This three-volume work examines the  
research on the multinational enterprise  
(MNE) and presents a comprehensive,  
scholarly discussion of significant articles  
in this field. Editors John D. Daniels and

Jeffrey A. Krug, experts in this area, focus  
on the micro issues of the MNE identifying  
important research that has defined the  
field in many ways. The set includes a  
variety of articles, the classics as well as  
more recent publications, from a wide  
selection of international sources and  
provides a good balance between U.S. and  
non-U.S. papers.

An award-winning scientist offers his  
unorthodox approach to childrearing:  
“Parentology is brilliant, jaw-droppingly

funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these

experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

*Jewish Chronicle Colour Magazine* Oxford University Press on Demand

This established directory has been thoroughly revised, updated and expanded to provide current and comprehensive information on more than 24,000 of Europe's largest companies. Four volumes are filled with facts and contacts for major public and private companies in all 20 countries of Western Europe.

*Creating the Twentieth Century* OECD Publishing

This manual gives a complete, detailed and up-to-date description of the Eurostat-OECD PPP Programme, including its organisation, the various surveys carried out by participating countries and the ways PPPs are calculated and disseminated. It also provides guidance on the use of PPPs.

*Foreign Companies in China Yearbook* Simon and Schuster

In *The Peregrine Profession* Per-Olof Grönberg offers an account of transnational mobility of engineers and architects educated in the Nordic countries 1880-1919. These graduates constituted an extraordinary mobile group, that often returned home and became important for Nordic industrialisation.

*National Atlas of Sweden* Brussels : Commission of the European Communities  
*Fluctuations and Non-linear Wave Interactions in Plasmas* talks about a theory of fluctuations in a homogenous plasma. The title takes into consideration non-linear wave interactions. The text first presents the statistical description of plasma, and then proceeds to covering non-linear electrodynamic equations. Next, the selection deals with the electrodynamic properties of magneto-active plasma and waves in plasma. The text also tackles non-linear wave interactions, along with fluctuations in plasmas. The next chapter talks about the effect of non-linear wave interaction on fluctuations in a plasma. Chapter 8 details fluctuation-dissipation theorem, while

Chapter 9 discusses kinetic equations. The tenth chapter covers the scattering and radiation of waves and the last chapter tackles wave interaction in semi-bounded plasma. The book will be of great use to scientists and professionals who deals with plasmas.

*F&S Index Europe Annual Elsevier*

Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product /

service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

To all those individuals who gave us the research and publication of business and technical help as well, we

are similarly very grateful. information for industry and commerce in many parts of the world.

**The Times 1000** Springer

This book - a renewed, third edition of the successful 1981 and 1988 works, published under the same title - contains twelve essays on the economic organization of important industries in the EC. Expert economists from universities and research institutes in France, Italy, Germany, the United Kingdom and the Netherlands, discuss basic industrial, manufacturing and services sectors from a structural and operational point of view. Their expert contributions unravel the strengths and weaknesses of these sectors

now that '1992' has arrived. The focus of the book, European instead of 'national', the unique feature qualifying the previous editions, has been retained. In addition to the sectoral studies, the editor has written an introductory essay which deals with the concept of market structure, allowing the reader to understand both the theoretical background and the terms used in the following chapters. The book concludes with a survey of European competition policy, which has gained in scope and importance, particularly with the advent of merger control.
