch autism or OCD the same way we catch the flu? Can a child's contact with cat litter lead to schizophrenia? In her eye-opening new book, National Book Critics Circle Award-winning author Harriet Washington reveals that we can in fact "catch" mental illness. In *Infectious Madness*, Washington presents the new germ theory, which posits not only that many instances of Alzheimer's, OCD, and schizophrenia are caused by viruses, prions, and bacteria, but also that with antibiotics, vaccinations, and other strategies, these cases can be easily prevented or treated. Packed with cutting-edge research and tantalizing mysteries, *Infectious Madness* is rich in science, characters, and practical advice on how to protect yourself and your children from exposure to infectious threats that could sabotage your mental and physical health.

"A deeply curious and evenhanded report on our national appetites." --The New York Times In the tradition of Fast Food Nation and The Omnivore's Dilemma, an extraordinary investigation into the human lives at the heart of the American grocery store The miracle of the supermarket has never been more apparent. Like the doctors and nurses who care for the sick, suddenly the men and women who stock our shelves and operate our warehouses are understood as 'essential' workers, providing a quality of life we all too easily take for granted. But the sad truth is that the grocery industry has been failing these workers for decades. In this page-turning expose, author Benjamin Lorr pulls back the curtain on the highly secretive grocery industry. Combining deep sourcing, immersive reporting, and sharp, often laugh-out-loud prose, Lorr leads a wild investigation, asking what does it take to run a supermarket? How does our food get on the shelves? And who suffers for our increasing demands for convenience and efficiency? In this journey: • We learn the secrets of Trader Joe's success from Trader Joe himself • Drive with truckers caught in a job they call "sharecropping on wheels" • Break into industrial farms with activists to learn what it takes for a product to earn certification labels like "fair trade" and "free range" • Follow entrepreneurs as they fight for shelf space, learning essential tips, tricks, and traps for any new food business • Journey with migrants to examine shocking forced labor practices through their eyes The product of five years of research and hundreds of interviews across every level of the business, *The Secret Life of Groceries* is essential reading for those who want to understand our food system--delivering powerful social commentary on the inherently American quest for more and compassionate insight into the lives that provide it.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

A Million Years in a Day LiturgyTrainingPublications

"A brilliant young scholar's history of 175 years of teaching in America shows that teachers have always borne the brunt of shifting, often impossible expectations. In other nations, public schools are one thread in a quilt that includes free universal child care, health care, and job training. Here, schools are the whole cloth. Today we look around the world at countries like Finland and South Korea, whose students consistently outscore Americans on standardized tests, and wonder what we are doing wrong. Dana Goldstein first asks the often-forgotten question: "How did we get here?" She argues that we must take the historical perspective, understanding the political and cultural baggage that is tied to teaching, if we have any hope of positive change. In her lively, character-driven history of public teaching, Goldstein guides us through American education's many passages, including the feminization of teaching in the 1800s and the fateful growth of unions, and shows that the battles fought over nearly two centuries echo the very dilemmas we cope with today. Goldstein shows that recent innovations like Teach for America, merit pay, and teacher evaluation via student testing are actually as old as public schools themselves. Goldstein argues that long-festering ambivalence about teachers--are they civil servants or academic professionals?--and unrealistic expectations that the schools alone should compensate for poverty's ills have driven the most ambitious people from becoming teachers and sticking with it. In America's past, and in local innovations that promote the professionalization of the teaching corps, Goldstein finds answers to an age-old problem"--
