A Fuzzy Probabilistic Relational Database Model and Algebra
 A fuzzy-association algebra (FA-algebra) based on fuzzy association patterns, fuzzy queries with fuzzy values and linguistic hedges are proposed in [30]. Fuzzy association algebra is

studied for querying fuzzy object oriented databases, based on possibility distribution and the semantic measure of fuzzy data and equivalence degree of two objects.

AN ALGEBRAIC OPERATION IN FUZZY OBJECT-ORIENTED DATABASES ...
Querying fuzzy relational databases through fuzzy domain ...
 The fuzzy databases are extended from

the classical databases based on fuzzy sets and possibility theory, and they can be resemblance-based fuzzy model [5, 6] and possibility-based fuzzy model [7, 8]. In the context of fuzzy databases, fuzzy functional dependency (FFD) has emerged to extend the classical functional dependency to represent functional relationships between classes/attributes of objects

for fuzzy database models. **Fuzzy Relational Algebra For Possibility Distribution** The Fuzzy Algebra used in this model is an extension of classical relational algebra. In this extension specific comparison operators are used for handling fuzzy information. Fuzzy querying receives special handling, based on the following points: c
“Atomic

Selection” is a query, on a relation type R FG, in which the satisfaction of *Fuzzy Relational Algebra For Possibility Distribution* We distinguish two types of fuzziness: one in an attribute value itself and the other in an association of them. For such fuzzy data, we propose a possibility-distribution-fuzzy-relational model, in which fuzzy data are represented by fuzzy

relations whose grades of membership and attribute values are possibility distributions. In this model, the former fuzziness is represented by a possibility distribution and the latter by a grade of membership.

Retrieval From Fuzzy Database by Fuzzy Relational Algebra ...

In this model, the former ambiguity is represented by a possibility distribution and the latter

by a grade of membership. The relational algebra for such fuzzy data model is defined. The traditional operations, namely, the union, intersection, difference and extended Cartesian product are similarly defined as those in fuzzy set theory.

Fuzzy Relational Algebra For Possibility Distribution

This paper describes an extended relational database model based on probability

theory and possibility theory. Fuzzy information and probabilistic information are incorporated into the relational databases simultaneously to represent fuzzy probability of events in the real-world applications. The tuples in such a relation are associated with a possibility distribution, and their attribute ...
