## HEAVEN SUMMERS

**NFPA 460, Standard for Aircraft Rescue and Firefighting Services at Airports, Recurring Proficiency of Airport Fire Fighters, and Evaluating Aircraft Rescue and Firefighting Foam Equipment** Bearport Publishing

An airplane rolls down the runway and is about to take off when a fire erupts in the right engine. Within seconds, the cabin is engulfed in flames. The passengers and crew start to breathe in thick smoke. They need to be evacuated—and fast! In less than a minute, aviation firefighters arrive with their equipment, ready to battle the blaze and rescue the people trapped inside the plane. In *Aviation Firefighters*, dramatic, true stories will keep readers turning the pages as they learn firsthand how these tough, brave firefighters use their strength, quick thinking, and expert skills to battle deadly blazes. In addition, readers will go behind the scenes to learn how aviation

firefighters train for their job so that they are ready to spring into action at a moment's notice.

**Study Guide for the Fourth Edition of Aircraft Rescue and Fire Fighting** Jones & Bartlett Learning

Information in this manual is intended to meet the requirements of the 2015 edition of NFPA® 1003, Standard for Airport Fire Fighter Professional Qualifications. Additional material addresses the airport fire fighting apparatus covered in Chapter 9 of the 2014 edition of NFPA® 1002, Standard on Fire Apparatus Driver/Operator Professional Qualifications. Key parts of NFPA® 402, Guide for Aircraft Rescue and Fire-Fighting Operations (2013 edition), and NFPA® 403, Standard for Aircraft Rescue and Fire-Fighting Services at Airports (2014 edition), are also covered in this manual. Other materials included in this manual are those subjects included in the training requirements of Federal Aviation Regulations (FARs) 139.315, 139.317, and 139.319.

*Aircraft Rescue and Fire Fighting (ARFF): Group Chairman's Factual Report* Fire Engineering Books & Videos

This manual provides basic information needed by firefighters to effectively perform the various

tasks involved in aircraft rescue and fire fighting. Also addresses the requirements.

**Airport Rescue and Firefighting Station Building Design** The Stationery Office  
 Exam Prep: Airport Fire Fighter is part of Jones and Bartlett's comprehensive series of exam preparation manuals for fire service professionals. The series author, Dr. Ben A. Hirst through his company, Performance Training Systems, writes and validates actual certification and promotional exams for state fire training agencies and major fire departments nationwide. Each book in the Exam Prep series includes questions that have been used on these actual exams. This manual contains three full-length practice exams with self-scoring guides and page references to major texts and references on the subject. Winning test-taking tips and helpful hints are also provided. The manual follows Dr. Hirst's Systematic Approach to Exam Preparation, which provides immediate feedback to help students emphasize areas of weakness and learn material through context and association.

**Aircraft Rescue & Fire Fighting Services at Airports** NationalFireProtectionAssoc  
 Aircraft Rescue and Fire Fighting provides basic information needed by firefighters to effectively

perform the various tasks involved in aircraft rescue and fire fighting. Material covered includes qualifications for aircraft rescue and fire fighting (ARFF) personnel, aircraft and airport familiarization, safety and aircraft hazards, ARFF communications, extinguishing agents, ARFF apparatus, rescue tools and equipment, ARFF driver/operator, airport emergency planning, and ARFF strategic and tactical operations. Aircraft Rescue and Fire Fighting addresses the requirements of NFPA 1003, Standard for Airport Fire Fighter Professional Qualifications (2005 edition). Additional material addresses the airport fire fighting apparatus covered in Chapter 9 of the 2008 edition of NFPA 1002, Standard on Fire Apparatus Driver/Operator Professional Qualifications. Key parts of NFPA 402, Guide for Aircraft Rescue and Fire-Fighting Operations (2008 edition), and NFPA 403, Standard for Aircraft Rescue and Fire-Fighting Services at Airports (2008 edition), are also covered in this manual. Other materials included in this manual are those subjects included in the training requirements of Federal Aviation Regulations (FARs) 139.315, 139.317, and 139.319.

Recommended Practices for Aircraft Rescue and Fire Fighting Services at Airports and Heliports  
Prentice Hall

Airport Firefighters, Airport Driver Operators, and Airport Crew Chiefs will use this text to meet the most current NFPA, FARs, and ICAO requirements. The book includes: \* 31 Skill Sheets NEW in this edition \* Photos, Illustrations and Learning Activities - ALL NEW \* Review Questions for all 12 chapters \* Exam Prep for students is a separate item This book provides the information firefighters need to effectively perform the tasks for aircraft rescue and fire fighting and to complete airport firefighter certification. Content includes: \* Familiarization with civilian and military aircraft \* Airport familiarization \* Operating structural and specialized aircraft fire fighting

apparatus and equipment \* Safety and aircraft Hazards \* Airport fire and rescue communications \* Rescue tools and equipment including gaining access to aircraft interiors \* Aircraft fuels, aircraft components and extinguishing agents \* Aircraft fire suppression and strategy and tactics including engines, auxiliary power units, wheel assemblies, and rocket engines \* ARFF vehicle driver operator \* Airport emergency planning \* The theory and practice of aircraft fire fighting and rescue operations The information in this manual is intended to meet the requirements of NFPA 1003: Standard for Airport Fire Fighter Professional Qualifications (2015) NFPA 1002: Standard on Fire Apparatus Driver/Operator Professional Qualifications (2014) Chapter 9 requirements are also included. NFPA 402: Guide for Aircraft Rescue and Fire-Fighting Operations (2013) and NFPA 403: Standard for Aircraft Rescue and Fire-Fighting Services at Airports (2014) are referenced throughout the book. Federal Aviation Regulations (FARs) 139.315, 139.317, and the International Civil Aviation Organization (ICAO) Airport Services Manual, Parts 1 and 7 training requirements are also included. Complete IFSTA Curriculum is a separate item and provided by IFSTA at no cost to qualified instructors.

Programs for Training of Aircraft Rescue and Firefighting Personnel International Fire Service Training Assn

The Fire and Rescue Service Operational Guidance - Aircraft Incidents provides a consistent approach that forms the basis for common operational practices. It supports interoperability between fire and rescue services, other emergency responders, the aviation industry and other groups. This guidance covers a wide range of incident types that Fire and Rescue Services are likely to encounter in relation to aircraft. It is applicable to any event regardless of scale, from

small incidents, such as an accident involving a microlight, to a large incident involving a civil aircraft (e.g. Airbus A380) resulting in a large scale major incident. It covers the time period from the receipt of the first emergency call to the closure of the incident by the Fire and Rescue Service Incident Commander. Whilst this guidance may be of use to a number of other agencies, it is mainly for the UK Fire and Rescue Service. In addition to detailed tactical and technical information it also outlines the key operational and strategic responsibilities and considerations that need to be taken into account to enable the Fire and Rescue Service to train, test intervention strategies and plan to ensure effective response at an aircraft incident
