Tales of a Fourth Grade Nothing

HarperPerennial

"An artfully told story . . . The history, the land, and the determination of a band of refugees to care for each other are vividly evoked in this important work." -- Starred review, Kirkus Reviews

In the dry spring of 1999, eleven-year-old Stephen Majok watches as his friend Wol joins a circle of dancers. Wol is celebrating – only fourteen, he is engaged to Stephen's sister. Wol wants to marry because he might join the guerrillas in southern Sudan and fight the northern government soldiers. He wants a wife to remember him. Stephen thinks Wol is crazy. Children should study. But because of the civil war, there has been no school in their village for over a year. All Stephen has left from his student days is his books and one precious pencil, and the hunger for knowledge. Then, suddenly – but not unexpectedly – exploding bombs are heard in the tiny village. Stephen's mother tells him to hurry, pack his bag, and hide beyond the forest with Wol and their friend Deng. Stephen grabs his geography book, his pencil, and little else. He does not want to leave his mother and sister. He does not want to leave the life he loves. In her latest portrayal of "children caught in the cultural crossfire" (School Library Journal), Alice Mead emphasizes the attachment all humans have to the small place on earth we call home, and our resistance to being displaced, even when our very lives are threatened.

Preparing children to become citizens of a democracy requires recognition of the different ways in which children learn about politics. Kids in the United States currently spend most of their lives in controlled situations such as schools where the dependency they experience in their homes is reinforced. Besides teachers -- books, films, television, and video games influence how children think about democracy. Interviews and surveys of children during three Presidential elections and two non-Presidential years show how some sixth-graders in a Vermont town react to the political issues raised in those elections. Besides presenting the children's voices, Sugarman also examines some aspects of the media and of the school situation to see how they effect the children's thinking. Changes that might improve the children's understanding and knowledge of democracy are also suggested. This book should be of interest to parents, teachers, those involved in media literacy, popular culture, and child development.

The Complete MAUS Hippocrene Books

New York Times Bestseller Now part of the HBO docuseries "Exterminate All the Brutes," written and directed by Raoul Peck Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a

history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, *An Indigenous Peoples' History of the United States* is an essential resource providing historical threads that are crucial for understanding the present. In *An Indigenous Peoples' History of the United States*, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative. *An Indigenous Peoples' History of the United States* is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature.

This document is a response to teachers' requests for practical assistance in

implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)

In the tradition of *Clementine* and *Ramona Quimby*, meet *Bat*. Author Elana K. Arnold returns with another irresistible story of friendship in this widely acclaimed series starring an unforgettable boy on the autism spectrum. For Bixby Alexander Tam

(nicknamed Bat), life is pretty great. He's the caretaker of the best baby skunk in the world—even Janie, his older sister, is warming up to Thor. When Janie gets a part in the school play and can't watch Bat after school, it means some pretty big changes. Someone else has to take care of the skunk kit in the afternoons, Janie is having sleepovers with her new friends, and Bat wants everything to go back to normal. He just has to make it to the night of Janie's performance. . . .

Elana K. Arnold's Bat trilogy is a proven winner in the home and classroom—kids love these short illustrated young middle grade books. The trilogy is *A Boy Called Bat*, *Bat and the Waiting Game*, and *Bat and the End of Everything*.

History Alive! Pursuing American Ideals centers on the five founding ideals from the Declaration of Independence: equality, rights, liberty, opportunity, and democracy. Each generation has struggled with these ideals. Some have made little progress toward achieving them. Others have made great progress. This book invites students to become engaged in this struggle, from establishing an American republic to the making of modern America. --Website. *Traditions & Encounters* Candlewick Press

In a globalized market where the emerging workforce will increasingly travel within their nations and abroad for work opportunities, it is valuable to learn about the international education system and practices, to assess the competition. For example, annual comparison of student performance is measured across math and science subjects globally. What is not well known is how

geography educational systems compare around the world and how student success in this subject translates to learning in other courses or employment after graduation. The importance of geography in our personal, professional, and civic lives is transparent when one considers how finding one's way with a map, understanding of world cultures, or identifying spatial patterns of disease spread might influence the decisions we make. Written for a global audience, this is the first English publication on geography education in Japan, addressing some fundamental questions. What is the nature of the geography educational systems in Japan? How does the focus on content and skills in Japanese schools differ from that in other countries? This book includes 25 authors from diverse geography instruction and research experiences, making it an authoritative publication on Japan's geography education system. The contribution of this book to the larger geography educational community is sharing the key strengths, concerns, and future of this school subject in English, where previously most publications were in Japanese. It will be a useful source for researchers and teachers to understand Japan's evolving geography instruction in the past, present, and future. The 21 chapters are organized into themes, beginning with an overview of the geography education system in Japan, followed by chapters that deal with regional geography and fieldwork, teacher training, geography education's contributions to society, and a comparative study of geography education across multiple countries. The book ends with a vision of geography education in the future.

World History and Geography Henry Holt and Company

ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS OF THE YEAR
A major book about the future of the world, blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half a billion years, there have been five mass extinctions, when the diversity of life on earth suddenly and dramatically contracted. Scientists around the world are currently monitoring the sixth extinction, predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs. This time around, the cataclysm is us. In *The Sixth Extinction*, two-time winner of the National Magazine Award and New Yorker writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines, accompanying many of them into the field: geologists who study deep ocean cores, botanists who follow the tree line as it climbs up the Andes, marine biologists who dive off the Great Barrier Reef. She introduces us to a dozen species, some already gone, others facing extinction, including the Panamian golden frog, staghorn coral, the great auk, and the Sumatran rhino. Through these stories, Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as concept, from its first articulation by Georges Cuvier in revolutionary Paris up through the present day. The sixth extinction is likely to be mankind's most lasting legacy; as Kolbert observes, it compels us to rethink the fundamental question of what it means to be human.

History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Thirteen-year-old Brian Robeson, haunted by his secret knowledge of his mother's infidelity, is traveling by single-engine plane to visit his father for the first time since the divorce. When the plane crashes, killing the pilot, the sole survivor is Brian. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from his ordeal with new patience and maturity, and a greater understanding of himself and his parents.

Resist: A Story of D-Day Springer Baseball, basketball, football — no matter the game, Jackie Robinson excelled. His talents would have easily landed another man a career in pro sports, but in America in the 1930s and '40s, such opportunities were closed to athletes like Jackie for one reason: his

skin was the wrong color. Settling for playing baseball in the Negro Leagues, Jackie chafed at the inability to prove himself where it mattered most: the major leagues. Then in 1946, Branch Rickey, manager of the Brooklyn Dodgers, decided he was going to break the "rules" of segregation: he recruited Jackie Robinson. Fiercely determined, Jackie faced cruel and sometimes violent hatred and discrimination, but he proved himself again and again, exhibiting courage, restraint, and a phenomenal ability to play the game. In this compelling biography, award-winning author Doreen Rappaport chronicles the extraordinary life of Jackie Robinson and how his achievements won over — and changed — a segregated nation.
