This authoritative book has supported thousands of distance learners, providing accessible support and friendly advice for their studies. This essential guide provides practical help for anyone who is embarking on a distance learning course. Ideal for those who have not previously studied at a distance or for students returning to study after a break, it covers fundamental issues such as motivation, goal-setting, time management and coping strategies. The fourth edition includes: • How to understand the distance learning experience and what your institution expects of its distance

learners • The practicalities of learning at a distance, including how to get support when you need it • Updated information on the use of new technologies in distance learning, including mobile learning • Tips and advice on doing a research project at a distance • Coverage of key study skills including reading and note-making, completing written assignments, developing critical analysis skills and avoiding plagiarism • Support for international students in understanding how to make the most of studying remotely at a UK Higher Education institution Hallmark features of this book are the comments and advice offered by students and tutors sharing their own experiences of distance learning. It also includes comprehensive self-study activities that highlight the element of active learning that is crucial to successful studying at a distance. Studying at a Distance, 4th edition is a key resource for undergraduates and postgraduates in all open and distance learning or e-learning courses. *A Practitioner's Handbook* McGraw-Hill Education (UK)

From the bestselling author of *The Mind Map Book*, proven mind mapping techniques to help you raise all levels of your intelligence and creativity, based on the latest discoveries about the human brain. Using the latest research on the workings of the human brain, Tony Buzan, one of the world's leading authorities on learning techniques, provides step-by-step exercises for discovering the powers of the right side of the brain and learning to use the left side more effectively. By increasing our understanding of how the mind works, he teaches us:

- How to read faster and more effectively
- How to study more efficiently and increase overall memory
- How language and imagery can be used for recording, organizing, remembering, creative thinking and problem solving.

This completely updated Third Edition of a classic work provides a proven way of using our brains to their fullest potential and to our best advantage. [Mind Mapping For Dummies](#) Penguin

Brain Training is an easy-to-digest collection of puzzles and tips to help exercise the brain and keep the cognitive

faculties razor-sharp. Brain Training covers key areas of brain function, including memory, perception, problem-solving, verbal reasoning, and the body (how diet, exercise, meditation and other physical and mental fillips can raise brainpower). Each chapter then concentrates on a specific brain function, beginning with a lively explanation of how it works and then offers the most effective prescriptions available to exercise that particular mental function. For those who are struggling with memory, those having trouble learning new things, or those facing the pressures of exams - in fact, by anyone who wishes to maximize their cognitive potential - Brain Training is an indispensable resource to get the flabbiest brain fighting fit once again. **Mind Maps at Work** Ft Press

The coauthor of *Lessons from the Art of Juggling* teaches us how to "re-think the way we think," by introducing an approach to thriving on change called "synvergent thinking," the art of balancing convergent and divergent thinking modes, logic and imagination, reason and

intuition.
