Introducing Solar System Facts for Kids Updated March 2017

The 'For Kids' series has been produced for children of seven and over. It is the perfect answer to move your child away from simple

picture books to start enjoying and learning from more challenging reading material. Every book in the series is an exciting factual story that will boost reading confidence and introduce active and motivating vocabulary. Parental support is necessary to get the best out of the English Reading Tree Series. All of the books are fast-paced and designed to keep children engaged. There is also a fun quiz that can be played to give you an accurate idea of how much he or she has learnt. What people are saying about the English Reading Tree: Excellent book that not only improves reading ability but educates Goodreads Very well presented and I particularly enjoyed

the quiz at the end: Post Online Simple, easy to read and full of interesting facts. What more can a parent ask for? Island EBooks [My First Book of Planets](#) Speedy Publishing LLC When you were born, your parents named you. They probably chose a name close to their hearts and with a meaning they know. The process of naming planets, on the other hand, is different. This rewarding since book for fourth graders will investigate the process of how planets are named. Your child will easily associate with this book because it's in line with the curriculum in school. [Earth: Planets in Our Solar System | Children's Astronomy Edition](#) Speedy Publishing LLC

Why is Uranus the “Blue-Green Planet”?

Well, this book provides an explanation. It is littered with information that pertains to the composition, size and characteristics of Uranus as a planet. Fill your bookshelves with wonderful reading materials that expertly combine text and visual designs. Grab a copy today.

Solar System for Kids
Speedy Publishing LLC

The solar system is a complicated but very interesting subject to study. The problem is, school textbooks are so heavy with texts, they become very boring to children. The good news is, workbooks such as this exist. Using a hands-on and picture-dominated approach to learning, a

child would have absolute fun learning about the star and the planets. Secure a copy today!

Why Does It Happen?: Planets, Outer Space and the Atmosphere

Speedy Publishing LLC
Presents an

introduction to the Solar System and the physical features of the eight planets that revolve around the Sun, in a text that includes learning activities.

 Publisher Introduction
 Space, the final
 frontier... to explore
 strange new worlds, to
 seek out new life and
 new civilizations, to
 boldly go where no
 man has gone before.
 ~ Gene Roddenberry
 We are living in an
 amazing place in the
 universe called: The
 Milky Way Galaxy. It is
 surrounded by lots and
 lots of stars, planets,
 asteroids, comets, and
 other celestial objects.
 One neat place in the
 Milky Way Galaxy is
 where planet earth is
 found. Can you guess
 where we are? Did you

guess: The solar
 system? Good job! The
 solar system has lots of
 fascinating things to
 discover. Let's learn
 about some of them
 and don't forget to
 share with others!
 First, let's define our
 solar system. What is
 it? If someone asked
 you that question,
 what would you say?
 ESA for kids explains it
 in a nice and simple
 way: "The Solar
 System is made up of
 the Sun and all of the
 smaller objects that
 move around it."
 Simple enough, right?
 It might sound that
 way, but it isn't! The
 solar system has eight
 planets. Let's start with
 the sun. It is the
 biggest part of our
 solar system and
 everything moves
 around this bright star.
